Practice workbook · GDP per capita

Output per person from total GDP and population, handling millions and billions.

2 question parts: 1 worked-example retry and 1 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

4 GDP per capita is a measure of a country's economic output that accounts for population. Figure 4 shows the population and gross domestic product (GDP) for Vietnam in 2016.

	2016
Population (million)	92.7
GDP (US$ million)	202 600

Figure 4
