2021 NOV · Paper 01 · extract 2 of 7 · find part e in this mark scheme extract

Question number	Answer	Mark
3(c)	**AO2 3 marks** Award 1 mark for drawing new wage rate, labelled Award 1 mark for new quantity demanded, labelled Award 1 mark for new quantity supplied, labelled  	(3)

Type MS · Supply of labour: what changes the workforce

Answer 1 of 13 · Question 3 part e · 9 marks

2021 NOV · Paper 01 · extract 3 of 7 · find part e in this mark scheme extract

Question number	Indicative content
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • A demand curve shows how much of a good will be purchased at different prices • Advertising is one of the factors likely to shift a demand curve to the right (increase in quantity demanded) • Possible use of a diagram:  • Worldwide advertising during a popular event, such as an international cricket match, may encourage consumers to purchase Pepsi due to greater awareness and brand loyalty, therefore increasing the quantity demanded • The quantity of Pepsi demanded is likely to have increased as a result of the advertising (from Q_e to Q_1) because consumers of soft drinks may be influenced by the adverts and make an association between Pepsi and the cricket

Type MS · Supply of labour: what changes the workforce

Answer 1 of 13 · Question 3 part e · 9 marks

2021 NOV · Paper 01 · extract 4 of 7 · find part e in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Type MS · Supply of labour: what changes the workforce

Answer 1 of 13 · Question 3 part e · 9 marks

2021 NOV · Paper 01 · extract 5 of 7 · find part e in this mark scheme extract

Question number	Indicative content
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The supply of labour is the amount of time a worker is willing and able to work at a given wage rate, over a given period of time • By increasing the retirement age people will have to work longer before they can receive a state pension • In Singapore, 62-, 63- and 64-year-olds will need to continue to work after the change to the age of retirement comes into effect • This means that there will be an increase in the supply of labour • As there are more people living to 80+, this will mean the increase in the retirement age will be effective in increasing the supply of labour **AO4** • However, a higher retirement age may not be the most effective method of increasing the labour supply in the manufacturing sector, which is significant in Singapore • This is because this sector may require younger employees to carry out the roles required within the industry • Other factors such as lowering the school-leaving age, migration or female participation may be more effective • Increasing skills and qualifications of employees may also be more effective, especially if the financial services industry continues to grow in Singapore • This is because the nature of the industry means being skilled in financial services may lead to employees who are able to supply a greater amount of labour than older employees

Type MS · Supply of labour: what changes the workforce

Answer 1 of 13 · Question 3 part e · 9 marks

Type MS · Supply of labour: what changes the workforce

Answer 2 of 13 · Question 3 part d · 6 marks

2019 JUN · Paper 01 · extract 3 of 5 · find part d in this mark scheme extract

Question number	Indicative content
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Skills could be gained through education in schools and colleges leading to qualifications in technical areas relevant to business • Skills can also be gained through work place training by employers • Through education and training, workers will be more skilled and may therefore be more productive. This could lead to an increase in international competitiveness • Workers may be more motivated as a result of the training, leading to greater job satisfaction, lower labour turnover and improved productivity • Through improved human capital the quality of labour is greater and productivity can be increased. This could mean income per capita increases **AO4** • However, the cost to the firm of staff training/the Canadian Government of providing education may be too great compared to investing in technological advances • The firm may be reluctant to invest in human capital if it pays to train workers but they then leave for alternative employment. • Increasing technological developments may be more financially viable. • To be effective the quality of the training needs to be of a high enough standard to meet the requirements of the work place • It takes a long time for the benefits of education to lead to increased productivity. This could explain why Canada's labour productivity growth took time to become the 3rd most productive of the leading economies • It depends on the nature of the industry, some industries are better suited to having highly skilled workers e.g. service industries • Whereas some industries suit increased automation and use of technological advances rather than investing in human capital

