Type MS · Calculating price elasticity of demand (PED)

Answer 1 of 8 · Question 1 part f · 2 marks

2022 JUN · Paper 01 (regional R) · extract 1 of 5 · find part f in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **A** Division of labour B is not correct because this is creating products from new ideas C is not correct because this is using more labour during production than capital D is not correct because this relates to the rate of production due to given resources	**(1)**

Question number	Answer	Mark
1(b)	**AO2 1 mark** The only correct answer is: **D** Total revenue A is not correct because this is $10 B is not correct because only variable costs are shown, not fixed costs C is not correct because this would be total revenue – total costs	**(1)**

Question number	Answer	Mark
1(c)	**AO1 2 marks** Award 1 mark for reference to an increase in demand and 1 mark for reference to decreased income Goods for which demand will increase **(1)** as incomes decrease **(1)** **OR** Goods for which demand will decrease **(1)** as incomes increase **(1)** Accept any other appropriate response	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 1 of 8 · Question 1 part f · 2 marks

2022 JUN · Paper 01 (regional R) · extract 2 of 5 · find part f in this mark scheme extract

Question number	Answer	Mark
1(d)	**AO1 1 mark** Award 1 mark for correct reason • Negative advertising • Fall in income • Negative fashion/taste change • Fall in price of substitute goods • Rise in price of complementary goods • Decrease in the population Accept any other appropriate response	**(1)**

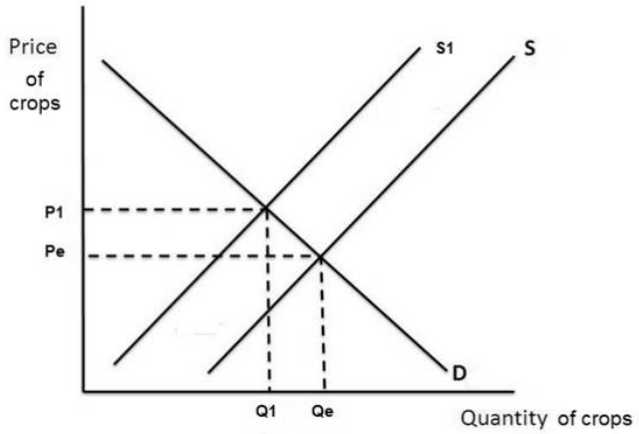

Question number	Answer	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition Converting resources into goods or services Accept any other appropriate response	**(1)**

	Answer	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation -2.1%/1.6% **(1)** Award 1 mark for correct PED = -1.31 **(1)** Award 2 marks if PED is correctly calculated as -1.31, even if no calculations are shown Do not award marks for a formula	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 1 of 8 · Question 1 part f · 2 marks

2022 JUN · Paper 01 (regional R) · extract 3 of 5 · find part f in this mark scheme extract

Question number	Answer	Mark
1(g)	**AO2 3 marks** Award 1 mark for leftward shift of supply, labelled Award 1 mark for higher equilibrium price, labelled Award 1 mark for lower equilibrium quantity, labelled  	(3)

Question number	Answer	Mark
1(h)	**AO2 3 marks** Award 1 mark for identifying a reason Award 1 mark for developing the response Award 1 mark for the response being in context • As China has become more developed, demand for services has increased **(1)** because people demand more of things like education and health care as the economy grows **(1)** therefore employment is likely to transfer from the primary sector towards the tertiary sector **(1)** Accept any other appropriate response	(3)

Type MS · Calculating price elasticity of demand (PED)

Answer 1 of 8 · Question 1 part f · 2 marks

2022 JUN · Paper 01 (regional R) · extract 4 of 5 · find part f in this mark scheme extract

Question number	Indicative content
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • It is an economic assumption that businesses aim to maximise profits • It may take time to find suitable ways of reducing the overall amount of plastic used by 100,000 tonnes, which is likely to result in higher costs • By reducing the amount of non-recyclable plastic packaging it uses, Unilever is likely to incur higher costs as it uses the more expensive recyclable plastic • Unilever may need to source alternative suppliers to replace the remaining 600,000 tonnes of plastic packaging • This means that Unilever will not maximise profits

