2023 NOV · Paper 02 · extract 2 of 6 · find part h in this mark scheme extract

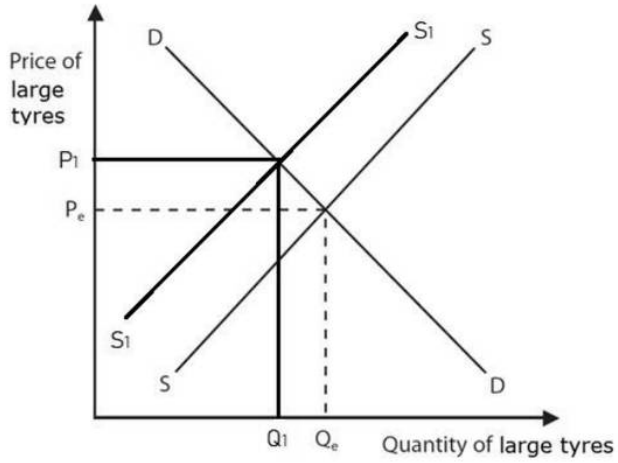

Question Number	Describe **one** role of the World Trade Organization (WTO). **Answer**	Mark
1(d)	**AO1 2 marks** Award 1 mark for reference to the role and 1 mark for development of the role It helps to settle trade disputes between countries **(1)** by acting as a mediator to find a solution **(1)** Accept any other appropriate response	**(2)**

Question Number	Calculate, to two decimal places, the **rate of unemployment**. You are advised to show your working. **Answer**	Mark
1(e)	**AO2 2 marks** Award 1 mark for showing the calculation $\frac{(34 \text{ million} - 32 \text{ million})}{34 \text{ million}} \times 100$ **(1)** **OR** $\frac{2 \text{ million}}{34 \text{ million}} \times 100$ **(1)** Award 1 mark for the correct answer = 5.88% **(1)** Award 2 marks if the correct answer is 5.88% even if no calculations are shown Award 1 mark if the answer given is 5.88 even if no calculations are shown Do not award marks for the formula	**(2)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 1 of 19 · Question 1 part h · 6 marks

2023 NOV · Paper 02 · extract 3 of 6 · find part h in this mark scheme extract

Question Number	Using the diagram below, draw the effects of the introduction of the tariff on the equilibrium price and quantity of large tyres. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	Mark
1(f)	**AO2 3 marks** Award 1 mark for a leftward shift of supply curve, labelled Award 1 mark for a higher equilibrium price, labelled Award 1 mark for a lower equilibrium quantity, labelled  	**(3)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 1 of 19 · Question 1 part h · 6 marks

2023 NOV · Paper 02 · extract 4 of 6 · find part h in this mark scheme extract

Question Number	Explain **one** advantage of free trade for businesses in Ecuador. **Answer**	Mark
1(g)	**AO2 3 marks** Award 1 mark for identifying a relevant advantage Award 1 mark for developing the advantage Award 1 mark for the response being in context • One advantage is that businesses can access a wider market **(1).** Trade barriers will be removed for products such as bananas **(1)** which could help to increase total sales and revenue **(1)** • One advantage is that there could be lower input costs **(1).** Trade barriers will be removed for imports from China **(1)** which could help businesses to sell goods for lower prices in the domestic market **(1)** Accept any other appropriate response	**(3)**

Question Number	With reference to the data above and your knowledge of economics, analyse the impact of high rates of inflation on consumer confidence in a country such as Germany. **Indicative content**	Mark
1(h)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Consumer confidence is an economic indicator that gauges consumers' perception of the economy • High rates of inflation could reduce confidence in Germany • Inflation reduces purchasing power and a rate of 10.4% will result in many consumers experiencing a reduction in living standards • This is because they cannot afford to purchase the same amount of goods and services • Consumer confidence will fall and may make them more cautious and less willing to borrow money • Savings may increase to safeguard against the future • High rates of inflation can cause uncertainty for many consumers making it difficult to plan ahead if prices are rising so much	**(6)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 1 of 19 · Question 1 part h · 6 marks

2023 NOV · Paper 02 · extract 5 of 6 · find part h in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Answer 6 of 19 · Question 1 part g · 3 marks

