| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| **Level 1** | 1–2 | • Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2).<br>• Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). |
| **Level 2** | 3–4 | • Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2).<br>• Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). |
| **Level 3** | 5–6 | • Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2).<br>• Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). |

### Answer 1 of 2 · Question 4 part a · 2 marks

2021 NOV · Paper 02 · extract 3 of 4 · find part a in this mark scheme extract

| Question Number | **Indicative content** |
|---|---|
| **4(c)** | **AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)**<br><br>**AO2 and AO3**<br><br>• FDI is the value of inward investment from other countries/firms into a country<br>• FDI can bring in capital investment to India as MNCs will need buildings, equipment and infrastructure to operate within the country<br>• Jobs are created by MNCs such as firms operating in the chemical and automobile industries which reduces unemployment and increases disposable income<br>• There may be increased demand for the products or services of local Indian firms that supply MNCs<br>• MNCs may train up the local workforce who may acquire useful skills in car production factories. MNCs often bring new technologies, techniques and methods<br>• Increased employment and wages should lead to increased tax and government revenue<br>• Exports may increase therefore improving the balance of payments<br><br>**AO4**<br>• However, wages offered by foreign MNCs can often be low and working conditions may be poor<br>• Some MNCs may not train local workers to a high level and instead bring in their own management rather than employ local workers<br>• MNCs may take market share away from local firms causing domestic industries to go into decline<br>• Some MNCs can cause great damage to the environment, particularly chemical or construction industries by their processes causing negative externalities due to a lack of regulation<br>• Profits are often sent home and taxation can be reduced or avoided therefore reducing revenue for the Indian Government<br>• Some MNCs may stay a short time in India and often move from one country to the next, taking whatever incentives are on offer<br>• The overall benefits will depend upon how foreign MNCs behave in the economy |

## Type MS · Finding the average (mean) of data

| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| **Level 1** | 1–4 | • Demonstrates isolated elements of relevant knowledge and understanding; may lack development of relevant points. Limited application of economic terms, concepts, theories and calculations (AO2).<br>• Information presented will lack selectivity and organisation. Chain of reasoning may be attempted. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).<br>• Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness. A judgement or conclusion is unlikely to be attempted (AO4). |
| **Level 2** | 5–8 | • Demonstrates partial selectivity and some accurate knowledge and understanding by developing some relevant points. Partial application of economic terms, concepts, theories and calculations (AO2).<br>• Information presented will demonstrate some selectivity and organisation. Chain of reasoning will be present but may be limited. Interpretation of economic information will be good, with some analysis of issues (AO3).<br>• Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness. A judgement or conclusion is attempted, but may not be fully supported (AO4). |
| **Level 3** | 9–12 | • Demonstrates specific and accurate knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2).<br>• Information presented will demonstrate excellent selectivity and organisation. Chain of reasoning will be coherent and logical. Interpretation of economic information will be excellent with a thorough analysis of issues (AO3).<br>• Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness. A supported judgement or conclusion is present (AO4). |
