Type MS · Draw a change in a currency's exchange rate

Answer 1 of 9 · Question 2 part f · 3 marks

2022 JUN · Paper 02 · extract 1 of 5 · find part f in this mark scheme extract

2(a)	**AO1 1 mark** The only correct answer is: **D** integration and interdependence of national economies A is not correct because globalisation encourages trade and specialisation B is not correct because trade barriers should be reduced C is not correct because increased globalisation reduces the need for national legislation	**(1)**

Question Number	**Answer**	Mark
2(b)	**AO1 1 mark** The only correct answer is: **B** An increase in environmental damage A is not correct because unemployment should fall due to more jobs being available in the economy C is not correct because investment is likely to increase due to economic growth and firms expanding D is not correct because tax revenues are likely to rise as more people have jobs/ firms are making more profit	**(1)**

Question Number	State one type of unemployment. **Answer**	Mark
2(c)	**AO1 1 mark** Award 1 mark for **one** type. • cyclical • structural • seasonal • voluntary • frictional Accept any other appropriate responses.	**(1)**

Type MS · Draw a change in a currency's exchange rate

Answer 1 of 9 · Question 2 part f · 3 marks

2022 JUN · Paper 02 · extract 2 of 5 · find part f in this mark scheme extract

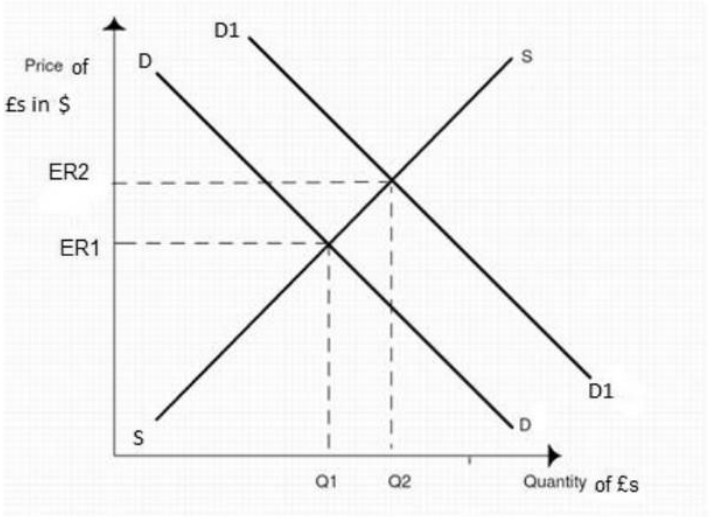

Question Number	What is meant by the term recovery? **Answer**	Mark
2(d)	**AO1 2 marks** Award 1 mark for reference to the economic cycle/recession and 1 mark for reference to increase in economic activity A phase in the economic cycle **(1)** where GDP starts to rise again/when consumers start to regain confidence/economic activity is on the increase **(1)** Accept any other appropriate response.	**(2)**

Question Number	Explain one impact of rising inflation on shoe leather costs for Nigeria. **Answer**	Mark
2(e)	**AO2 3 marks** Award 1 mark for identifying a relevant impact Award 1 mark for developing the impact Award 1 mark for the response being in context • One impact is that shoe leather costs may increase **(1).** Consumers will try to find cheaper bread and meat **(1).** This means that they will spend more time shopping around and looking for goods **(1)** Accept any other appropriate response.	**(3)**

Type MS · Draw a change in a currency's exchange rate

Answer 1 of 9 · Question 2 part f · 3 marks

2022 JUN · Paper 02 · extract 3 of 5 · find part f in this mark scheme extract

Question Number	Draw the effects on the exchange rate of the UK pound (£) from an increase in exports to the US. Label the new curve, the new equilibrium exchange rate and the new equilibrium quantity. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for right shift of demand curve, labelled Award 1 mark for higher equilibrium exchange rate, labelled Award 1 mark for higher equilibrium quantity, labelled  	**(3)**

