A new UK report identified the urgent need to reduce pollution from vehicles and provide more open spaces and parks.

Researchers looked at the impact on health when participants walked for two hours on London's busy Oxford Street. This was then compared to those walking in the nearby large open space of Hyde Park.

The results showed that people walking in the park performed better. The air pollution from vehicle fumes largely removed the health benefit from the exercise in Oxford Street. The report suggests that people should avoid walking in busy streets and should instead walk in parks or open spaces.