Type MS · Supply of labour: what changes the workforce

Answer 3 of 13 · Question 3 part a · 1 mark

2020 JAN · Paper 01 (regional R) · extract 3 of 5 · find part a in this mark scheme extract

Question number	Indicative content
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Price elasticity of supply (PES) measures the responsiveness of supply to a change in price • A product has an elastic PES if the percentage change in supply is greater than the percentage change in price. The greater the difference, the more price elastic the supply of the product • Supply of cars does not depend on natural factors such as the weather whereas it does for organic strawberries, meaning it is easier to change supply of cars in response to a change in price • Organic strawberries are perishable and need time to grow but cars can be stored, meaning the supply of organic strawberries is less likely to change in response to a change in price compared to the supply of cars • Cars are more price elastic because unless you are operating at full capacity it is possible to work an extra shift and increase production **AO4** • However, it takes time and a large amount of technical equipment to build cars making it more difficult to change production to respond to a change in price • There is a high cost involved when producing cars so firms may not be able to afford to make them to store. This may make the supply of cars less price elastic • It may depend on the growing conditions in the Republic of Korea whether the farms can adjust growing in response to a change in price • There are 28,951 organic farms in the country which may collectively allow the farmers of organic strawberries to be more responsive to price changes • Supply of organic strawberries might be more price elastic in the short run but in the long run car manufacturers may be able to adjust production facilities to respond to changes in price more quickly

Type MS · Supply of labour: what changes the workforce

Answer 4 of 13 · Question 4 part b · 6 marks

2020 NOV · Paper 01 · extract 3 of 5 · find part b in this mark scheme extract

Question number	Indicative content
4(c)	**AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)** **AO2 and AO3** • Productivity is the amount of output that can be produced with a given amount of resources • By using technology (a form of capital) such as tablets, restaurants can replace waiters in an attempt to be more efficient • Restaurants may therefore be able to take orders from customers faster due to the use of technology but at a lower cost because the tablets will be cheaper to run than labour • This may make the restaurants more productive as they can increase output and serve more diners due to the increased use of technology • This increase in productivity may allow the restaurants to invest in further capital and therefore become even more productive in the future **AO4** • However, it may take longer for orders to be placed if customers are confused about how to use the tablets, reducing productivity • It may be necessary for labour to be used (initially) to assist diners when they are using the tablets and so the need to use extra resources could mean it is less productive in the short run • Errors in ordering could lead to the wrong meals being prepared which could make the restaurants less productive if they have to correct mistakes • Overall, it may be less productive for restaurants to increase the use of technology in the short run while the restaurant initiates use of the equipment • This may depend on how quickly customers adapt to the changes • However, in the long run, because they may have been able to resolve any difficulties faced by the use of technology, productivity in the restaurants may have increased

Answer 5 of 13 · Question 1 part h · 3 marks

2021 JUN · Paper 01 · extract 1 of 5 · find part h in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **D** A given amount of resources being fully employed A is not correct because this cannot be determined on a PPC B is not correct because a PPC cannot show *how* production can increase C is not correct because a PPC does not show government revenue	**(1)**

Question Number	Which **one** of the following describes this economic assumption? Answer	Mark
1(b)	**AO2 1 mark** The only correct answer is: **A** Businesses aim to maximise their profit B is not correct because there is no indication of any charitable work taking place C is not correct because consumer behaviour is not described D is not correct because it is not linked to government actions	**(1)**

Question Number	What is meant by the term economies of scale? Answer	Mark
1(c)	**AO1 2 marks** Award 1 mark for reference to reduced average cost and 1 mark for reference to increased output Average costs of production fall **(1)** as the level of output rises **(1)** Accept any other appropriate response	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 5 of 13 · Question 1 part h · 3 marks

2021 JUN · Paper 01 · extract 2 of 5 · find part h in this mark scheme extract

Question Number	State **one** example of a factor of production that can be classified as land. Answer	Mark
1(d)	**AO1 1 mark** Award 1 mark for correct example • Forest • Rainwater • Coal • Oil Accept any other appropriate response	**(1)**

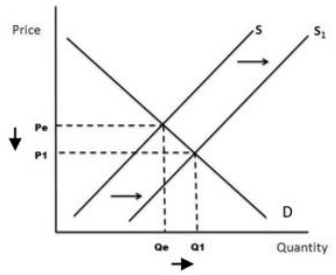

Question Number	Define the term monopoly. Answer	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition One dominant seller in a market Accept any other appropriate response	**(1)**

Question Number	Calculate, to two decimal places, the **price elasticity of demand (PED)** for Alfie's dog-walking service. You are advised to show your working. Answer	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation -1.1/1.5 **(1)** Award 1 mark for correct PED = -0.73 **(1)** Award 2 marks if PED is correctly calculated as -0.73, even if no calculations are shown Do not award marks for a formula	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 5 of 13 · Question 1 part h · 3 marks