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Question number	Answer	Mark

Type MS · Calculating price elasticity of demand (PED)

Answer 2 of 8 · Question 2 part c · 2 marks

2019 JUN · Paper 01 · extract 1 of 5 · find part c in this mark scheme extract

2(a)	**AO1 1 mark** **B** What to produce	**(1)**

Question number	Answer	Mark
2(b)	**AO2 1 mark** **C** Y	**(1)**

Question number	Answer	Mark
2(c)	**AO2 2 marks** Award 1 mark for showing correct calculation. -12 ÷ 15 **(1)** Award 1 mark for correct price elasticity of demand (PED). = -0.8 **(1)** Award 1 mark if students show calculation and put 0.8 without the minus sign Award 2 marks if PED is correctly calculated, even if no calculations are shown Do not award marks for the formula	**(2)**

Question number	Answer	Mark
2(d)	**AO1 1 mark** Award 1 mark for reference to an invention or new idea An idea which leads to a new product/process	**(1)**

Type MS · Calculating price elasticity of demand (PED)

Answer 2 of 8 · Question 2 part c · 2 marks

2019 JUN · Paper 01 · extract 2 of 5 · find part c in this mark scheme extract

Question number	Answer	Mark
2(e)	**AO1 1 mark** Award 1 mark for one correct factor: • a decrease in advertising • a decrease in income • an adverse change in taste and fashion • a decrease in price of substitute goods • an increase in price of complementary goods • a decrease in population Accept any other appropriate response	**(1)**

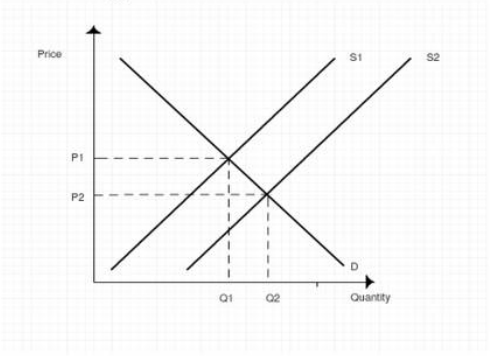

Question number	Answer	Mark
2(f)	**AO1 2 marks** Award 1 mark for reference to the advantage and 1 mark for development of the advantage • The large number of vehicles competing means there is a lot of choice **(1)** therefore it is easier for passengers to hire an auto rickshaw **(1)** Accept any other appropriate response	**(2)**

Question number	Answer	Mark
2(g)	**AO2 3 marks** Award 1 mark for identifying a relevant reason for the difference in price Award 1 mark for developing the reason Award 1 mark for the response being in the context of transport in Dhaka • One reason is that there are likely to be fewer vehicles competing outside the city centre **(1)** because most of the 17 million people live in the city centre **(1)** and so there is less potential business for the drivers **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 2 of 8 · Question 2 part c · 2 marks

2019 JUN · Paper 01 · extract 3 of 5 · find part c in this mark scheme extract

uestion number	Indicative content
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Without the changes in technology, more parking spaces are demanded than supplied and demand is increasing • The introduction of Automated Parking Systems (APS) increases the supply of spaces and so should shift the supply curve to the right • Changes in technology allow the gap between demand and supply to be reduced. • The change in supply will also affect the equilibrium price, making parking cheaper and more available • Thus reducing the shortage of car parking spaces • Possible use of diagram  **AO4** • The increase in the number of vehicles may be faster than the increase in the supply of car parking spaces meaning there is still a shortage • There is already such a large excess in demand that the introduction of APS will not make much difference • It is likely to take time from the initial decision to having the APS in place, meaning the supply curve may not shift straight away • Some motorists do not like change or worry the technology will fail and may be averse to the idea of automated parking, therefore not use the APS

Type MS · Calculating price elasticity of demand (PED)

Question number	Answer	Mark
2(g)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • One reason is that consumers may have habits that are hard to give up **(1).** Products containing sugar can be habit forming **(1)** and so consumers may find it difficult to stop eating sugar even though they know it is bad for their health **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 3 of 8 · Question 2 part c · 2 marks

