Answer 1 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 (regional R) · extract 1 of 6 · find part d in this mark scheme extract

2(a)	**AO2 1 mark** The only correct answer is: **A**  B is not correct because this shows a movement along the demand curve C is not correct because this shows excess supply D is not correct because this shows a decrease in demand	**(1)**

Question number	Which **one** of the following is a feature of an oligopoly? **Answer**	**Mark**
2(b)	**AO1 1 mark** The only correct answer is: **C** Different products are sold A is not correct because there are a few large firms in the market B is not correct because firms often collude D is not correct because there are some barriers to entry	**(1)**

Type MS · Social costs and social benefits formulas

Answer 1 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 (regional R) · extract 2 of 6 · find part d in this mark scheme extract

Question number	Calculate the **percentage change in quantity supplied** for a product if the price elasticity of supply (PES) is 1.5 and the price increases by 12%. You are advised to show your working. **Answer**	**Mark**
2(c)	**AO2 2 marks** Award 1 mark for showing the correct calculation 1.5 x 12% **(1)** **OR** $\frac{X\ \%}{12\% = 1.5}$ **(1)** Award 1 mark for correct change in quantity supplied = 18% **(1)** Award 2 marks if the percentage change in quantity supplied is correctly calculated as 18%, even if no calculations are shown Award 1 mark if the percentage change in quantity supplied is calculated as 18, even if no calculations are shown Do not award marks for a formula	**(2)**

Question number	What is meant by the term social costs? **Answer**	**Mark**
2(d)	**AO1 1 mark** Award up to 2 marks for correct definition Private costs **(1)** plus external costs **(1)** Accept any other appropriate response	**(2)**

Type MS · Social costs and social benefits formulas

Answer 1 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 (regional R) · extract 3 of 6 · find part d in this mark scheme extract

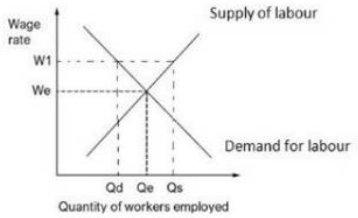

Question number	Describe **one** reason why innovation may be more likely to occur in a monopoly. **Answer**	Mark
2(e)	**AO1 2 marks** Award 1 mark for reference to the feature and 1 mark for development of the feature Monopoly may be a price-maker **(1)** allowing higher profits which can be used to develop new products/services **(1)** Accept any other appropriate response	**(2)**

Question number	Explain **one** reason why Sajad may decide to expand his business. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • Economies of scale may be gained **(1)** due to spreading marketing costs across the business **(1)** because Sajad could advertise both shops for the same cost as just one **(1)** • The desire to spread risk **(1)** may mean Sajad is more confident of maintaining a successful business **(1)** because even if sales decrease at one shop, he has the other to fall back on **(1)** Accept any other appropriate response	**(3)**

Type MS · Social costs and social benefits formulas

Answer 1 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 (regional R) · extract 4 of 6 · find part d in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the likely benefits of increasing the minimum wage for employees and firms in the Netherlands. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The minimum wage is the lowest amount that a firm is legally allowed to pay its employees • The minimum wage in the Netherlands increased to €1 934.40 per month at the start of 2023 • This means that the incomes of employees earning the minimum wage increased by 10.15% each month, giving them more disposable income • Therefore, employees may be able to enjoy a better standard of living due to the wage increase • It may mean employees are more motivated and therefore, lead to higher levels of productivity, meaning firms could increase output • This increase in productivity/output may allow firms to offset the higher wage costs **AO4** • However, if firms cannot afford to pay the higher wage costs because the economy is still weak, they may not be able to employ as many people and this may increase unemployment • Possible use of a diagram:  • If unemployment increases there may be even less spending in the economy, meaning further revenue decreases for firms • This may be more likely at a time when spending in the economy may be reduced due to the high inflation rate of 17% seen in 2022, leading to lower revenues for firms • Employees may not enjoy a higher standard of living, even with the wage increase, due to the high rate of inflation of over 17%