Type MS · Draw a change in a currency's exchange rate

Answer 1 of 9 · Question 2 part f · 3 marks

2022 JUN · Paper 02 · extract 4 of 5 · find part f in this mark scheme extract

Question Number	Assess the advantages of free trade to firms located within the EU. **Indicative content**	Mark
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Free trade is a situation in which goods and services coming into or going out of a country/trade area are not controlled or taxed • The new free trade area consists of over 770 million people and trades over €88bn in goods and €34bn in services every year • Firms located within the EU would be able to access a much wider market for its goods and services thereby increasing sales • Mercosur is removing tariffs on 91% of EU goods on items such as clothing, wine, chemicals and canned peaches • This means that any EU firm operating in these areas will be able to export to the Mercosur area without additional tariffs and could increase revenues • Expansion into a new trading bloc could help to reduce risk for EU firms if demand falls within the EU **AO4** • However, free trade also means that EU firms will face greater competition from firms within the Mercosur area • EU firms may have increased competition from cheaper, low-cost firms within the Mercosur area that may have lower wage costs compared to EU firms • The EU has agreed to end 92% of tariffs on goods from the Mercosur area • This may have a negative impact on EU farmers particularly those involved in the production of beef, sugar and chicken • The overall impact will depend on the quality and price of the products made within the EU compared to the products made in the Mercosur area	**(9)**

Type MS · Draw a change in a currency's exchange rate

Answer 1 of 9 · Question 2 part f · 3 marks

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Type MS · Draw a change in a currency's exchange rate

Answer 5 of 9 · Question 2 part f · 3 marks

2023 NOV · Paper 02 · extract 4 of 6 · find part f in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the disadvantages of higher business tax rates on investment in a country such as the UK. **Indicative content**	Mark
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Business tax is a direct tax on the profit of a firm • Business tax rates in the UK have increased from 19% to 25% in April 2023 • Increasing business tax rates by such a large percent (6%) may result in less tax revenue for the UK Government if firms do not locate in the UK or if UK firms relocate to the US • The US has a much lower tax rate of 21% in comparison to the UK which could be very attractive to MNCs • Firms such as Associated British Foods will have to pay £20m more in taxation • This could result in the firm having less to invest in the UK economy • This is likely to result in a negative impact on GDP and employment if many firms have less profit to invest and expand in the UK **AO4** • However, increases in business tax rates can help provide the UK Government with an additional £18bn in tax revenue • This could be used by the UK Government to invest into public services for the UK population which might offset any reductions in investment by the private sector • The UK's tax rate of 25% is comparable to China and France and is still significantly lower than Germany's 30% tax rate • This could mean that the impact of the higher rates of business tax is minimal • The level of investment is affected by a range of factors, such as business confidence and not just the rate of business taxes in a country	**(9)**

Question Number	Explain **one** benefit of asset purchasing by a central bank such as the ECB. **Answer**	Mark
2(e)	**AO2 3 marks** Award 1 mark for identifying a relevant benefit Award 1 mark for developing the benefit Award 1 mark for the response being in context • One benefit is that this can lead to higher levels of consumer and business spending **(1).** Purchasing assets injects money into the economy **(1)** which can stimulate economic growth **(1)** • One benefit is (aggregate) demand will increase **(1)** because of the increase in the flow of money from central banks to commercial banks **(1).** This extra money can be loaned to consumers and firms **(1)** Accept any other appropriate response	**(3)**

Question Number	Using the diagram below, draw the likely effect of this rise in UK interest rates on the equilibrium exchange rate of the UK pound (£) against the euro (€). Label the new curve, the new equilibrium exchange rate and the new equilibrium quantity. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for a rightward shift of demand, labelled Award 1 mark for a higher equilibrium exchange rate, labelled Award 1 mark for a higher equilibrium quantity, labelled  	**(3)**