2021 JUN · Paper 01 · extract 3 of 5 · find part h in this mark scheme extract

Question Number	Using the diagram below, draw the likely effects on the market for cars of the introduction of more effective technology in production. Label the new curve, the new equilibrium price and the new equilibrium quantity. Answer	Mark
1(g)	**AO2 3 marks** Award 1 mark for rightward shift of supply, labelled Award 1 mark for lower equilibrium price, labelled Award 1 mark for higher equilibrium quantity, labelled  	**(3)**

Question Number	Explain **one** possible effect on the supply of labour of the school-leaving age being raised. Answer	Mark
1(h)	**AO2 3 marks** Award 1 mark for identifying an effect Award 1 mark for developing the response Award 1 mark for the response being in context • One effect would be a decrease in the supply of labour **(1)** because young people would not be able to be employed full-time until they reached the school-leaving age **(1)** which means only people over 18 in England could contribute to the supply of labour **(1)** Accept any other appropriate response	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 5 of 13 · Question 1 part h · 3 marks

2021 JUN · Paper 01 · extract 4 of 5 · find part h in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, analyse why Bupa may have decided to operate in a wider range of markets. Indicative content
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • There are several factors that can affect the growth of firms. One of these is the desire to spread risks • By expanding its product range, Bupa can reduce the risk because it is trading in different markets • This means that if there is a problem in one market (such as health insurance) it has other areas in which it can continue to trade • Therefore the range of services, such as hospital and dental treatment, could help to finance the firm and allow it to continue to be successful, if there are problems in other markets • As Bupa operates in 190 countries, it is likely to encounter uncertainty in the different markets and therefore having a range of services means it is reducing the overall risk to the firm

Question number	Answer	Mark
2(d)	**AO2 2 marks** Award 1 mark for showing correct calculation $12 000 + $115 000 (1) Award 1 mark for correct total variable costs = $127 000 (1) Award 2 marks if total variable costs are correctly calculated as $127 000, even if no calculations are shown Award 1 mark if the answer given is 127 000 with or without calculations shown Do not award marks for a formula	**(2)**

Question number	Answer	Mark
2(e)	**AO1 1 mark** Award 1 mark for a correct definition Lowest legal amount paid to employees Accept any other appropriate response	**(1)**

Question number	Answer	Mark
2(f)	**AO1 2 marks** Award 1 mark for reference to the reason and 1 mark for development of the reason There are finite/limited resources **(1)** therefore demand for resources is greater than the supply of them **(1)** Accept any other appropriate response.	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 6 of 13 · Question 2 part a · 1 mark

2022 JUN · Paper 01 (regional R) · extract 3 of 6 · find part a in this mark scheme extract

Question number	Answer	Mark
2(g)	**AO2 3 marks** Award 1 mark for identifying a relevant effect Award 1 mark for developing the effect Award 1 mark for the response being in context • A price decrease would increase quantity demanded **(1)**. A decrease from $2.32 to $2.22 results in more units **(1)** because it becomes more competitive compared to substitutes **(1)** • A price increase would decrease quantity demanded **(1)**. An increase from $2.32 to $2.42 results in fewer units **(1)** because there would be a movement along the demand curve **(1)** Accept any other appropriate response	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 6 of 13 · Question 2 part a · 1 mark

2022 JUN · Paper 01 (regional R) · extract 4 of 6 · find part a in this mark scheme extract

Question number	Indicative content
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • An oligopoly is where there are a few dominant firms, such as Vodacom, Airtel and Tigo (which have 86% of the market between them) • As a result of their dominance, these firms may be able to benefit from economies of scale and therefore enjoy lower average costs. They may pass these lower costs on to consumers in the form of lower prices • Firms like Vodacom may also be able to afford to use profits for research and development (R&D) which may lead to a better quality telecoms services for consumers • The firms in the telecoms oligopoly may try to compete in price wars and keeping prices low would benefit the consumer • They may also offer additional services to consumers who have subscribed to their networks in an attempt to gain market share from competitors **AO4** • However, if the telecoms firms have high costs due to competing via non-price competition such as advertising, they may not be able to offer low prices to consumers • Such costs may also lead to fewer firms in the market. For example Smart Telecoms had to leave the market because it could not compete with the larger firms • This would mean there are fewer firms left to compete for market share and therefore there would be less choice available for consumers • Even the successful small firms run the risk of being taken over or crowded out by dominant telecoms providers. This may be the case with the merger between Tigo and Zantel • This may increase the barriers to entry as it will be difficult for new firms to enter the market to compete with the successful, dominant firms, meaning even less choice for consumers • The firms in the oligopoly may collude in order to restrict choice and/or price competition, again causing a disadvantage to consumers