2020 NOV · Paper 02 (regional R) · extract 3 of 5 · find part g in this mark scheme extract

Question Number	Answer	Mark
1(g)	**AO2 3 marks** Award 1 mark for identifying a relevant impact Award 1 mark for developing the impact Award 1 mark for the response being in context • The impact is that wages do not buy the same amount of goods **(1)** this is because prices are rising at a faster rate than wages **(1).** To prevent this wages need to rise such as the recent increase in Mexico **(1)** • The impact might be limited **(1)** if wages for some workers in Mexico are linked to inflation **(1).** This means that the standard of living remains the same if wages are keeping up with inflation **(1)** Accept any other appropriate response	**(3)**

Question Number	Indicative content	Mark
1(h)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Trade blocs are usually groups of countries in specific regions that manage and promote trade activities • This can result in more free trade between member countries • This can benefit member countries in the AfCFTA because they have access to a wider market which will consist of 1.2bn people • GDP for the trade bloc is expected to be $2.5 trillion. • Firms in the trade bloc may be able to exploit economies of scale or specialisation can occur • Prices may be cheaper due to a reduction of tariffs and quotas • Consumers may benefit with lower prices and/or greater choice of goods and services • Being a member of the AfCFTA trade bloc may attract increased FDI	**(6)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 6 of 19 · Question 1 part g · 3 marks

2021 JUN · Paper 02 · extract 2 of 4 · find part b in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, analyse the impact of inflation on individuals in a country such as China. Indicative content
4(b)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Inflation is the rate at which the general level of prices for goods and services is rising within an economy • The current inflation rate is 2.8%, an increase on the previous month, which reduces the purchasing power of consumers if wages do not keep up with inflation • This may make goods and services too expensive for many people • Many individuals might not be able to afford as much as they used to • Shoe leather costs may increase as consumers must shop around to find the best deals on food and other products due to the increase in the rate of inflation

Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 7 of 19 · Question 4 part b · 6 marks

2021 JUN · Paper 02 · extract 3 of 4 · find part b in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, evaluate the effectiveness of monetary policy in controlling inflation in a country such as China. Indicative content
4(c)	**AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)** **AO2 and AO3** • Monetary policy is the use of interest rates and control of the money supply to manage demand in the economy • Monetary policy can be used to reduce inflationary pressures in China by the PBOC increasing interest rates • An increase in interest rates tends to reduce spending and investment in the economy thus slowing down economic activity and reducing inflationary pressure • There might be a greater reward for saving which may discourage consumers from spending helping to reduce demand in the economy • A rise in interest rates may increase the value of the currency which could result in cheaper imports and therefore reduced inflation **AO4** • However, there can be time lags for the increase in interest rates to filter through the Chinese economy • Increasing interest rates may raise the cost of production for firms which may have an even greater negative impact on prices • The effectiveness will depend upon the type of inflation China is experiencing which seems to be cost push inflation due to the increases in the price of meat and fresh fruit • Demand is not totally dependent on interest rates and there are other factors that have an impact on inflation • Monetary policy can therefore conflict with economic growth and employment • There are other ways in which the Chinese Government could try and control inflation including supply-side policies • These could help to reduce inflationary pressures by helping the Chinese economy to produce more goods and services at all price levels

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 7 of 19 · Question 4 part b · 6 marks

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–4	• Demonstrates isolated elements of relevant knowledge and understanding; may lack development of relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Chain of reasoning may be attempted. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness. A judgement or conclusion is unlikely to be attempted (AO4).
Level 2	5–8	• Demonstrates partial selectivity and some accurate knowledge and understanding by developing some relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Chain of reasoning will be present but may be limited. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness. A judgement or conclusion is attempted, but may not be fully supported (AO4).
Level 3	9–12	• Demonstrates specific and accurate knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Chain of reasoning will be coherent and logical. Interpretation of economic information will be excellent with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness. A supported judgement or conclusion is present (AO4).

