Practice workbook · Price elasticity of demand: meaning, values and uses

What PED measures, interpreting values from perfectly inelastic to perfectly elastic, the determinants, the link with total revenue, and why PED matters to firms and government.

13 question parts: 1 worked-example retry and 12 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

Marina Café is popular with tourists and locals in the town of Budva, Montenegro. It is situated next to the sea, with views of the surrounding mountains. Customers can enjoy their drinks whilst benefitting from the pleasant surroundings but pay €2.00 for a cup of coffee. The same brand of coffee can be bought for €0.80 a cup in some other cafés in Budva.

(b) With reference to the data above and your knowledge of economics, analyse why price elasticity of demand (PED) may be relatively inelastic at Marina Café.

Churros are a popular Spanish snack made from fried pastry and covered in sugar and/or chocolate. Raphael operates a factory making the churros pastry, which is supplied to busy restaurants and street vendors all over Madrid, Spain. The factory has been owned by his family since 1980 and currently has 23 employees.

The pastry-making process involves mixing all the ingredients together and then heating them. Once the mixture has cooled, eggs are added and the dough is then shaped into lengths of about 15 cm. Raphael is considering introducing division of labour into the production process in order to increase productivity.

(c) With reference to the data above and your knowledge of economics, evaluate whether introducing division of labour is the best way for Raphael to increase productivity in his pastry-making factory.

German broadband group urges the Vodafone-Liberty deal to be stopped

A business group representing German broadband providers asked regulators to stop the takeover by Vodafone of Liberty Global's German operations, saying the new firm would be too dominant. In 2018, Vodafone agreed to pay $21.8bn for Liberty Global. Arguments against the takeover included that it would delay the work on building a nationwide fibre-optic network and damage competition in the cable TV market.

Value Added Tax (VAT) is an indirect tax that must be added to the price of most food and household goods. The rate of VAT in South Africa was increased from 14% to 15% on 1st April 2018. Both consumer spending and business confidence fell following this increase but a further rise in VAT is being discussed by the government. VAT is not currently added to the price of fruit, vegetables and bread.

(c) With reference to the data above and your knowledge of economics, evaluate the usefulness of price elasticity of demand (PED) in helping the South African Government to decide whether to increase the rate of VAT.