Type MS · Supply of labour: what changes the workforce

Answer 6 of 13 · Question 2 part a · 1 mark

2022 JUN · Paper 01 (regional R) · extract 5 of 6 · find part a in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Type MS · Supply of labour: what changes the workforce

Answer 7 of 13 · Question 2 part h · 9 marks

2022 JUN · Paper 01 · extract 1 of 6 · find part h in this mark scheme extract

2(a)	**AO2 1 mark** The only correct answer is: **A** W -1.5 B is not correct because this is unitary elasticity C is not correct because this is price inelastic D is not correct because the responsiveness is equal	**(1)**

Question number	Answer	Mark
2(b)	**AO1 1 mark** The only correct answer is: **B** External economies of scale A is not correct because this is when an individual firm benefits from falling average costs C is not correct because this results from higher average costs D is not correct because this is a type of internal economies of scale	**(1)**

Question number	Answer	Mark
2(c)	**AO1 1 mark** Award 1 mark for a suitable disadvantage • Reduced profit • Higher (advertising) costs • Need to reduce prices Accept any other appropriate response	**(1)**

Type MS · Supply of labour: what changes the workforce

Answer 7 of 13 · Question 2 part h · 9 marks

2022 JUN · Paper 01 · extract 2 of 6 · find part h in this mark scheme extract

Question number	Answer	Mark
2(d)	**AO2 2 marks** Award 1 mark for showing correct calculation $75 000 + ($525 x 1350) **(1)** Award 1 mark for correct total costs = $783 750 **(1)** Award 2 marks if total costs per month are correctly calculated as $783 750, even if no calculations are shown Award 1 mark for 783 750, with or without calculations shown Do not award marks for a formula	**(2)**

Question number	Answer	Mark
2(e)	**AO1 1 mark** Award 1 mark for a correct definition • One firm buying out another firm • Obtaining control of a firm by buying over 50% of its shares Accept any other appropriate response	**(1)**

Question number	Answer	Mark
2(f)	**AO1 2 marks** Award 1 mark for reference to the reason and 1 mark for development of the reason • They may develop buying habits **(1)** to stay loyal to a particular brand they enjoy **(1)** • They may copy the behaviour of others **(1)** in order to fit in with others in a group **(1)** Accept any other appropriate response	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 7 of 13 · Question 2 part h · 9 marks

2022 JUN · Paper 01 · extract 3 of 6 · find part h in this mark scheme extract

Question number	Answer	Mark
2(g)	**AO2 3 marks** Award 1 mark for identifying a relevant effect Award 1 mark for developing the effect Award 1 mark for the response being in context • A price increase would increase the quantity supplied **(1)**. An increase from $4.50 to $5.00 results in more units **(1)** because producers would increase profits **(1)** • A price decrease would decrease the quantity supplied **(1).** A decrease from $4.50 to $4.00 results in fewer units **(1)** leading to a movement along the supply curve **(1)** Accept any other appropriate response	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 7 of 13 · Question 2 part h · 9 marks

2022 JUN · Paper 01 · extract 4 of 6 · find part h in this mark scheme extract

Question number	Indicative content
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The supply of labour is the number of people willing and able to work • It can be affected by many factors, including skills and qualifications • Normally, the supply of labour will increase if there is an increase in the number of people qualified to work in that industry • There has been an increase in the number of graduates with degrees in science, maths and modern languages • By having a degree in these subjects, graduates are more likely to be attracted into the teaching profession by the bonus payment of £9 000 • Therefore, having a degree in science, maths or modern languages would lead to an incentive of higher wages, meaning that the supply of teachers should increase with an increase in skills and qualifications **AO4** • However, it may depend on other factors such as working conditions in teaching because long hours, bureaucracy and student behaviour may deter those with skills and qualifications to teach • If the skills and qualifications can be used by other occupations, graduates may move to alternative types of employment and will not increase the supply of teachers • The bonus is only available to teachers with degrees in maths, science and modern languages and so those qualified in other subjects may find it more beneficial to work in other types of employment • Therefore, an increase in skills and qualifications may not always lead to an increase in the supply of teachers

