2025 JUN · Paper 02 (regional R) · extract 3 of 6 · find part e in this mark scheme extract

Question Number	Using the diagram below, draw the effects of the introduction of the tariff on the equilibrium price and quantity of coal in China. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	Mark
1(f)	**AO2 3 marks** Award 1 mark for a leftward shift of the supply curve, labelled Award 1 mark for a higher equilibrium price, labelled Award 1 mark for a lower equilibrium quantity, labelled  	**(3)**

Type MS · Converting currencies with an exchange rate

Answer 1 of 9 · Question 1 part e · 2 marks

2025 JUN · Paper 02 (regional R) · extract 4 of 6 · find part e in this mark scheme extract

Question Number	Explain **one** possible benefit of using pollution permits to protect the environment for a country such as the UK. **Answer**	Mark
1(g)	**AO2 3 marks** Award 1 mark for identifying a relevant benefit Award 1 mark for developing the benefit Award 1 mark for the response being in context • One benefit is that the health of UK citizens will be improved **(1).** Fewer available permits make airlines find ways to adopt cleaner technologies/improve efficiency. **(1)** This will help to reduce air pollution **(1)** • One benefit is that air pollution will decrease **(1).** This is because airlines are limited in how much they can pollute **(1)** so they must reduce their emissions to stay within limits **(1)** Accept any other appropriate response	**(3)**

Question Number	With reference to the data above and your knowledge of economics, analyse the benefits of using GDP as a measure of economic growth for a country such as India. **Indicative content**	Mark
1(h)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • GDP helps to understand the size and overall economic health of India • This makes it easier to assess how well the Indian economy is doing and whether it is growing or shrinking • India's GDP growth rate of 7.2% in 2023 allows for easy comparison with other major economies, showing its position and progress on a global scale • The GDP growth figures, of 7.2% in 2023 and forecasted 6.9% in 2024, help the government assess the effectiveness of its economic policies • Rising GDP signals more income/output, helping the Indian government plan for infrastructure, health or education spending • Generally, if India's GDP is increasing, it means people might be earning more and living standards could be improving	**(6)**

Question Number	With reference to the data above and your knowledge of economics, assess the possible benefits of low unemployment rates on tax revenues for a country such as Australia. **Indicative content**	Mark
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Unemployment rate is a measure of the percentage of the total labour force that is currently unemployed and actively seeking employment • Figure 4 shows that the rate of unemployment has steadily fallen from a high of 4.2% in January to 3.4% in November 2022 • If Australia's employment increases by 64,000, tax revenue from newly employed workers could increase • More indirect taxes such as VAT will be collected because additional people will be spending money in the economy • This could be used by the Australian Government in the economy to improve standards of living • Higher tax revenues will make it easier for the Australian Government to finance spending on other projects such as public services • The Australian Government has more flexibility to lower taxes elsewhere if more people are employed and tax revenue from income rises **AO4** • However, low unemployment might not result in higher tax revenue for the Australian Government • If many of the workers are employed in low-wage jobs, they may not contribute as much in tax revenue • If there is a significant informal economy or tax evasion, tax revenue might be lost • If tax rates are too low or there are too many tax exemptions, tax revenue may not increase as much as expected • The Australian economy could see an increase in cost-push inflation as firms compete for the same workers by offering higher wages due to labour /lack of immigration • Inflation could reduce tax revenues by reducing consumer spending • The overall impact will depend on how long unemployment remains low	**(9)**

Answer 6 of 9 · Question 3 part a · 1 mark

2023 NOV · Paper 02 · extract 5 of 6 · find part a in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Answer 7 of 9 · Question 4 part a · 2 marks

2024 JUN · Paper 02 (regional R) · extract 1 of 5 · find part a in this mark scheme extract

4(a)	**AO2 2 marks** Award 2 marks for calculating the price in £ sterling $\frac{1600}{672}$ **(1)** = £2.38 **(1)** Award 2 marks if the park entry fee is accurately calculated as £2.38 even if no calculations are shown Award 1 mark if £ is missing i.e. 2.38 with or without calculations shown Do not award marks for the formula	**(2)**

Question Number	With reference to the data above and your knowledge of economics, analyse how the trade patterns may differ between a developed and a developing country. **Indicative content**	Mark
4(b)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Developed countries, such as the UK, tend to have more diversified economies with a higher share of manufacturing and services sectors in their GDP • This allows developed countries to produce a wide range of goods and services making them less dependent on a few primary products for their exports • Developed countries such as the UK have exhausted many raw materials and moved away from agriculture so need to import these commodities • In contrast, developing countries such as Costa Rica may have a narrower range of products to offer with a higher share of agricultural exports • Costa Rica relies heavily on agricultural exports such as fruit and vegetables accounting for 73.4% of exports to the UK • The patterns of trade are different for developed and developing economies due to the different sizes of the primary, secondary and tertiary sectors	**(6)**