2020 JAN · Paper 01 (regional R) · extract 4 of 6 · find part c in this mark scheme extract

Question number	Indicative content
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Negative externalities are spillover effects on third parties due to consumption/production • Over-harvesting sea cucumbers can prevent the marine animal from keeping the coral reef ecosystem healthy and so presents negative externalities • One method of government intervention to reduce negative externalities is the use of fines • In an attempt to reduce over-harvesting, the government fined the owner of Orient Seafood Production (OSP) $1.5m for failing to report harvests of 113,400 kg of sea cucumber in a two-year period • This should stop OSP from over-harvesting again in the future • This would act as a deterrent to other firms that may be considering over-harvesting **AO4** • However, it costs money and takes time to police over-harvesting and impose fines on illegal activity • OSP had already harvested 113 400 kg in two years before being fined, this could already have caused a great deal of damage to the coral reef ecosystem • OSP has already made high profits from over-harvesting and so the fine may not be enough of a deterrent • There is a growing demand in China and sales of sea cucumber are profitable so firms may think it is worth risking being caught and being fined • Other methods of government intervention may be more effective

Type MS · Calculating price elasticity of demand (PED)

Answer 4 of 8 · Question 1 part f · 2 marks

2021 JUN · Paper 01 · extract 1 of 5 · find part f in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **D** A given amount of resources being fully employed A is not correct because this cannot be determined on a PPC B is not correct because a PPC cannot show *how* production can increase C is not correct because a PPC does not show government revenue	**(1)**

Question Number	Which **one** of the following describes this economic assumption? Answer	Mark
1(b)	**AO2 1 mark** The only correct answer is: **A** Businesses aim to maximise their profit B is not correct because there is no indication of any charitable work taking place C is not correct because consumer behaviour is not described D is not correct because it is not linked to government actions	**(1)**

Question Number	What is meant by the term economies of scale? Answer	Mark
1(c)	**AO1 2 marks** Award 1 mark for reference to reduced average cost and 1 mark for reference to increased output Average costs of production fall **(1)** as the level of output rises **(1)** Accept any other appropriate response	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 4 of 8 · Question 1 part f · 2 marks

2021 JUN · Paper 01 · extract 2 of 5 · find part f in this mark scheme extract

Question Number	State **one** example of a factor of production that can be classified as land. Answer	Mark
1(d)	**AO1 1 mark** Award 1 mark for correct example • Forest • Rainwater • Coal • Oil Accept any other appropriate response	**(1)**

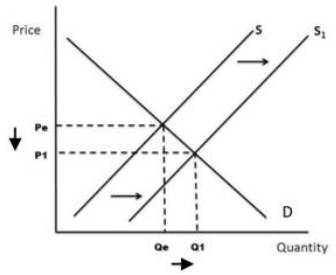

Question Number	Define the term monopoly. Answer	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition One dominant seller in a market Accept any other appropriate response	**(1)**

Question Number	Calculate, to two decimal places, the **price elasticity of demand (PED)** for Alfie's dog-walking service. You are advised to show your working. Answer	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation -1.1/1.5 **(1)** Award 1 mark for correct PED = -0.73 **(1)** Award 2 marks if PED is correctly calculated as -0.73, even if no calculations are shown Do not award marks for a formula	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 4 of 8 · Question 1 part f · 2 marks

2021 JUN · Paper 01 · extract 3 of 5 · find part f in this mark scheme extract

Question Number	Using the diagram below, draw the likely effects on the market for cars of the introduction of more effective technology in production. Label the new curve, the new equilibrium price and the new equilibrium quantity. Answer	Mark
1(g)	**AO2 3 marks** Award 1 mark for rightward shift of supply, labelled Award 1 mark for lower equilibrium price, labelled Award 1 mark for higher equilibrium quantity, labelled 	**(3)**

Question Number	Explain **one** possible effect on the supply of labour of the school-leaving age being raised. Answer	Mark
1(h)	**AO2 3 marks** Award 1 mark for identifying an effect Award 1 mark for developing the response Award 1 mark for the response being in context • One effect would be a decrease in the supply of labour **(1)** because young people would not be able to be employed full-time until they reached the school-leaving age **(1)** which means only people over 18 in England could contribute to the supply of labour **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 4 of 8 · Question 1 part f · 2 marks