Type MS · Supply of labour: what changes the workforce

Answer 8 of 13 · Question 3 part e · 9 marks

2023 JAN · Paper 01 (regional R) · extract 4 of 6 · find part e in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the benefits to Dubai of employing such a high proportion of migrant labour. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Migration occurs when a person moves to live in a foreign country • There will be an increase the supply of labour, which shifts the labour supply curve to the right, when there is an increase in the number of workers entering a country and available for employment • Possible use of a diagram  • This could increase in the number of workers employed in a city such as Dubai and will reduce labour shortages in particular sectors • The fact that 2 million migrants (80% of the population) live in Dubai, providing services such as construction, highlights the large contribution migration makes towards the supply of labour in the city • This should help Dubai's economy to be more productive and expand **AO4** • However, the majority of immigrants work in construction, cleaning and care services • This means there may not be a large increase in the supply of labour in other sectors of the economy • The migrant workers may not have the right skills to fill all labour shortages • The supply of labour may only be short-term if migrants return to their home countries after a short period of time. This may make migration less effective as a way to increase the supply of labour • Increasing the retirement age, reducing the school-leaving age or making it easier for females to participate in the workforce may be more effective ways to increase the supply of labour • This is because these methods may make it more effective to keep a long-term supply of labour as well as to recruit workers into jobs in other sectors of the economy than those such as construction, cleaning and care services

2023 NOV · Paper 01 · extract 2 of 6 · find part f in this mark scheme extract

Question number	Calculate the **total fixed costs** for the firm in March. You are advised to show your working. **Answer**	Mark
2(d)	**AO2 2 marks** Award 1 mark for showing correct calculation 20 250 + 5 125 **(1)** Award 1 mark for calculating correct total fixed costs = 25 375 Tk **(1)** Award 2 marks if total fixed costs are correctly calculated as 25 375 Tk, even if no calculations are shown Award 1 mark if total fixed costs are calculated as 25 375, even if no calculations are shown Do not award marks for a formula	**(2)**

Question number	Describe **one** reason why an entrepreneur is a factor of production. **Answer**	Mark
2(e)	**AO1 2 marks** Award 1 mark for reference to the reason and 1 mark for development of the reason • An entrepreneur comes up with a business idea/takes a risk **(1)** therefore it is classed as enterprise **(1)** • An entrepreneur manages the other factors of production **(1)** in order to make goods/services **(1)** Accept any other appropriate response	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 9 of 13 · Question 2 part f · 3 marks

2023 NOV · Paper 01 · extract 3 of 6 · find part f in this mark scheme extract

Question number	Explain **one** advantage for firms of an increase in the retirement age. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for identifying a relevant advantage Award 1 mark for developing the advantage Award 1 mark for the advantage being in context • Firms will be able to retain their skilled workers **(1)** because workers will not be able to access their pension until the age of at least 57 **(1)** reducing the cost of recruitment and training **(1)** • Supply of labour may increase **(1)** because people may need to continue working for another two years **(1)** thus reducing the price of labour/wage rate for firms Accept any other appropriate response	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 9 of 13 · Question 2 part f · 3 marks

2023 NOV · Paper 01 · extract 4 of 6 · find part f in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the likely effectiveness of the tourist tax in dealing with negative externalities, such as overcrowding. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Negative externalities are spillover effects on third parties due to consumption/production • Overcrowding in Venice may cause pollution, litter and congestion issues for residents and other visitors • One method of government intervention to reduce negative externalities is the use of taxation • A tourist tax is a compulsory financial charge made by the government on individuals • A tourist tax would make it more expensive to visit Venice • Therefore, it is likely to reduce the number of tourists in Venice from the estimated 24 million who visit each year • The higher the tourist tax, the fewer tourists there are likely to be, meaning at its highest charge of €10, the reduction should be greatest • As a result, the negative externality, such as overcrowding, may be reduced **AO4** • However, as Venice is so popular, some tourists may decide it is worth paying the tourist tax • This may especially be the case at the lower rates of tourist tax, where a tourist may not consider €3 unaffordable compared to the price of their trip • It takes time to collect the tourist tax, meaning there may be more congestion when people arrive in Venice • Even a reduction in numbers may not be enough to deal with the externalities caused by the high number of visitors each year • Those visitors who are prepared to pay the tourist tax will be generating revenue for the city which may be used to help combat the externalities in other ways • Other methods of government intervention may be more effective

Type MS · Supply of labour: what changes the workforce

Type MS · Supply of labour: what changes the workforce

Answer 10 of 13 · Question 1 part d · 1 mark

2024 JUN · Paper 01 (regional R) · extract 6 of 6 · find part d in this mark scheme extract

Question number	Which **one** of the following diagrams shows excess demand? **Answer**	**Mark**

