In 2019, the Estonian Government increased the subsidy for public transport by €9 m to €101m. The subsidy for bus services grew from €34.8 m to €43.3 m in 2019.

Minister of Economic Affairs and Infrastructure Kadri Simson said, "Greater support for public transport services will ensure better mobility as well as reduce cars on the road and reduce pollution of the environment. The subsidies also make movement easier for less well-off residents. Due to subsidised bus services, the number of passengers grew by 33% in one month."

The minister described local air services as one of the priorities for the Estonian Government in regional development. Air services to the major Western Estonian islands of Saaremaa and Hiiumaa have been given €5.53 m, more than double the €2.6 m subsidy they received last year.

(Source adapted from: https://news.err.ee/863306/public-transport-subsidy-to-increase-to-101-million-next-year)

(c) With reference to the data above and your knowledge of economics, evaluate the advantages of using subsidies for public transport to protect the environment for a country such as Estonia.

France is Europe's second largest consumer base with a high-income population. The French retail market is highly developed and its luxury sector is well known around the world. When exporting to France, UK firms must consider factors such as quality in order to be successful in this very competitive market.

(b) With reference to the data above and your knowledge of economics, analyse why an improvement in the quality of UK goods may result in a positive impact on the UK's current account.

As part of its fiscal policy, the UK Government has promised additional funding and increased pay for doctors over the next five years to help the country's struggling healthcare system.

The UK public healthcare system is under considerable strain. For several months hospitals have been dealing with a lack of staff and long waiting times for medical care, with surgeries postponed or cancelled. At the end of April 2024, 7.6 million people were still waiting for treatment.

The UK's healthcare system is paid for by taxpayers to provide free access to hospital and doctor services for all citizens. The government is unsure how this additional investment will be funded and currently spends around 9.3% of its gross domestic product (GDP) on healthcare.

(c) With reference to the data above and your knowledge of economics, evaluate the possible economic benefits of increasing government expenditure on healthcare for a country such as the UK.
