Practice workbook · Price elasticity of supply: meaning, values and causes

What PES measures and its formula, classifying PES values, the determinants (factors of production, stocks, spare capacity, time), and why primary products tend to be less supply-elastic than manufactured goods.

12 question parts: 1 worked-example retry and 11 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

1. Question 3 · part e · 9 marks

2024 JUN · Paper 01

Worked-example retry · Attempt part e only.

3 (a) An increase in which **one** of the following is most likely to cause a decrease in the supply of labour?

(1)

- ☒ **A** The retirement age
- ☒ **B** The school-leaving age
- ☒ **C** The population
- ☒ **D** The demand for the final product

(b) Which **one** of the following is the formula to calculate total revenue?

(1)

- ☒ **A** Quantity sold × price
- ☒ **B** Profit – price
- ☒ **C** Profit ÷ price
- ☒ **D** Quantity sold ÷ price

(c) Using the diagram below, draw a price elastic demand (PED) curve. Label the curve and show the impact on both axes from a change in price.

(3)

More than one million drinks are bottled each day at the Coca-Cola factory in Mwanza, Tanzania. Over 1,000 workers are involved in the process at its 65,000 m^2 site, which includes filling bottles, sealing them with caps and adding labels. This enables consumers across East Africa to enjoy brands such as Coca-Cola, Fanta and Sprite.

(d) With reference to the data above and your knowledge of economics, analyse the possible advantages for Coca-Cola of using division of labour at the factory.

Many firms in Bangladesh produce textiles. In the factories, cotton shirts, knitwear and suits are produced. These factories are often operating below capacity.

About 40% of the Bangladeshi population is employed in the agricultural sector. Crops such as wheat, corn and fruit are produced annually by this sector.

(e) With reference to the data above and your knowledge of economics, assess whether supply is likely to be more price elastic for textiles than for agricultural products.

(1)

(e) Define the term substitute good.

(1)

Small but successful

Robert has been running a small business from a workshop in his own house for nine years. He has been carving door signs and gifts out of locally sourced wood. Rather than producing identical, standard items, he decided to only make products to meet the personal requirements of his customers. Each order is made specifically for them and reviews are very positive. Robert's success is due to a growing trend across the country as consumers increasingly prefer to buy locally sourced products.

(f) Calculate the price elasticity of supply for Robert's wooden door signs when the price increases by 5.2% and quantity supplied increases by 3.9%. You are advised to show your working.

During the last six years, the government budget of Slovenia has raised almost €1bn in revenue from the privatisation of public sector assets. Most recently was the sale of 65% of the government shares in NLB Bank. The money raised from the sales was mostly transferred to the government budget and used for various purposes. These included the repayment of public sector debt and the long-term stability of the Slovenian pension system.

(Source adapted from: https://www.total-slovenia-news.com/business/2564-privatisation-in-slovenia-has-raised-almost-1bn-since-2012)

(d) With reference to the data above and your knowledge of economics, analyse the possible benefits of privatisation for the Slovenian Government.

Monthly Spanish minimum wage increases

In 2019, the monthly minimum wage in Spain increased by the largest percentage in over 40 years. It rose by around 22% compared to only a 4% rise the previous year. It was part of an annual review with a focus on 'making Spain great again'. The Spanish Prime Minister said that, 'A rich country should not have poor workers'.

Figure 7

(c) With reference to the data above and your knowledge of economics, evaluate whether an increase in the minimum wage would benefit an economy such as Spain.