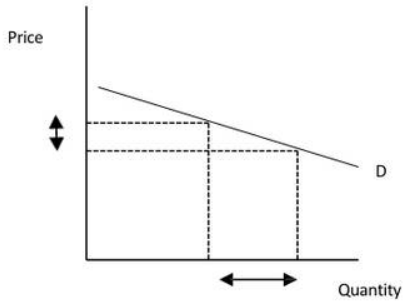

Type MS · Supply of labour: what changes the workforce

Answer 11 of 13 · Question 3 part a · 1 mark

2024 JUN · Paper 01 · extract 1 of 5 · find part a in this mark scheme extract

3(a)	**AO1 1 mark** The only correct answer is: **B** The school-leaving age A is not correct because this would increase the supply of labour C is not correct because this would mean more people were available to work D is not correct because this would affect the demand for labour	**(1)**

Question number	Which **one** of the following is the formula to calculate total revenue? **Answer**	**Mark**
3(b)	**AO1 1 mark** The only correct answer is: **A** Quantity sold x price B is not correct because this does not allow revenue to be calculated C is not correct because this does not account for units sold D is not correct because this does not calculate revenue	**(1)**

Question number	Using the diagram below, draw a price elastic demand (PED) curve. Label the curve and show the impact on both axes from a change in price. **Answer**	**Mark**
3(c)	**AO2 3 marks** Award 1 mark for drawing elastic demand curve, labelled Award 1 mark for showing smaller price change on the axis Award 1 mark for showing a greater change in the quantity on the axis  	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 11 of 13 · Question 3 part a · 1 mark

2024 JUN · Paper 01 · extract 2 of 5 · find part a in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse the possible advantages for Coca-Cola of using division of labour at the factory. **Indicative content**
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Division of labour involves breaking down the production process into smaller tasks • Each worker specialises in only one task, such as filling bottles, sealing with caps or adding labels • By specialising, efficiency is improved because workers can carry out these tasks more quickly, allowing more than one million drinks to be bottled each day • This leads to an increase in productivity and lower average costs of production of drinks such as Fanta and Sprite • The 1,000 workers do not need to waste time moving across the 65,000m^2 site between tasks and so greater efficiencies are created, again lowering average production costs

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Type MS · Supply of labour: what changes the workforce

Answer 11 of 13 · Question 3 part a · 1 mark

2024 JUN · Paper 01 · extract 3 of 5 · find part a in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess whether supply is likely to be more price elastic for textiles than for agricultural products. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Price elasticity of supply (PES) measures the responsiveness of supply to a change in price • PES is affected by how quickly and easily supply can change when price changes • A product has an elastic PES if the percentage change in supply is greater than the percentage change in price. The greater the difference, the more price elastic the supply of the product • Supply of textiles does not depend on natural factors like the weather whereas it does for agricultural products, meaning it is easier to change supply of textiles in response to a change in price • Agricultural products, such as fruit, are perishable as well as needing time to grow but textiles can be stored, meaning the supply of agricultural products is less likely to change in response to a change in price compared to the supply of textiles • Supply of textiles is more price elastic because, unless you are operating at full capacity it is possible to work an extra shift and increase production **AO4** • However, if operating at full capacity, it takes time and a range of machinery to produce textiles, making it more difficult to change production to respond to a change in price • The cost involved when producing textiles means firms may not be able to afford to produce them to store. This may make the supply of textiles less price elastic • It may depend on the growing conditions in Bangladesh whether the farmers can adjust growing in response to a change in price • Supply of agricultural products might be more price inelastic in the short run but in the long run producers may be able to adjust techniques to respond to changes in price more quickly

Type MS · Supply of labour: what changes the workforce

Answer 11 of 13 · Question 3 part a · 1 mark

2024 JUN · Paper 01 · extract 4 of 5 · find part a in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Type MS · Supply of labour: what changes the workforce

Answer 11 of 13 · Question 3 part a · 1 mark

2024 JUN · Paper 01 · extract 5 of 5 · find part a in this mark scheme extract

Question number	Calculate the **daily total costs** of transporting the goods to the customer. You are advised to show your working. **Answer**	**Mark**

Type MS · Supply of labour: what changes the workforce

Answer 12 of 13 · Question 1 part h · 3 marks

2025 JUN · Paper 01 (regional R) · extract 1 of 5 · find part h in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **D** Production which is obtainable A is not correct because this cannot be determined on a PPC B is not correct because a PPC cannot show how production can be increased C is not correct because a PPC does not show revenue	**(1)**