Type MS · Draw a change in a currency's exchange rate

Answer 6 of 9 · Question 2 part f · 3 marks

2024 JUN · Paper 02 (regional R) · extract 4 of 6 · find part f in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess how a recovery may affect unemployment for a country such as China. **Indicative content**	Mark
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The recovery phase follows a recession and is marked by an increase in economic activity • As Chinese firms begin to recover from the downturn, they may increase production and hire more workers, particularly in the services and construction sectors, to meet the rising demand for goods and services • This can lead to an increase in job creation and a decrease in unemployment • During the recovery phase consumer confidence may increase leading to higher consumer spending and further stimulating economic growth • This can also lead to increased job creation as Chinese firms respond to the higher demand for their products or services • As the Chinese economy improves and consumer demand increases, there may be more opportunities for individuals to start their own firms and create jobs for themselves and others **AO4** • However, there are also potential challenges to job creation during the recovery phase • Chinese firms may be hesitant to hire new workers if they are concerned about the sustainability of the recovery or uncertain about future economic conditions • The 5% economic growth target might not be achieved and some analysts expect the growth in exports to be temporary • During the recovery phase, firms may take advantage of the improving economic conditions to invest in new technologies or automation that could replace some jobs with machines • This could lead to job losses in certain sectors or industries • Some sectors of the Chinese economy may recover more slowly than others so unemployment may not fall in all sectors of the economy	**(9)**

Answer 6 of 9 · Question 2 part f · 3 marks

2024 JUN · Paper 02 (regional R) · extract 5 of 6 · find part f in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Type MS · Draw a change in a currency's exchange rate

Answer 6 of 9 · Question 2 part f · 3 marks

2024 JUN · Paper 02 (regional R) · extract 6 of 6 · find part f in this mark scheme extract

Question Number	What is the fiscal deficit/surplus? **Answer**	Mark

Type MS · Draw a change in a currency's exchange rate

Answer 7 of 9 · Question 2 part f · 3 marks

2024 NOV · Paper 02 · extract 1 of 6 · find part f in this mark scheme extract

2(a)	**AO1 1 marks** The only correct answer is: **A** Appreciation B is not correct because this is when there is a fall in the value of the exchange rate C is not correct because this is when a government fixes a new higher exchange rate D is not correct because this is when a government fixes a new lower exchange rate	**(1)**

Question Number	Which **one** of the following is a reason for why there is protection for international trade? **Answer**	Mark
2(b)	**AO1 1 mark** The only correct answer is: **C** To protect domestic jobs A is not correct because trade protection aims to stop dumping B is not correct because trade protection reduces free trade D is not correct because trade protection should help to reduce the current account deficit	**(1)**

Question Number	State **one** possible impact of globalisation on consumers. **Answer**	Mark
2(c)	**AO1 1 mark** Award 1 mark for **one** possible impact • Rising living standards • Greater choice • Lower prices • Dangerous products Accept any other appropriate response	**(1)**

Type MS · Draw a change in a currency's exchange rate

Answer 7 of 9 · Question 2 part f · 3 marks

2024 NOV · Paper 02 · extract 2 of 6 · find part f in this mark scheme extract

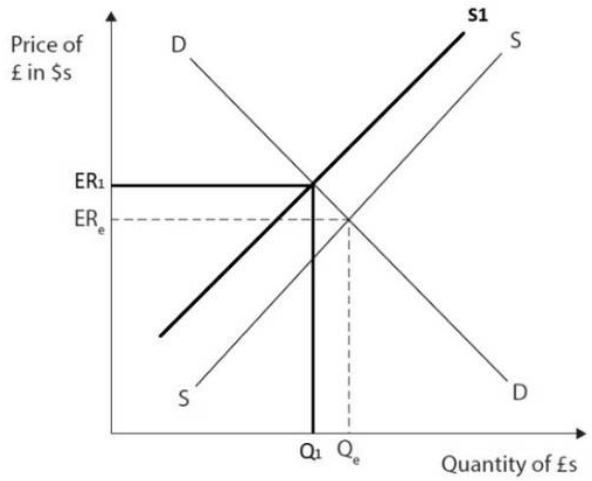

Question Number	What is meant by the term asset purchasing? **Answer**	Mark
2(d)	**AO1 2 marks** Award up to 2 marks for a correct definition When a central bank buys government bonds/financial assets **(1)** from commercial banks **(1)** Accept any other appropriate response	**(2)**