2021 JUN · Paper 01 · extract 4 of 5 · find part f in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, analyse why Bupa may have decided to operate in a wider range of markets. Indicative content
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • There are several factors that can affect the growth of firms. One of these is the desire to spread risks • By expanding its product range, Bupa can reduce the risk because it is trading in different markets • This means that if there is a problem in one market (such as health insurance) it has other areas in which it can continue to trade • Therefore the range of services, such as hospital and dental treatment, could help to finance the firm and allow it to continue to be successful, if there are problems in other markets • As Bupa operates in 190 countries, it is likely to encounter uncertainty in the different markets and therefore having a range of services means it is reducing the overall risk to the firm

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Question number	Using the diagram below, draw the likely effects on the market after a popular celebrity was seen wearing trainers. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	Mark
1(g)	**AO2 3 marks** Award 1 mark for rightward shift of demand, labelled Award 1 mark for higher equilibrium price, labelled Award 1 mark for higher equilibrium quantity, labelled  	(3)

Type MS · Calculating price elasticity of demand (PED)

Answer 5 of 8 · Question 1 part f · 2 marks

2023 JAN · Paper 01 · extract 4 of 6 · find part f in this mark scheme extract

Question number	Explain one reason why Spice Cottage may not aim to maximise its profit. **Answer**	**Mark**
1(h)	**AO2 3 marks** Award 1 mark for identifying a reason Award 1 mark for developing the response Award 1 mark for the response being in context • A business may have alternative business objectives, such as survival/growth **(1)** by selling at a lower price, Spice Cottage may not maximise revenue and therefore may not maximise profit either **(1)** the business may therefore attract more consumers due to the lower price, which will help the new firm to survive/grow **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 5 of 8 · Question 1 part f · 2 marks

2023 JAN · Paper 01 · extract 5 of 6 · find part f in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse why this knowledge could be useful to a firm such as Megabus. **Indicative content**
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • These figures allow Megabus to calculate income elasticity of demand • Bus travel has an income elasticity of -15%/10% = -1.5 • The value of income elasticity is negative and therefore an inferior good • An inferior good is a product or service which has a decrease in quantity demand as incomes increase and increase in quantity demanded as incomes decrease (they have an inverse relationship) • Bus travel is income elastic because the percentage decrease in quantity demanded is greater than the percentage increase in income • This means that if passengers' incomes increase the demand for bus travel will fall but if incomes fall the demand for bus travel will rise • Awareness of this may allow Megabus to reduce/increase the services it offers in Canada, the US or the UK, depending on where incomes change • This could help to reduce costs if there is less demand for bus services • This can also help Megabus to plan employee requirements so it does not incur higher wage costs than necessary

Question Number	Which one of the following options is the type of market shown in Figure 2? **Answer**	Mark

Type MS · Calculating price elasticity of demand (PED)

Answer 6 of 8 · Question 2 part d · 2 marks

2023 JUN · Paper 01 (regional R) · extract 1 of 6 · find part d in this mark scheme extract

2(a)	**AO1 1 mark** The only correct answer is: **C** $\frac{\text{Percentage change in quantity supplied}}{\text{Percentage change in price}}$ A is not correct because this is the formula for PED B is not correct because this does not relate to PES D is not correct because this formula is not used in economics	**(1)**

Question number	A court in China ordered a firm to pay 10 000 Yuan because it polluted a local river. This is an example of which **one** of the following? **Answer**	**Mark**
2(b)	**AO2 1 mark** The only correct answer is: **A** A fine B is not correct because this would give a firm permission to do something C is not correct because this would encourage production due to reducing cost D is not correct because this is added to production costs or sale price	**(1)**

Question number	State **one** example of an external benefit. **Answer**	**Mark**
2(c)	**AO1 1 mark** Award 1 mark for an example of an external benefit • Education • Healthcare • Vaccinations Accept any other appropriate response	**(1)**

Type MS · Calculating price elasticity of demand (PED)