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 8 of 19 · Question 3 part a · 1 mark

2022 JUN · Paper 02 (regional R) · extract 1 of 7 · find part a in this mark scheme extract

3(a)	**AO1 1 mark** The only correct answer is: **C** The costs of searching for cheaper suppliers when inflation is high A is not correct because these are variable costs B is not correct because these are input costs D is not correct because these are menu costs	**(1)**

Question Number	**Answer**	Mark
3(b)	**AO1 1 mark** The only correct answer is: **D** Higher quality of domestic goods A is not correct because this would increase imports and reduce a surplus B is not correct because this would reduce the demand for exports and reduce a surplus C is not correct because it is would make imports cheaper and reduce a surplus	**(1)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 8 of 19 · Question 3 part a · 1 mark

2022 JUN · Paper 02 (regional R) · extract 2 of 7 · find part a in this mark scheme extract

Question Number	Explain one possible reason why the Kazakhstan Government introduced quotas on imports of wheat and flour. **Answer**	Mark
3(c)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • One reason is to protect domestic firms **(1).** By only allowing 200,000 tonnes and 70,000 tonnes of wheat and flour into the country **(1)** domestic producers may gain more market share **(1)** • One reason is higher revenue for domestic producers **(1).** By only allowing 200,000 tonnes and 70,000 tonnes of wheat and flour into the country **(1)** domestic producers might be able to increase supply to meet any shortages **(1)** Accept any other appropriate response.	**(3)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 8 of 19 · Question 3 part a · 1 mark

2022 JUN · Paper 02 (regional R) · extract 3 of 7 · find part a in this mark scheme extract

Question Number	Analyse the impact of deflation on consumer confidence in a country such as Singapore. **Indicative content**	Mark
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Deflation is a persistent fall in the general price level of goods and services/ when the inflation rate is negative • Consumer confidence is the outlook that consumers have towards the economy • In the case of Singapore, the prices of airfares and holidays have declined due to the government lockdown as people cannot travel and demand has fallen sharply • Changes in prices of goods and services often cause uncertainty and may influence the confidence of consumers • Changes in prices might make consumers more anxious and cautious • This results in a fall in consumer confidence as consumers worry about the state of the economy • In times of deflation consumers will postpone spending particularly on consumer durables such as holidays and cars • This is because consumers expect prices to fall even further or wait until the economy improves before buying goods	**(6)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 8 of 19 · Question 3 part a · 1 mark

2022 JUN · Paper 02 (regional R) · extract 5 of 7 · find part a in this mark scheme extract

Question Number	Assess the advantages of using benefit payments to redistribute income in a country such as the UK. **Indicative content**	Mark
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Benefit payments are payments given to people to ensure they have a minimum standard of living • These include benefits such as Universal Credit • Universal Credit involves giving money directly to people on no or low incomes • For example, people aged 25 and under can receive £342.72 and this can be used to pay for living costs • This will give those on low incomes a better living standard and the ability to be able to purchase basic necessities • Benefits can help to contribute to a more cohesive society and reduce inequality within a society by redistributing income • Benefit payments can help to reduce relative poverty in the UK **AO4** • However, using benefit payments may create a disincentive to work • Many families may face the poverty trap and are often better off on benefit payments than working • The cost of the benefit payments has to be borne by society so there is often an opportunity cost to a country from using benefit payments to redistribute income • There are other methods which might be more effective in redistributing income, such as progressive taxation or investment in education • The UK Government should use a combination of methods to reduce inequality and poverty	**(9)**

2(f)	**AO2 3 marks** Award 1 mark for right shift of demand curve, labelled Award 1 mark for higher equilibrium exchange rate, labelled Award 1 mark for higher equilibrium quantity, labelled  	**(3)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 10 of 19 · Question 2 part e · 3 marks