Question number	Which **one** of the following describes why the firm might do this? **Answer**	**Mark**
1(b)	**AO2 1 mark** The only correct answer is: **B** Producers may complete charitable work A is not correct because producers would not make a profit C is not correct because it is not linked to consumer actions D is not correct because consumer behaviour is not described	**(1)**

Question number	What is meant by the term economies of scale? **Answer**	**Mark**
1(c)	**AO1 2 marks** Award up to 2 marks for a correct definition Average costs of production fall **(1)** as the firm increases in size **(1)** Accept any other appropriate response	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 12 of 13 · Question 1 part h · 3 marks

2025 JUN · Paper 01 (regional R) · extract 2 of 5 · find part h in this mark scheme extract

Question number	State **one** example of an item that can be classified as capital. **Answer**	Mark
1(d)	**AO1 1 mark** Award 1 mark for a correct example • Machines • Computers • Factories • Vehicles Accept any other appropriate response	**(1)**

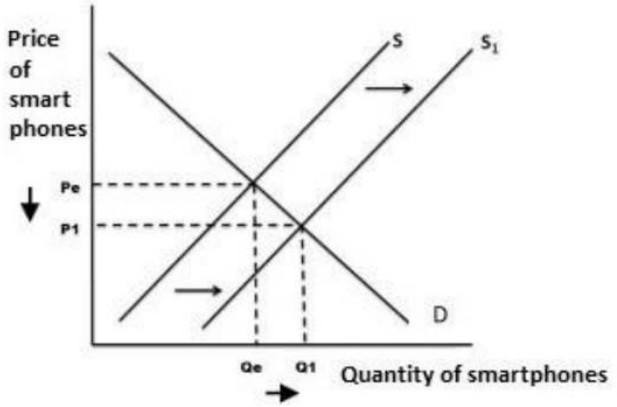

Question number	Define the term price-maker. **Answer**	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition A firm is able to set the price charged in the whole market Accept any other appropriate response	**(1)**

Question number	Calculate, to two decimal places, the **price elasticity of demand (PED)** for a good if the price decreases by 4.7% and the quantity demanded increases by 1.8%. You are advised to show your working. **Answer**	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation 1.8%/-4.7% **(1)** Award 1 mark for correct PED = -0.38 **(1)** Award 2 marks if PED is correctly calculated as -0.38 even if no calculations are shown Award 1 mark if PED is calculated as -0.38% with or without calculations shown Do not award marks for the formula	**(2)**

Type MS · Supply of labour: what changes the workforce

Answer 12 of 13 · Question 1 part h · 3 marks

2025 JUN · Paper 01 (regional R) · extract 3 of 5 · find part h in this mark scheme extract

Question number	Using the diagram below, draw the likely effect on the market for smartphones following an increase in productivity. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	**Mark**
1(g)	**AO2 3 marks** Award 1 mark for a rightward shift of the supply curve, labelled Award 1 mark for a lower equilibrium price, labelled Award 1 mark for higher equilibrium quantity, labelled 	**(3)**

Question number	Explain **one** possible effect of this change in the pension age on the supply of labour. **Answer**	**Mark**
1(h)	**AO2 3 marks** Award 1 mark for identifying a relevant effect Award 1 mark for developing the effect Award 1 mark for the response being in context • One effect would be an increase in the supply of labour **(1)** because fewer people would be able to afford to retire until they reached the retirement age **(1)** meaning more people up to the age of 64 would be available for work **(1)** Accept any other appropriate response	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 12 of 13 · Question 1 part h · 3 marks

2025 JUN · Paper 01 (regional R) · extract 4 of 5 · find part h in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse the impact of an increase in price on the quantity supplied of avocados. **Indicative content**
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • The diagram shows that the PES of avocados is inelastic • This means that the quantity of avocados supplied is not very responsive to an increase in price • The PES of avocados is inelastic because farmers cannot easily increase the production level even with an increase in price • Avocados take time to grow and are primary/agricultural products. The supply is dependent on factors such as weather/climate. It cannot therefore be easily increased, even if there is an increase in the price consumers are willing and able to pay • It is also not possible to store avocados for a long period because they are perishable and therefore stock cannot be used to increase the quantity of supply, this also makes the PES of avocados inelastic

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Answer 12 of 13 · Question 1 part h · 3 marks

2025 JUN · Paper 01 (regional R) · extract 5 of 5 · find part h in this mark scheme extract

Question number	Which **one** of the following products has a price elastic demand? **Answer**	**Mark**