Answer 6 of 8 · Question 2 part d · 2 marks

2023 JUN · Paper 01 (regional R) · extract 2 of 6 · find part d in this mark scheme extract

	Calculate, to two decimal places, the **price elasticity of demand (PED)** for Sathvinder's cleaning service. You are advised to show your working. **Answer**	**Mark**
2(d)	**AO2 2 marks** Award 1 mark for showing correct calculation 1.9%/-1.2% **(1)** Award 1 mark for correct PED = -1.58 **(1)** Award 2 marks if PED is correctly calculated as -1.58, even if no calculations are shown Do not award marks for a formula	**(2)**

Question number	Define the term entrepreneur. **Answer**	**Mark**
2(e)	**AO1 1 mark** Award 1 mark for a correct definition An individual who organises the factors of production Accept any other appropriate response	**(1)**

Question number	Describe **one** reason why water is a factor of production. **Answer**	**Mark**
2(f)	**AO1 2 marks** Award 1 mark for reference to the reason and 1 mark for development of the reason Water is a natural resource that can be used by firms in production **(1)** therefore water is classed as land **(1)** Accept any other appropriate response.	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 6 of 8 · Question 2 part d · 2 marks

2023 JUN · Paper 01 (regional R) · extract 3 of 6 · find part d in this mark scheme extract

Question number	Explain **one** effect on the supply of rice following a change in its equilibrium price. **Answer**	**Mark**
2(g)	**AO2 3 marks** Award 1 mark for identifying a relevant effect Award 1 mark for developing the effect Award 1 mark for the response being in context • A price increase would increase the quantity supplied **(1)**. An increase from $2.20 to $2.30 results in a higher quantity **(1)** because producers would increase profits **(1)** • A price decrease would decrease the quantity supplied **(1)**. A decrease by $0.10 results in a lower quantity **(1)** leading to a movement along the supply curve **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 6 of 8 · Question 2 part d · 2 marks

2023 JUN · Paper 01 (regional R) · extract 4 of 6 · find part d in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the benefits of the public sector providing outdoor areas or parks. **Indicative content**
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The public sector is a part of the economy which is owned by the government and which operates in the public interest • It places dependence on the state for production of goods and services and places a high degree of importance on the state controlling this production • The state plays a key role in the provision of key public services such as; education, healthcare, social care and infrastructure • Amongst the aims of this sector are reducing social costs and increasing social benefits • If the public sector is responsible for the creation and maintenance of outdoor areas or parks, the space would be available to everyone, providing a social benefit • This could improve the health of anyone who uses these areas, meaning that there is less need for healthcare and so less public spending would be required in this area, reducing social costs **AO4** • If the public sector uses its finances to create/maintain parks it means less government revenue would be available for other things such as health and education • There is a cost in creating and maintaining the parks which must be funded by the government • The opportunity cost of providing more land for parks is the potential loss of housing and infrastructure • If parks provided by the government become too busy to be enjoyed or to provide suitable opportunities for people's health to benefit, it may be necessary for private sector funding to help provide outdoor areas or parks • This is likely to involve charging for access which would restrict availability for all and associated health benefits

Type MS · Calculating price elasticity of demand (PED)

Answer 6 of 8 · Question 2 part d · 2 marks

2023 JUN · Paper 01 (regional R) · extract 5 of 6 · find part d in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Type MS · Calculating price elasticity of demand (PED)

Answer 6 of 8 · Question 2 part d · 2 marks

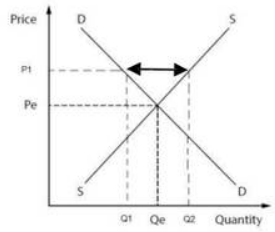

2023 JUN · Paper 01 (regional R) · extract 6 of 6 · find part d in this mark scheme extract

Question number	A minimum wage is a type of Answer	Mark

Type MS · Calculating price elasticity of demand (PED)

Answer 7 of 8 · Question 2 part c · 2 marks

2024 JUN · Paper 01 · extract 1 of 6 · find part c in this mark scheme extract

2(a)	**AO2 1 mark** The only correct answer is:  **C** A is not correct because this shows excess demand B is not correct because this shows an increase in supply D is not correct because this shows a movement along the supply curve	**(1)**