2022 JUN · Paper 02 · extract 4 of 5 · find part e in this mark scheme extract

Question Number	Assess the advantages of free trade to firms located within the EU. **Indicative content**	Mark
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Free trade is a situation in which goods and services coming into or going out of a country/trade area are not controlled or taxed • The new free trade area consists of over 770 million people and trades over €88bn in goods and €34bn in services every year • Firms located within the EU would be able to access a much wider market for its goods and services thereby increasing sales • Mercosur is removing tariffs on 91% of EU goods on items such as clothing, wine, chemicals and canned peaches • This means that any EU firm operating in these areas will be able to export to the Mercosur area without additional tariffs and could increase revenues • Expansion into a new trading bloc could help to reduce risk for EU firms if demand falls within the EU **AO4** • However, free trade also means that EU firms will face greater competition from firms within the Mercosur area • EU firms may have increased competition from cheaper, low-cost firms within the Mercosur area that may have lower wage costs compared to EU firms • The EU has agreed to end 92% of tariffs on goods from the Mercosur area • This may have a negative impact on EU farmers particularly those involved in the production of beef, sugar and chicken • The overall impact will depend on the quality and price of the products made within the EU compared to the products made in the Mercosur area	**(9)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

1(d)	**AO1 2 marks** Award 1 mark for reference to environmental damage and 1 mark for reference to economic activity Environmental damage **(1)** caused by factories making more goods/services **(1)** Accept any other appropriate response	**(2)**

Question Number	Calculate the **price in euros (€)** of a UK manufactured car priced at £15 000 when the exchange rate is £1 = €1.10. You are advised to show your working. **Answer**	Mark
1(e)	**AO2 2 marks** Award 1 mark for showing the calculation £15 000 x €1.10 **(1)** Award 1 mark for the correct answer = €16 500 **(1)** Award 2 marks if the correct answer €16 500 is shown, with € sign, even if no calculations are shown Award 1 mark if correct answer 16 500 is shown, but with no € sign, with or without calculations Do not award marks for the formula	**(2)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 11 of 19 · Question 1 part g · 3 marks

2023 JAN · Paper 02 (regional R) · extract 3 of 6 · find part g in this mark scheme extract

Question Number	Using the diagram below, draw the effects of the decrease in the tariff on the equilibrium price and quantity of US lobster imports into the EU. Label the new curve, the new equilibrium price and new equilibrium quantity. **Answer**	Mark
1(f)	**AO2 3 marks** Award 1 mark for rightward shift of supply, labelled Award 1 mark for lower equilibrium price, labelled Award 1 mark for higher equilibrium quantity, labelled  	**(3)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 11 of 19 · Question 1 part g · 3 marks

2023 JAN · Paper 02 (regional R) · extract 4 of 6 · find part g in this mark scheme extract

Question Number	Explain the impact of wages rising faster than inflation on a country such as Mexico. **Answer**	Mark
1(g)	**AO2 3 marks** Award 1 mark for identifying a relevant impact Award 1 mark for developing the impact Award 1 mark for the response being in context • The impact is that wages can buy more goods/services **(1)**. This is because wages are rising at a faster rate than prices in Mexico **(1).** This could result in increased pressure on the rate of inflation **(1)** • The impact is that firms could see fewer wage demands **(1)**. This is because wages are rising at a faster rate than prices in Mexico **(1)**. Employees would be less likely to require higher wages to maintain standards of living **(1)** Accept any other appropriate response	**(3)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 11 of 19 · Question 1 part g · 3 marks

2023 JAN · Paper 02 (regional R) · extract 5 of 6 · find part g in this mark scheme extract

Question Number	Analyse the impact of education and training on the productive potential of a country such as Vietnam. **Indicative content**	Mark
1(h)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Education and training are examples of supply-side policies designed to improve the productive potential of an economy • Investment in education and training in IT can help unemployed workers to acquire new skills so they can gain employment • Many unemployed workers lack the necessary skills needed to get a job, especially older workers who may need retraining to gain digital skills • Offering training courses in IT could help to reduce structural unemployment within Vietnam • A better educated and trained workforce could enable Vietnam to produce more goods and services using IT skills thus increasing the productive potential of the country	**(6)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 14 of 19 · Question 3 part b · 1 mark