Type MS · Supply of labour: what changes the workforce

Answer 13 of 13 · Question 2 part b · 1 mark

2025 JUN · Paper 01 · extract 1 of 6 · find part b in this mark scheme extract

2(a)	**AO2 1 mark** The only correct answer is: **C** Y A is not correct because production is possible using all resources B is not correct because some resources are unemployed D is not correct because all resources will be fully employed	**(1)**

Question number	Which **one** of the following is a factor that may affect the supply of labour? **Answer**	**Mark**
2(b)	**AO1 1 mark** The only correct answer is: **A** Age distribution of population B is not correct because the supply of labour is not affected by economies of scale C is not correct because this may affect the demand for labour D is not correct because these will not cause changes in the supply of labour	**(1)**

Type MS · Supply of labour: what changes the workforce

Answer 13 of 13 · Question 2 part b · 1 mark

2025 JUN · Paper 01 · extract 2 of 6 · find part b in this mark scheme extract

Question number	Calculate, to two decimal places the **price elasticity of supply (PES)** for the firm. You are advised to show your working. **Answer**	Mark
2(c)	**AO2 2 marks** Award 1 mark for showing the correct calculation 5.4%/7.8% **(1)** Award 1 mark for calculating the correct PES = 0.69 **(1)** Award 2 marks if PES is correctly calculated as 0.69, even if no calculations are shown Award 1 mark if the answer given is 0.69%, with or without calculations shown Do not award marks for a formula	**(2)**

Question number	What is meant by the term innovation? **Answer**	Mark
2(d)	**AO1 2 marks** Award up to 2 marks for a correct definition The commercial exploitation **(1)** of a new invention **(1)** **OR** Innovation is the process of improving/creating new products/ services/production methods **(1)** to increase efficiency/in the production process **(1)** Accept any other appropriate response	**(2)**

Question number	Describe **one** reason why a car mechanic is a factor of production. **Answer**	Mark
2(e)	**AO1 2 marks** Award 1 mark for reference to the reason and 1 mark for development of the reason	

Type MS · Supply of labour: what changes the workforce

Answer 13 of 13 · Question 2 part b · 1 mark

2025 JUN · Paper 01 · extract 3 of 6 · find part b in this mark scheme extract

	A car mechanic provides the service of repairing vehicles/machinery for use in production **(1)** therefore a car mechanic is labour **(1)** Accept any other appropriate response	**(2)**

Question number	Explain **one** possible disadvantage of this privatisation for other broadcasters in Argentina. **Answer**	**Mark**
2(f)	**AO2 3 marks** Award 1 mark for identifying a relevant disadvantage Award 1 mark for developing the disadvantage Award 1 mark for the response being in context • The newly privatised Radio Nacional will be under pressure to make a profit **(1)** meaning there would be more incentive to meet the needs of listeners of Radio Nacional. **(1)** This would increase competition for other broadcasters **(1)** Accept any other appropriate response	**(3)**

Type MS · Supply of labour: what changes the workforce

Answer 13 of 13 · Question 2 part b · 1 mark

2025 JUN · Paper 01 · extract 4 of 6 · find part b in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the effectiveness of trade unions in increasing pay and improving working conditions for their members. **Indicative content**
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Trade unions can help raise wages and improve working conditions for workers by putting pressure on employers during negotiations • Mine workers have already been helped by the GMWU, in obtaining an increase in the monthly minimum wage to $500 • A higher rate of pay may lead to increased productivity from more motivated workers, making employers more likely to accede to the union's demands • The union has been supporting workers for 80 years and has over 16,000 members, meaning it could have a lot of influence on employers • This longevity and the ongoing pressure of GMWU on employers to improve health and safety, shows the union has been reasonably effective so far **AO4** • However, the need for further talks to protect mine workers' jobs shows GMWU membership may only be partially effective • Workers may not think it worth paying a membership fee to a trade union if it is unable to guarantee secure jobs • When wage rates increase, employers may not be able to afford to employ the same quantity of workers, thus meaning mine workers' jobs are at risk • Improving health and safety is likely to incur higher costs for mining firms • This means that the effectiveness of trade unions may depend on whether firms can pass on these increased costs through increased prices, such as when demand for products from mines is falling • The alternative may be reduced profit margins for the mining firms, meaning they would be less likely to agree to pay increases

Type MS · Supply of labour: what changes the workforce

Answer 13 of 13 · Question 2 part b · 1 mark

2025 JUN · Paper 01 · extract 5 of 6 · find part b in this mark scheme extract
