Type MS · Calculating income elasticity of demand (YED)

Answer 1 of 5 · Question 1 part f · 2 marks

2024 JUN · Paper 01 · extract 1 of 5 · find part f in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **D** Infinity A is not correct because this is unitary elasticity B is not correct because demand is price inelastic C is not correct because this is perfectly price inelastic demand	**(1)**

Question number	A country has a minimum wage of €6.04 per hour. If a worker provides 35 hours of labour in a week, the lowest weekly wage the worker can earn is **Answer**	**Mark**
1(b)	**AO2 1 mark** The only correct answer is: **C** €211.40 A is not correct because this is only one hour of labour B is not correct because this is less than the minimum wage for a 35-hour week D is not correct because this is not the lowest amount that can be earned	**(1)**

Question number	What is meant by the term mixed economy? **Answer**	**Mark**
1(c)	**AO1 2 marks** Award up to 2 marks for a correct definition The state/public and private sectors **(1)** provide goods/services between them **(1)** Accept any other appropriate response	**(2)**

Type MS · Calculating income elasticity of demand (YED)

Answer 1 of 5 · Question 1 part f · 2 marks

2024 JUN · Paper 01 · extract 2 of 5 · find part f in this mark scheme extract

Question number	State **one** example of an occupation that is in the tertiary sector of an economy. **Answer**	Mark
1(d)	**AO1 1 mark** Award 1 mark for a correct example • Teacher/Retailer/Banker Accept any other appropriate response	**(1)**

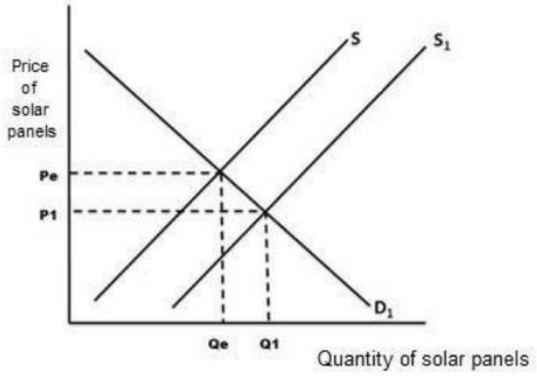

Question number	Define the term producer. **Answer**	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition A person/company/country that makes/creates goods/services Accept any other appropriate response	**(1)**

Question number	Calculate, to two decimal places, the **income elasticity of demand (YED)** for a good if income increases by 7% and quantity demanded increases by 11%. You are advised to show your working. **Answer**	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation 11% ÷ 7% **(1)** Award 1 mark for correct income elasticity of demand (YED) = 1.57 **(1)** Award 2 marks if YED is correctly calculated as 1.57, even if no calculations are shown Do not award marks for the formula	**(2)**

Type MS · Calculating income elasticity of demand (YED)

Answer 1 of 5 · Question 1 part f · 2 marks

2024 JUN · Paper 01 · extract 3 of 5 · find part f in this mark scheme extract

Question number	Using the diagram below, draw the likely effects on the market for solar panels if the government removes an indirect tax on them. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	**Mark**
1(g)	**AO2 3 marks** Award 1 mark for a rightward shift of supply, labelled Award 1 mark for a lower equilibrium price, labelled Award 1 mark for a higher equilibrium quantity, labelled 	**(3)**

Question number	Explain one possible opportunity cost for Casper of this decision. **Answer**	**Mark**
1(h)	**AO2 3 marks** Award 1 mark for identifying a relevant opportunity cost Award 1 mark for developing the opportunity cost Award 1 mark for the response being in context • One opportunity cost is Casper may not be able to buy a new phone **(1)** because he does not have enough money for both **(1)** so he has to sacrifice the next best alternative when using the money he has to buy the television **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating income elasticity of demand (YED)

Answer 1 of 5 · Question 1 part f · 2 marks

2024 JUN · Paper 01 · extract 4 of 5 · find part f in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse **two** possible factors influencing Anastasia's decision to open a second club. **Indicative content**
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Factors influencing the growth of firms include the desire to spread risk, to take over competitors, access to finance, economies of scale and government regulation • The martial arts club has been successful for a few years, meaning Anastasia may have access to finance • Therefore, she may have enough finance with which to open a second club in another district of Budapest • Although the club is successful in District 16, Anastasia may wish to spread the risk • In case demand changes at her existing club the revenue from the second club is able to support the running of the firm

2020 JAN · Paper 01 (regional R) · extract 3 of 5 · find part f in this mark scheme extract

Question number	Answer	Mark
1(h)	**AO2 3 marks** Award 1 mark for identifying a relevant opportunity cost Award 1 mark for developing the opportunity cost Award 1 mark for the response being in context • One opportunity cost is the firm may not be able to employ additional staff **(1)** it cannot buy the computer system and employ additional staff **(1)** because it does not have enough resources/money to fund both **(1)** Accept any other appropriate response.	**(3)**

Type MS · Calculating income elasticity of demand (YED)

Answer 2 of 5 · Question 1 part f · 2 marks

2020 JAN · Paper 01 (regional R) · extract 4 of 5 · find part f in this mark scheme extract

Question number	Indicative content
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • An oligopoly is a market that is dominated by a few large producers • 87% of Dubai's shopping malls are owned by just five firms, meaning that the market is dominated by a few large producers • The shopping malls are differentiated by a variety of features such as an indoor ski slope and an indoor aquarium. Differentiation is a feature of an oligopoly • By offering something different the shopping malls are able to use non price competition to attract a share of the tourism sector that visits one of the busiest shopping destinations in the world • Sales are predicted to reach $71bn by 2021 making the owners of the shopping malls very dominant. This would create a barrier to entry, another feature of an oligopoly

Question number	Explain one disadvantage of this type of market structure for UK consumers. **Answer**	**Mark**
2(f)	**AO2 3 marks** Award 1 mark for identifying a relevant disadvantage Award 1 mark for developing the response Award 1 mark for the response being in context • Firms in an oligopoly may collude with one another **(1)** Therefore, the supermarkets may fix prices for groceries **(1)** meaning consumers would have to pay higher prices **(1)** Accept any other appropriate response	**(3)**

Type MS · Calculating income elasticity of demand (YED)

Answer 4 of 5 · Question 2 part a · 1 mark

2023 JAN · Paper 01 (regional R) · extract 4 of 6 · find part a in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the benefits for Foxconn Technology of using division of labour. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Division of labour involves breaking down the production process into smaller tasks • Each worker specialises in only one task, such as handling the phone screen, checking the phone works and packaging the phone ready to ship to the customer • By specialising, efficiency is improved because workers can conduct tasks quicker and with more accuracy • This leads to an increase in productivity and lower costs of production for Foxconn Technology • Workers do not need to waste time moving between tasks and so greater efficiencies are created, again lowering production costs **AO4** • However, tasks such as checking the iPhone works is likely to be repetitive and could be very boring for the worker, meaning they may become poorly motivated • Therefore, mistakes may be made leading to the need for part of the production process to be repeated, reducing productivity • This could therefore increase the cost of production and reduce the profit made by Foxconn Technology • Problems may occur if one part of the production process fails. For example, if a broken phone screen is found, the phone cannot progress to the stage where it is packed to ship to the customer • This may be more likely due to the number of tasks that production is divided into with 270,000 workers • Specialisation may cause problems if a worker is absent and no one is able to take their place due to a lack of the specialist skill

Type MS · Calculating income elasticity of demand (YED)

Answer 4 of 5 · Question 2 part a · 1 mark

2023 JAN · Paper 01 (regional R) · extract 5 of 6 · find part a in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).