2024 JUN · Paper 02 (regional R) · extract 4 of 6 · find part b in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the possible benefits for the Brazilian economy of introducing a tariff on tyres. **Indicative content**	Mark
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • A tariff is a tax on imported goods and services • The 16% tariff may have been introduced to protect the domestic tyre industry from foreign competition • By making imported tyres more expensive the tariff can make domestic tyres more competitive and help to support jobs in the domestic industry • The tariff may have been introduced to address trade imbalances • Brazil may be running a trade deficit therefore by increasing the cost of imports, the tariff can help to reduce imports • The 16% tariff may be to generate government revenue. The revenue generated from the tariff can be used to fund public services or pay off government debt **AO4** • However, tariffs can reduce competition in the tyre market as Brazilian producers have less incentive to improve quality and lower prices • This could lead to lower quality tyres being produced domestically and less innovation in the market • Other countries may respond to the tariff by imposing their own tariffs on Brazilian goods, leading to a trade war that could harm both countries' economies • This could lead to a decrease in the overall volume of trade and a reduction in economic growth • A tariff on imported tyres would likely result in higher prices for consumers • As the cost of imported tyres increases Brazilian tyre producers may also increase their prices leading to higher prices for all types of tyres	**(9)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

2024 NOV · Paper 02 · extract 4 of 6 · find part h in this mark scheme extract

Question Number	Explain **one** reason why governments use fines. **Answer**	Mark
1(g)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • One reason is that it can deter individuals/firms from breaking the law **(1).** Very high fines of $1m will negatively affect the individuals/firms **(1)** this is likely to encourage individuals/firms to make sure they follow the law so people do not get injured **(1)** • One reason is that it can raise revenue for the government **(1).** Fines imposed on firms that break laws can be very high **(1)** and can give the government money to spend on compensating people affected by laws being broken **(1)** Accept any other appropriate response	**(3)**

Question Number	With reference to the data above and your knowledge of economics, analyse how high levels of cost-push inflation affect business confidence in a country such as Türkiye. **Indicative content**	Mark
1(h)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Higher energy costs of 157.2% can raise production and transportation costs resulting in an increase in raw material prices and overall costs of production • Higher production costs can lead to lower profits for firms in Türkiye • This is because firms may not be able to pass on the full cost of inflation to consumers in the form of higher prices reducing business confidence • When costs rise faster than firms can adjust their prices, profit margins get squeezed reducing business confidence • Firms may struggle to plan for the future. This is because they are not sure what energy prices will be like in the future causing uncertainty • This uncertainty can erode business confidence as firms are unsure about the future success of their operations	**(6)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

2025 JUN · Paper 02 (regional R) · extract 2 of 6 · find part d in this mark scheme extract

Question Number	Explain **one** possible disadvantage of having a fiscal deficit for a country such as the US. **Answer**	Mark
3(c)	**AO2 3 marks** Award 1 mark for identifying a relevant disadvantage Award 1 mark for developing the disadvantage Award 1 mark for the response being in context • One disadvantage is a fiscal deficit can lead to a higher national debt. **(1)** The US Government will have to pay more in interest on the debt **(1)** therefore leaving less available for public services such as education/healthcare **(1)** • One disadvantage is that taxes might increase to cover the debt. **(1)** Increasing taxes can reduce disposable income for households and firms. **(1)** This reduction in spending and investment can slow down economic growth **(1)** Accept any other appropriate response	**(3)**

Question Number	With reference to the data above and your knowledge of economics, analyse the possible impact of rising inflation on shoe leather costs for consumers in the UK. **Indicative content**	Mark
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Rising inflation reduces the purchasing power of consumers • As prices increase, consumers are likely to spend more time shopping around for better deals and discounts to stretch their budgets • This involves visiting multiple stores or browsing various online retailers thereby increasing shoe leather costs • With inflation rising to 4% in December 2023, consumers may find themselves making more frequent trips to banks • The effect of rising inflation on shoe leather costs is particularly significant for low-income consumers • These individuals may not have easy access to banking services • This makes them more vulnerable to the negative impacts of inflation and significantly increases shoe leather costs for consumers	**(6)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 16 of 19 · Question 3 part d · 6 marks

2025 JUN · Paper 02 (regional R) · extract 3 of 6 · find part d in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Answer 16 of 19 · Question 3 part d · 6 marks

