In January 2019, the Indian Government approved new legislation that improved and simplified its policy on foreign direct investment (FDI). This helped to attract more multinational corporations (MNCs) to the country.

In 2019, India ranked among the top 10 economies benefitting from FDI. The overall growth of FDI in India was due to its many resources. These include a high degree of specialisation in services and a skilled, English-speaking, low-cost labour force. India also has a potential market of over one billion people.

FDI in India has been focused on chemicals, computer software and hardware, telecommunications, the automobile industry, construction, power and pharmaceuticals.