Answer 1 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 (regional R) · extract 5 of 6 · find part d in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Question number	Indicative content
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Negative externalities are spillover effects on third parties due to consumption/production • Over-harvesting sea cucumbers can prevent the marine animal from keeping the coral reef ecosystem healthy and so presents negative externalities • One method of government intervention to reduce negative externalities is the use of fines • In an attempt to reduce over-harvesting, the government fined the owner of Orient Seafood Production (OSP) $1.5m for failing to report harvests of 113,400 kg of sea cucumber in a two-year period • This should stop OSP from over-harvesting again in the future • This would act as a deterrent to other firms that may be considering over-harvesting **AO4** • However, it costs money and takes time to police over-harvesting and impose fines on illegal activity • OSP had already harvested 113 400 kg in two years before being fined, this could already have caused a great deal of damage to the coral reef ecosystem • OSP has already made high profits from over-harvesting and so the fine may not be enough of a deterrent • There is a growing demand in China and sales of sea cucumber are profitable so firms may think it is worth risking being caught and being fined • Other methods of government intervention may be more effective

Question Number	With reference to the data above and your knowledge of economics, assess the benefits for Foxconn Technology of using division of labour. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Division of labour involves breaking down the production process into smaller tasks • Each worker specialises in only one task, such as handling the phone screen, checking the phone works and packaging the phone ready to ship to the customer • By specialising, efficiency is improved because workers can conduct tasks quicker and with more accuracy • This leads to an increase in productivity and lower costs of production for Foxconn Technology • Workers do not need to waste time moving between tasks and so greater efficiencies are created, again lowering production costs **AO4** • However, tasks such as checking the iPhone works is likely to be repetitive and could be very boring for the worker, meaning they may become poorly motivated • Therefore, mistakes may be made leading to the need for part of the production process to be repeated, reducing productivity • This could therefore increase the cost of production and reduce the profit made by Foxconn Technology • Problems may occur if one part of the production process fails. For example, if a broken phone screen is found, the phone cannot progress to the stage where it is packed to ship to the customer • This may be more likely due to the number of tasks that production is divided into with 270,000 workers • Specialisation may cause problems if a worker is absent and no one is able to take their place due to a lack of the specialist skill

Type MS · Social costs and social benefits formulas

Answer 6 of 10 · Question 2 part b · 1 mark

2023 JAN · Paper 01 (regional R) · extract 5 of 6 · find part b in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

2023 JUN · Paper 01 · extract 3 of 6 · find part b in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse why some people may ignore the negative impacts of spending a lot of time using a mobile phone. **Indicative content**
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Consumers are not always good at calculating what is or is not good for them • Therefore, the mass of information and facilities available on a mobile phone can be difficult to resist • This is also true due to the habit many people have developed to use their mobile phone for so many things in daily life • Developing such a habit of reaching for the phone for a wide variety of reasons can reduce a person's ability to make rational decisions • When so many other people spend so much time on their phone, this behaviour can influence others • Therefore, making it difficult to maximise their benefit regarding use of mobile phones

Level	**Mark**	**Descriptor**

Answer 7 of 10 · Question 3 part b · 1 mark

2023 JUN · Paper 01 · extract 4 of 6 · find part b in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the role of the secondary sector in an economy. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The secondary sector is the production of goods by converting raw materials from the primary sector • Manufacturing is an example of a secondary sector industry • The income and tax revenue provided from the secondary sector can help fund services in the tertiary sector, therefore giving a reason why the economy might be reliant on the secondary sector • In addition, many services rely on production from the secondary sector to be able to provide their services, e. g. transport services (tertiary) rely on the car production (secondary), sales services (tertiary) rely on the production of finished goods (secondary) to sell • Without the production of vehicles, computers and food processing in the secondary sector, the tertiary sector would not be able to deliver services reliant on transport, monitor sales using computers/technology or serve food in restaurants **AO4** • However, the economy focuses on the provision of a range of services in the tertiary sector, including insurance and banking, as well as health care and education • Revenue earned in the tertiary sector could be used by governments to fund manufacturing of equipment, such as that used in defence • Therefore, the tertiary sector may play a more important role in an economy • Tertiary sector services need the expertise and skills of professionals such as accountants, doctors and teachers • Therefore, the tertiary sector relies on elements such as skills and qualifications as well as on the secondary sector • The economy relies on the primary sector as well, for the extraction of raw materials to use during production (in the secondary sector)

