Practice workbook · Supply of labour: what changes the workforce

Population size, migration, age structure, retirement and school-leaving ages, female participation, skills, and geographical/occupational mobility.

13 question parts: 1 worked-example retry and 12 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

2021 NOV · Paper 01

Worked-example retry · Attempt part e only.

3 (a) Which **one** of the following is likely to lead to an inefficient allocation of resources?

(1)

- ☒ **A** Migration
- ☒ **B** Competition
- ☒ **C** Lack of information
- ☒ **D** Division of labour

(b) Which **one** of the following is an example of an occupation in the tertiary sector?

(1)

- ☒ **A** Sheep farmer
- ☒ **B** Factory worker
- ☒ **C** Coal miner
- ☒ **D** Sales assistant

(c) Using the diagram below, draw the effects of a minimum wage (W_1) that has been set above the equilibrium wage (W_e). Label the new quantity of labour demanded and the new quantity of labour supplied.

1. Question 3 · part e · 9 marks

2021 NOV · Paper 01

Worked-example retry · Attempt part e only.

The current retirement age in Singapore is 62. However, it will gradually be raised to 63 in 2022 and to 65 by 2030. People are living longer and the life expectancy in the country is now over 84 years.

The manufacturing sector contributes almost 25% of Singapore's Gross Domestic Product (GDP). The financial services sector, which is growing, is also making a significant contribution to GDP.

(e) With reference to the data above and your knowledge of economics, assess whether raising the retirement age is likely to be the most effective method to increase the supply of labour.

Firms in Canada, the world's second largest country, have been struggling to find the labour needed for specialist positions such as computer engineers and web designers. The 'Global Talent Stream' is a government programme that provides firms with a quick way to hire highly skilled foreign workers. High costs and long time commitments often stop Canadians from training. Although a processing fee is payable for each new employee, firms have welcomed the programme.

(Source: adapted from http://www.canada.ca/en/employment-socialdevelopment/)

(d) With reference to the data above and your knowledge of economics, analyse why Canadian firms may have been struggling to hire the labour they need.

2. Question 3 · part d · 6 marks

2019 JUN · Paper 01

Further practice · Attempt part d only.

Productivity is a measure of how efficiently goods and services are produced and is the single most important determinant of a country's per capita income. Canada's labour productivity growth has been lower than that of other leading economies for many decades, reducing its international competitiveness. Since 2011 however, Canada's labour productivity has greatly improved and it is now the 3rd most productive of the 16 leading economies.

(Source: adapted from http://www.conferenceboard.ca/hcp/)

(e) With reference to the data above and your knowledge of economics, assess the extent to which an increase in education and training is the best way to increase productivity.

The rise of the restaurant robot

There has been an increase in the number of restaurants using robots instead of waiters and even chefs. Waiters who take customer orders have been replaced with computer tablets for ordering. Technology is now available to automatically serve espresso shots and make cappuccinos. This is due to efficiencies, rising labour costs, consumers' desire for convenience and their changing purchasing habits. This could change the dining experience as restaurants increase their use of technology.

(Source adapted from: https://www.forbes.com/sites/andrewrigie/2018/09/24/the-rise-of-the-restaurant-robot/#4f69b2593747)

(c) With reference to the data above and your knowledge of economics, evaluate the possible effect of an increase in the use of technology on productivity in restaurants.

In England, there has been an increase in the number of science, maths and modern language graduates. Some of these graduates choose to enter the teaching profession with these qualifications. Many are encouraged to do so by a government bonus payment of £9 000, only available to graduates in these subjects. However, many do not stay in the profession for more than one or two years. This is due to problems of long working hours, bureaucracy and student behaviour. Those with science qualifications often find different types of employment quite easily.

(Source adapted from: https://www.theguardian.com/education/2019/oct/05/science-and-language-teachers-to-get-9000-staying-on-bonus)

(h) With reference to the data above and your knowledge of economics, assess whether an increase in the number of people with skills and qualifications will always lead to an increase in the supply of teachers.

2 A country is able to produce agricultural and non-agricultural goods with a given amount of resources. Its production possibility curve (PPC) is shown in Figure 2.

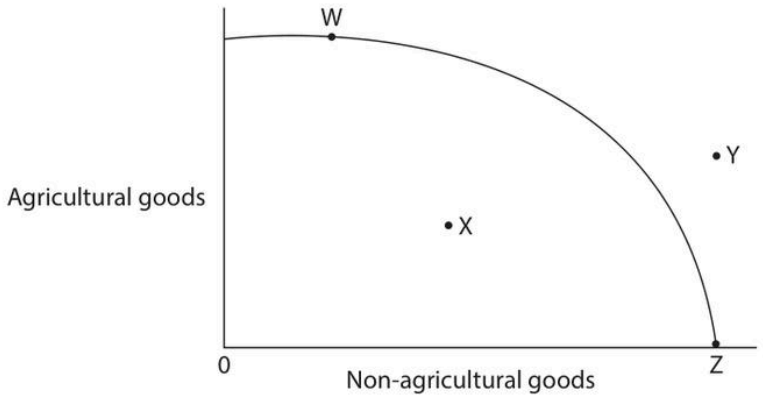

Figure 2

(a) Which **one** of the following options shows unobtainable production?

(1)

- ☒ **A** W
- ☒ **B** X
- ☒ **C** Y
- ☒ **D** Z

OLevels.COM — SCHOOL —

(b) Which **one** of the following is a factor that may affect the supply of labour?

(1)

- ☒ **A** Age distribution of population
- ☒ **B** Economies of scale
- ☒ **C** Firms aiming to maximise profit
- ☒ **D** Long run average costs

13. Question 2 · part b · 1 mark

2025 JUN · Paper 01

Further practice · Attempt part b only.

A firm increases supply by 5.4% following a price increase of 7.8%.

(c) Calculate, to two decimal places, the **price elasticity of supply (PES)** for the firm.
You are advised to show your working.

(2)

(d) What is meant by the term innovation?

(2)

(e) Describe **one** reason why a car mechanic is a factor of production.