2025 JUN · Paper 02 (regional R) · extract 4 of 6 · find part d in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess how effective monetary policy might be in decreasing unemployment for a country such as France. **Indicative content**	Mark
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • With GDP growth expected to remain low, reducing interest rates could further stimulate economic activity, leading to business expansion and job creation, thereby potentially reducing the high level of unemployment • As consumer spending is expected to improve in the coming years, lower interest rates would increase this effect by making borrowing cheaper, stimulating demand for goods and services, and hence encouraging firms to hire more employees • Reducing interest rates from 4.5% would make loans cheaper for firms to invest in expansion and job creation leading to further economic growth • Despite a weak outlook for China, lowering interest rates could weaken the currency, making French exports more competitive, supporting industries reliant on exports and their employment rates **AO4** • However, France's significant trade relations with Germany and reliance on global markets like China mean external economic slowdowns could dampen the effectiveness of monetary policy in reducing unemployment • The high level of unemployment suggests there may be deeper structural issues in the labour market that monetary policy alone cannot address • With the current rate at 4.5%, there might be limited room for the ECB to lower rates further, especially if they need to balance other economic objectives such as inflation, limiting the impact on employment • Monetary policy changes often have a lagged effect on the economy, meaning any potential benefits in reducing unemployment might not materialise quickly • Lower interest rates might result in capital flowing out of France seeking higher returns elsewhere, which could reduce domestic investment and job creation	**(9)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Question Number	Calculate, to two decimal places, the **percentage of the population employed** on small cocoa farms in Ghana in 2024. You are advised to show your working. **Answer**	Mark

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 17 of 19 · Question 3 part d · 6 marks

2025 JUN · Paper 02 · extract 1 of 5 · find part d in this mark scheme extract

	Answer	
3(a)	**AO1 1 mark** The only correct answer is: **B** They reduce overall pollution by setting emission limits A is not correct because pollution permits are designed to cap emissions at a certain level C is not correct because firms must adhere to the limits set by pollution permits or face penalties D is not correct because pollution permits encourage the use of clean energy to reduce the need for permits	**(1)**

Question Number	An economy has a national output of €300bn and its current account deficit is €15bn. What is the current account deficit as a percentage of national output? **Answer**	Mark
3(b)	**AO2 1 mark** The only correct answer is: **C** 5% A is not correct because this is €15bn/€300bn B is not correct because this is €300bn - €15bn/100 D is not correct because this is €300bn/€15bn	**(1)**

Question Number	Explain **one** reason why some people might suffer from structural unemployment in a country such as China. **Answer**	Mark
3(c)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • One reason is having the wrong skills **(1).** Young graduates have skills for higher skilled jobs rather than lower skilled jobs **(1)** therefore they cannot find jobs that match their qualifications **(1)** Accept any other appropriate response	**(3)**

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 17 of 19 · Question 3 part d · 6 marks

2025 JUN · Paper 02 · extract 2 of 5 · find part d in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, analyse the possible impact of rising inflation on menu costs for small firms in the UK. **Indicative content**	Mark
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • With inflation at 4%, the cost of inputs such as raw materials, labour and energy is likely to increase for small firms • To maintain margins, these firms might need to pass these costs onto consumers, necessitating regular price updates and thereby increasing menu costs • With inflation rising, firms may need to adjust their prices more frequently to keep up with increasing costs for raw materials, labour and other expenses • This means more frequent updates to menus, price lists and advertising materials leading to higher menu costs • This can be particularly challenging for small firms with limited resources	**(6)**

Level	Mark	Descriptor

Type MS · Effects of inflation and deflation, including menu and shoe leather costs

Answer 17 of 19 · Question 3 part d · 6 marks

2025 JUN · Paper 02 · extract 3 of 5 · find part d in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess whether lower income tax rates will encourage more people to work in a country such as Italy. **Indicative content**	Mark
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Reducing income tax rates to 23% and 33% may motivate people to work additional hours or seek better-paying jobs, knowing they will keep more of their income • More favourable tax conditions might encourage those not currently working, including young people, to enter the workforce • With less income going to taxes, individuals might be willing to work more hours or take on additional jobs, increasing overall labour supply • Lower taxes might attract skilled workers from abroad boosting productivity and innovation in the Italian workforce • As firms benefit from individuals having more disposable income and potentially investing, this can lead to job creation, further encouraging employment **AO4** • However, reducing taxes might lead to a significant loss in government revenue, affecting public services and investment • Less tax revenue could mean cuts to crucial public services like healthcare, education or infrastructure affecting the quality of life for the citizens of Italy • The higher rate of income tax remains at 43% meaning those with the highest incomes may not feel incentivised to work harder • While there might be immediate boosts to the economy, the long-term effects of reduced government revenue could lead to economic challenges • Other factors like job availability, wages, working conditions and childcare may have a more substantial impact on employment decisions than tax rate changes	**(9)**