Question number	Calculate the **excess demand** for tickets if the quantity supplied for all three events totals 60,000. You are advised to show your working. **Answer**	Mark

Type MS · Social costs and social benefits formulas

Answer 8 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 · extract 1 of 6 · find part d in this mark scheme extract

2(a)	**AO2 1 mark** The only correct answer is:  **C** A is not correct because this shows excess demand B is not correct because this shows an increase in supply D is not correct because this shows a movement along the supply curve	**(1)**

Question number	Which **one** of the following is a feature of a monopoly? **Answer**	**Mark**
2(b)	**AO1 1 mark** The only correct answer is: **C** The firm is a price-maker A is not correct because there is only one firm B is not correct because there would only be one firm in a monopoly D is not correct because barriers to entry would be high in a monopoly	**(1)**

Type MS · Social costs and social benefits formulas

Answer 8 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 · extract 2 of 6 · find part d in this mark scheme extract

Question number	Calculate the **percentage change in quantity demanded** for a product if the price elasticity of demand (PED) is -1.9 and the price falls by 10%. You are advised to show your working. **Answer**	Mark
2(c)	**AO2 2 marks** Award 1 mark for showing the correct calculation -10% x -1.9 **(1)** Award 1 mark for correct change in quantity demanded = 19% **(1)** Award 2 marks if the change in quantity demanded is correctly calculated as 19%, even if no calculations are shown Award 1 mark if the change in quantity demanded is calculated as 19, even if no calculations are shown Do not award marks for a formula	**(2)**

Question number	What is meant by the term social benefits? **Answer**	Mark
2(d)	**AO1 1 mark** Award up to 2 marks for a correct definition Private benefits **(1)** plus external benefits **(1)** Accept any other appropriate response	**(2)**

Question number	Describe **one** feature of an oligopoly. **Answer**	Mark
2(e)	**AO1 2 marks** Award 1 mark for reference to the feature and 1 mark for development of the feature Barriers to entry **(1)** therefore fewer firms can enter the market **(1)** OR Different products **(1)** to stand apart from competitors **(1)** Accept any other appropriate response	**(2)**

Type MS · Social costs and social benefits formulas

Answer 8 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 · extract 3 of 6 · find part d in this mark scheme extract

Question number	Explain **one** reason why Mostafa may want to offer this discount rather than to maximise profit. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • Managers may have the objective of maximising sales **(1)**. Selling at a 10% discount means lower revenue per sale, so the shop may not maximise profit **(1),** but it may result in higher/more sales due to the lower price **(1)** • Managers may have different objectives to owners **(1)** Mostafa may want to maximise sales because it affects his salary **(1)**. The more he sells the higher his salary will be **(1)** Accept any other appropriate response	**(3)**

Type MS · Social costs and social benefits formulas

Answer 8 of 10 · Question 2 part d · 2 marks

2024 JUN · Paper 01 · extract 4 of 6 · find part d in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the effectiveness of government regulation when dealing with externalities such as pollution. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Negative externalities are spillover effects on third parties due to consumption/production • Pollution is an example of a negative externality because its effects are felt by those not producing or using the plastic bags • One method of government intervention to reduce negative externalities is the use of regulation • Regulation, such as the ban on single-use plastic bags, will limit the amount of pollution produced and reduce the externalities due to penalties if it is not followed • The ban in Kenya has led to a cleaner environment as the reduced consumption means the visual pollution and danger to livestock is less of a problem • Therefore, the regulation has been quite effective in reducing the negative externality **AO4** • However, the regulation has not solved the problem of pollution in Kenya • It costs money and takes time to monitor any illegal activity, causing an opportunity cost • The effectiveness of the regulation depends on the level of enforcement by the government and cooperation from the public • There are likely to be other problems, aside from plastic bags causing pollution in Kenya, which may need to be addressed by other methods than regulation • Other methods of government intervention may be more effective, such as fines or taxation