Question number	Which **one** of the following is a feature of a monopoly? **Answer**	**Mark**
2(b)	**AO1 1 mark** The only correct answer is: **C** The firm is a price-maker A is not correct because there is only one firm B is not correct because there would only be one firm in a monopoly D is not correct because barriers to entry would be high in a monopoly	**(1)**

Type MS · Calculating price elasticity of demand (PED)

Answer 7 of 8 · Question 2 part c · 2 marks

2024 JUN · Paper 01 · extract 2 of 6 · find part c in this mark scheme extract

Question number	Calculate the **percentage change in quantity demanded** for a product if the price elasticity of demand (PED) is -1.9 and the price falls by 10%. You are advised to show your working. **Answer**	Mark
2(c)	**AO2 2 marks** Award 1 mark for showing the correct calculation -10% x -1.9 **(1)** Award 1 mark for correct change in quantity demanded = 19% **(1)** Award 2 marks if the change in quantity demanded is correctly calculated as 19%, even if no calculations are shown Award 1 mark if the change in quantity demanded is calculated as 19, even if no calculations are shown Do not award marks for a formula	**(2)**

Question number	What is meant by the term social benefits? **Answer**	Mark
2(d)	**AO1 1 mark** Award up to 2 marks for a correct definition Private benefits **(1)** plus external benefits **(1)** Accept any other appropriate response	**(2)**

Question number	Describe **one** feature of an oligopoly. **Answer**	Mark
2(e)	**AO1 2 marks** Award 1 mark for reference to the feature and 1 mark for development of the feature Barriers to entry **(1)** therefore fewer firms can enter the market **(1)** OR Different products **(1)** to stand apart from competitors **(1)** Accept any other appropriate response	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 7 of 8 · Question 2 part c · 2 marks

2024 JUN · Paper 01 · extract 3 of 6 · find part c in this mark scheme extract

Question number	Explain **one** reason why Mostafa may want to offer this discount rather than to maximise profit. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • Managers may have the objective of maximising sales **(1)**. Selling at a 10% discount means lower revenue per sale, so the shop may not maximise profit **(1),** but it may result in higher/more sales due to the lower price **(1)** • Managers may have different objectives to owners **(1)** Mostafa may want to maximise sales because it affects his salary **(1)**. The more he sells the higher his salary will be **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 7 of 8 · Question 2 part c · 2 marks

2024 JUN · Paper 01 · extract 4 of 6 · find part c in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the effectiveness of government regulation when dealing with externalities such as pollution. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Negative externalities are spillover effects on third parties due to consumption/production • Pollution is an example of a negative externality because its effects are felt by those not producing or using the plastic bags • One method of government intervention to reduce negative externalities is the use of regulation • Regulation, such as the ban on single-use plastic bags, will limit the amount of pollution produced and reduce the externalities due to penalties if it is not followed • The ban in Kenya has led to a cleaner environment as the reduced consumption means the visual pollution and danger to livestock is less of a problem • Therefore, the regulation has been quite effective in reducing the negative externality **AO4** • However, the regulation has not solved the problem of pollution in Kenya • It costs money and takes time to monitor any illegal activity, causing an opportunity cost • The effectiveness of the regulation depends on the level of enforcement by the government and cooperation from the public • There are likely to be other problems, aside from plastic bags causing pollution in Kenya, which may need to be addressed by other methods than regulation • Other methods of government intervention may be more effective, such as fines or taxation

Type MS · Calculating price elasticity of demand (PED)

Question number	An increase in which **one** of the following is most likely to cause a decrease in the supply of labour? **Answer**	**Mark**

Type MS · Calculating price elasticity of demand (PED)

Answer 8 of 8 · Question 1 part f · 2 marks

2025 JUN · Paper 01 (regional R) · extract 1 of 5 · find part f in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **D** Production which is obtainable A is not correct because this cannot be determined on a PPC B is not correct because a PPC cannot show how production can be increased C is not correct because a PPC does not show revenue	**(1)**