2025 NOV · Paper 02 · extract 5 of 7 · find part a in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the advantages of multinational corporations (MNCs) for the countries in which they operate. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • MNCs such Levi Strauss & Co can create employment opportunities, improving the standard of living for workers in countries where they operate • Worker well-being programmes can enhance the health, education and financial stability of employees, leading to a more productive workforce • MNCs often bring advanced technology and management practices to host countries, contributing to economic development and skill enhancement • Many MNCs invest in infrastructure such as roads in the countries in which they operate in order to get goods to market • The presence of MNCs can increase tax revenues for the host country's governments, which can be used for public services and infrastructure development • MNCs may engage in sustainable practices, such as water conservation and reducing greenhouse gas emissions, benefiting the local environment **AO4** • However, MNCs might prioritise profits over the welfare of local workers, potentially leading to poor working conditions despite well-being programmes • Local businesses may struggle to compete with large MNCs, which can limit the growth of domestic industries • MNCs could exploit natural resources or contribute to environmental degradation, despite some efforts at sustainability • The economic benefits of MNCs might be unevenly distributed, with most profits flowing back to the MNC's home country rather than staying in the host country • MNCs might influence local governments and policies in ways that favour their interests over those of the local population • Some MNCs might move profits abroad rather than invest in the countries in which they operate

2023 JUN · Paper 02 (regional R) · extract 2 of 4 · find part b in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, analyse the possible impact of rising inflation on exports for a country such as the Netherlands. Indicative content	Mark
4(b)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Inflation is a sustained increase in the general price level in an economy • Figure 5 shows that inflation has steadily increased since January 2021 when it was 1.6% to 5.2% in November 2021 • This is a significant increase in the rate of inflation over a short period of time • Higher rates of inflation in the Netherlands could result in the rising price of its exports • This could result in lower demand for exports resulting in a negative impact on the current account • This could be the case if inflation rates are much lower in other countries compared to the Netherlands • Firms that export may struggle to survive with higher rates of inflation	**(6)**

Level	Mark	Descriptor

Answer 19 of 19 · Question 4 part b · 6 marks

2023 JUN · Paper 02 (regional R) · extract 3 of 4 · find part b in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, evaluate the effectiveness of using pollution permits to protect the environment of a country such as the Netherlands. Indicative content	Mark
4(c)	**AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)** **AO2 and AO3** • Business activity can damage the environment as it has done in Ijmuiden in the Netherlands causing poor air quality in the area from dust • Pollution permits can be used as a market based scheme aimed at reducing pollution and trying to encourage firms to reduce the quantity of pollution they create • Pollution permits involve giving firms such as Tata Steel a legal right to pollute up to a certain amount • If a steelworks produces less pollution/waste than it is permitted to do so it can sell its pollution permits to other steel manufacturers • Permits therefore create a financial incentive to pollute less because firms such as Tata Steel can then sell their excess permits to other firms • It can be a good way to reduce pollution, using the incentives of the market **AO4** • However, in practice, pollution permits can be difficult to implement • It is difficult to know how many permits to give out to firms in the Netherlands • If the government is too generous in the level of pollution permits it issues to firms such as Tata Steel, there will be little pollution reduction • If the government is too strict in the amount of pollution permits it issues to firms such as Tata Steel it may complain it adversely affects output because they cannot comply and because Tata Steel is a major employer and provides many jobs, unemployment may rise • There are alternatives to pollution permits which may be more effective such as fining the steelworks on the amount of waste produced or using taxation which could then be used to tackle air pollution caused by the steelworks • A combination of measures may be the most effective way to protect the environment	**(12)**