Question Number	Explain **one** reason why there might be a trade-off between economic growth and environmental protection for an economy such as China. **Answer**	Mark
2(e)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • One reason is that environmental protection can increase the cost of doing business **(1).** Firms may need to invest in new equipment/technologies to reduce emissions **(1)** which may result in slower economic growth **(1)** • One reason is that more environmental protection such as restrictions may limit business activity **(1)** to reduce emissions/pollution from factories **(1)**, which could lead to lower economic growth **(1)** Accept any other appropriate response	**(3)**

Question Number	Using the diagram below, draw the likely effect of a decrease in imports from the US on the equilibrium exchange rate of the UK pound (£) against the US dollar ($). Label the new curve, the new equilibrium exchange rate and the new equilibrium quantity. **Answer**	Mark
2(f)	**AO2 3 marks** Award 1 mark for a leftward shift of the supply curve, labelled Award 1 mark for a higher equilibrium exchange rate, labelled Award 1 mark for a lower equilibrium quantity, labelled  **Figure 3**	**(3)**

Type MS · Draw a change in a currency's exchange rate

Answer 7 of 9 · Question 2 part f · 3 marks

2024 NOV · Paper 02 · extract 4 of 6 · find part f in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the possible impact of the introduction of AI on the levels of structural unemployment. **Indicative content**	Mark
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Structural unemployment is caused by a mismatch between the skills that workers in the economy can offer and the skills demanded of workers by employers • In the case of the introduction of AI, this could be caused by the introduction of new technology • AI can perform repetitive and routine tasks more efficiently and accurately than humans • As a result, jobs that involve tasks like data entry, basic coding or even certain aspects of journalism may be automated, leading to the replacement of workers in these industries • This can contribute to higher levels of structural unemployment rates among workers in these types of job roles which can be seen in the planned job cuts at IBM and BT • Some workers may not have the necessary skills for the new jobs being created in the AI and technology sector resulting in an increase in structural unemployment **AO4** • However, while AI can eliminate certain jobs, it can also create new job opportunities • For example, the development, maintenance and running of AI systems require skilled IT professionals • New industries and job roles related to AI and technology may emerge potentially absorbing some of the unemployed workers • AI can boost productivity and efficiency in various sectors potentially leading to economic growth • A growing economy can create more job opportunities in non-routine and creative roles that are less susceptible to AI • AI and new technology have enabled an increase in remote work/working from home which can expand job opportunities for individuals	**(9)**

Answer 8 of 9 · Question 2 part f · 3 marks

2025 JUN · Paper 02 · extract 4 of 6 · find part f in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the possible benefits for the South Korean car industry from the removal of tariffs by the Philippines. **Indicative content**	Mark
2(g)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The removal of a 5% import tariff on Korean cars makes them cheaper and more competitive against other foreign brands in the Philippines, potentially increasing market share • With tariffs gone, it is likely that more Korean cars will be exported to the Philippines, benefiting manufacturers through increased sales and revenue • Accessing the large and growing Philippine market, which has the 12th largest population and is a significant car importer, offers a substantial expansion opportunity for Korean car makers • Increased car exports to the Philippines can contribute to economic growth and job creation in South Korea's car industry **AO4** • However, with Japanese cars dominating 82.5% of the Philippine market, Korean cars might still struggle to significantly penetrate or compete, even without tariffs • The removal of tariffs may lead to increased competition from domestic car manufacturers in the Philippines, making it harder for Korean cars to gain market share • Filipino consumers might prefer other brands or have a strong brand loyalty to existing cars, making it difficult for Korean cars to penetrate the market • Philippine car manufacturers might retaliate against the influx of cheaper Korean cars • Exchange rate fluctuations could affect the profitability and pricing of Korean cars in the Philippines	**(9)**