Question number	Which **one** of the following describes why the firm might do this? **Answer**	**Mark**
1(b)	**AO2 1 mark** The only correct answer is: **B** Producers may complete charitable work A is not correct because producers would not make a profit C is not correct because it is not linked to consumer actions D is not correct because consumer behaviour is not described	**(1)**

Question number	What is meant by the term economies of scale? **Answer**	**Mark**
1(c)	**AO1 2 marks** Award up to 2 marks for a correct definition Average costs of production fall **(1)** as the firm increases in size **(1)** Accept any other appropriate response	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 8 of 8 · Question 1 part f · 2 marks

2025 JUN · Paper 01 (regional R) · extract 2 of 5 · find part f in this mark scheme extract

Question number	State **one** example of an item that can be classified as capital. **Answer**	Mark
1(d)	**AO1 1 mark** Award 1 mark for a correct example • Machines • Computers • Factories • Vehicles Accept any other appropriate response	**(1)**

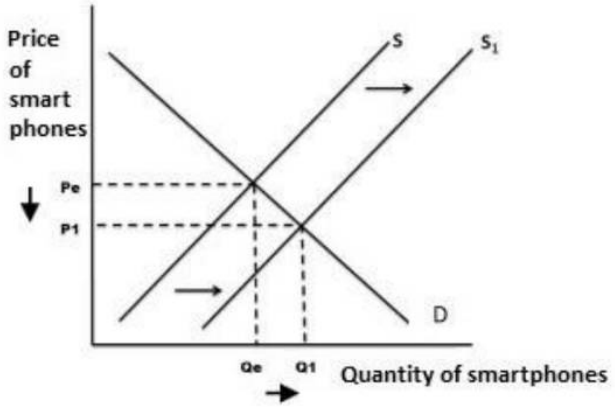

Question number	Define the term price-maker. **Answer**	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition A firm is able to set the price charged in the whole market Accept any other appropriate response	**(1)**

Question number	Calculate, to two decimal places, the **price elasticity of demand (PED)** for a good if the price decreases by 4.7% and the quantity demanded increases by 1.8%. You are advised to show your working. **Answer**	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation 1.8%/-4.7% **(1)** Award 1 mark for correct PED = -0.38 **(1)** Award 2 marks if PED is correctly calculated as -0.38 even if no calculations are shown Award 1 mark if PED is calculated as -0.38% with or without calculations shown Do not award marks for the formula	**(2)**

Type MS · Calculating price elasticity of demand (PED)

Answer 8 of 8 · Question 1 part f · 2 marks

2025 JUN · Paper 01 (regional R) · extract 3 of 5 · find part f in this mark scheme extract

Question number	Using the diagram below, draw the likely effect on the market for smartphones following an increase in productivity. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	**Mark**
1(g)	**AO2 3 marks** Award 1 mark for a rightward shift of the supply curve, labelled Award 1 mark for a lower equilibrium price, labelled Award 1 mark for higher equilibrium quantity, labelled  	**(3)**

Question number	Explain **one** possible effect of this change in the pension age on the supply of labour. **Answer**	**Mark**
1(h)	**AO2 3 marks** Award 1 mark for identifying a relevant effect Award 1 mark for developing the effect Award 1 mark for the response being in context • One effect would be an increase in the supply of labour **(1)** because fewer people would be able to afford to retire until they reached the retirement age **(1)** meaning more people up to the age of 64 would be available for work **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating price elasticity of demand (PED)

Answer 8 of 8 · Question 1 part f · 2 marks

2025 JUN · Paper 01 (regional R) · extract 4 of 5 · find part f in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse the impact of an increase in price on the quantity supplied of avocados. **Indicative content**
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • The diagram shows that the PES of avocados is inelastic • This means that the quantity of avocados supplied is not very responsive to an increase in price • The PES of avocados is inelastic because farmers cannot easily increase the production level even with an increase in price • Avocados take time to grow and are primary/agricultural products. The supply is dependent on factors such as weather/climate. It cannot therefore be easily increased, even if there is an increase in the price consumers are willing and able to pay • It is also not possible to store avocados for a long period because they are perishable and therefore stock cannot be used to increase the quantity of supply, this also makes the PES of avocados inelastic

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).