Question Number	With reference to the data above and your knowledge of economics, evaluate the possible advantages of the government providing national parks to protect the environment in a country such as Costa Rica. **Indicative content**	Mark
4(c)	**AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)** **AO2 and AO3** • Parks can provide a range of environmental benefits such as protecting and preserving biodiversity • Parks can contribute to long-term economic sustainability by protecting natural resources and ecosystem services • The conservation of natural resources through parks can also support other economic activities such as fishing and timber harvesting by ensuring the sustainability of these resources over the long term • The creation and maintenance of parks can generate economic benefits such as employment opportunities and revenue from tourism • The establishment of protected areas can help lessen the economic costs associated with environmental degradation • Parks and natural spaces can contribute to improvements in public health by providing opportunities for exercise and recreation which can reduce healthcare costs and absenteeism from work due to illness • Parks and protected areas can contribute to a sense of national identity and pride which can help to attract international visitors and promote trade and investment **AO4** • However, the costs of creating and maintaining parks can be high and may require significant public funding • The creation of parks may require the displacement of local communities or restrictions on traditional land use practices • Ecotourism can lead to overcrowding and environmental degradation if not properly managed • Protected areas can limit opportunities for economic development particularly in sectors such as mining, logging and agriculture • This can be a source of conflict between conservationists and those who see protected areas as a hindrance to economic growth • There are alternative methods which the Costa Rican Government could use such as taxation and pollution permits which might be more effective in protecting the environment	**(12)**

2024 JUN · Paper 02 · extract 4 of 6 · find part b in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess how a recession may affect inflation in a country such as Germany. **Indicative content**	Mark
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • A recession is two consecutive quarters of negative growth • During a recession households and firms tend to reduce their spending which results in lower demand for goods and services • This decrease in (aggregate) demand can lead to lower prices for goods and services • This could help to reduce Germany's 10.4% rate of inflation • Firms in Germany may experience lower production costs due to lower input prices such as lower wages or lower prices for raw materials • This can result in lower prices for goods and services and again help to lower inflation **AO4** • However, the effects of a recession on inflation may depend on the type of inflation Germany is suffering • Inflation can be caused by cost-push factors rather than demand-pull factors • Germany has been suffering from an energy crisis due to high gas and oil prices • This could feed through to higher production costs for firms resulting in higher prices and therefore high rates of inflation • The central bank may pursue an expansionary monetary policy during a recession by keeping interest rates low • This can lead to higher inflation even if economic growth is weak	**(9)**

Question Number	With reference to the data above and your knowledge of economics, analyse why an improvement in the quality of UK goods may result in a positive impact on the UK's current account. **Indicative content**
4(b)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • UK firms exporting to France must prioritise delivering high-quality goods to stand out in a very competitive market where consumers have many luxury options • An improvement in the quality of UK goods enhances their competitiveness in the French market • This could result in increased exports as French consumers opt for superior UK products over others • Increased exports of higher-quality UK goods to France can contribute to a positive impact on the UK's current account by boosting export revenues and potentially narrowing the trade deficit • Improvements in quality can lead to higher prices for UK goods in France, increasing the value of exports and further positively impacting the UK's trade balance and current account position

2025 NOV · Paper 02 · extract 4 of 5 · find part a in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, evaluate the possible economic benefits of increasing government expenditure on healthcare for a country such as the UK. **Indicative content**
4(c)	**AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)** **AO2 and AO3** • Increased healthcare spending injects money directly into the economy creating demand for medical services, pharmaceuticals and healthcare-related goods. This boost in demand can lead to increased economic activity • This increase in job creation not only tackles the challenge of understaffing in hospitals but also contributes to lowering unemployment rates across the economy • Allocating more resources to the UK's struggling healthcare system may result in lower waiting times • This allows people to engage more actively in the workforce/get back to work more quickly • Healthy people are better equipped to learn, work and contribute to economic growth • By ensuring timely medical treatment and reducing absenteeism due to illness, an increase in healthcare spending can lead to increased productivity, benefiting the economy as a whole **AO4** • Increased expenditure on healthcare may lead to fiscal deficits if not matched with sufficient revenue or could divert funds from other essential sectors like education • To fund the increased healthcare expenditure the government might need to borrow or increase direct and indirect taxes as health services in the UK are funded out of taxation • Higher taxes can reduce the amount of money people have to spend on goods and services, leading to lower consumer spending and slow down economic growth • It can create an overreliance on the UK Government for healthcare discouraging investment in private healthcare alternatives and reduce individual responsibility for personal health decisions • The overall long term economic benefits will depend on how effective the additional expenditure is used within the healthcare system
