Block practice · Externalities, the public sector and privatisation

Work through each question type in order. Each section has a worked-example retry and all further practice. Attempt only the part outlined in red.

Mixed economy and the public and private sectors

Market failure, public goods and free riders

External costs and external benefits

Social costs and social benefits formulas

Privatisation: effects on stakeholders and the economy

Taxes, subsidies and parks to protect the environment

Regulation, fines and pollution permits

OLevels.com SCHOOL

Practice workbook · Mixed economy and the public and private sectors

Meaning of mixed economy and of the public and private sectors, how they differ in ownership, control and aims, and the benefits and costs of public sector provision.

11 question parts: 1 worked-example retry and 10 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

Worked-example retry · Attempt part h only.

Some governments have made the creation of outdoor areas or parks a priority in order to help reduce health issues, such as obesity. Studies have shown that having access to such areas encourages physical exercise that can also benefit mental wellbeing.

However, funding for such projects is not always available or the parks become too crowded. This means fewer people can benefit from these outdoor areas.

(h) With reference to the data above and your knowledge of economics, assess the benefits of the public sector providing outdoor areas or parks.

Who should have the flu injection?

Flu is an unpredictable virus that can cause mild or unpleasant illness in most people. It can cause severe illness and even death among vulnerable groups, including older people, pregnant women and people with other health problems. These groups may, therefore, receive a free vaccination in the UK, to ensure they are protected against the virus. Although most people receive their vaccination from a public sector doctor, the UK Government has to pay private sector pharmacies to also provide this service. The cost to the UK Government of funding these vaccinations is over £100m per year.

(Source: adapted from https://www.nhs.uk/conditions/vaccinations/who-should-have-flu-vaccine/)

(f) Explain **one** possible reason why the UK Government pays private sector pharmacies to provide the flu vaccination.

An investigation has taken place in the US to determine whether a number of pharmaceutical firms used collusion to divide sales between themselves so each firm received higher profits. One example of the price fixing meant a tablet sold for $4.70 when the price should have been $0.13. The firms have rejected the accusations, saying there is a lack of evidence to prove anti-competitive behaviour.

(Source adapted from: https://www.washingtonpost.com/business/economy/investigation-of-generic-cartel-expands-to-300-drugs/2018/12/09/fb900e80-f708-11e8-863c-9e2f864d47e7_story.html?noredirect=on&utm_term=.3c2a12983985)

More than half of Cambodia's 6,000 km of roads have been classified as 'of poor quality' by the Ministry of Public Works and Transport. As business grows in the country, drivers overload their trucks, which leads to safety issues and greater damage to the roads. A higher level of investment is needed from the government to repair damage and to build new roads which would need less maintenance.

(Source adapted from: http://www.phnompenhpost.com/business/cambodia-facing-dilemma-plan-give-roads-facelift)

(e) With reference to the data above and your knowledge of economics, assess the extent to which high levels of public sector investment to improve the roads may benefit the Cambodian economy.

2022 JUN · Paper 01 (regional R)

Further practice · Attempt part b only.

Instagram, WhatsApp and Facebook Messenger are social network messaging services, taken over and owned by Facebook. Between them, they have more than 2.6 billion users. Although they currently operate as stand-alone apps, Facebook's chief executive, Mark Zuckerberg, has now taken greater control of all three. He has plans to combine the services, allowing messages to be sent between the different apps.

Both Instagram and WhatsApp have grown considerably since the takeover but their original founders have left due to the increased control from Facebook. Some employees are unhappy and do not understand the planned changes to the services. However, Zuckerberg thinks there will be long-term benefits including reduced costs. He says that less software will be needed once the system is in place and consumers will be less likely to use competitors' apps.

(Source adapted from: https://www.nytimes.com/2019/01/25/technology/facebook-instagram-whatsapp-messenger.html)

(c) With reference to the data above and your knowledge of economics, evaluate whether Zuckerberg's decision to combine all three services is likely to lead to economies of scale.

In January 2025, the Western Australian Government announced plans to invest AU$107m to expand the Swan River ferry network. The river is 72 km long and a major waterway, connecting many areas in its capital city, Perth.

The plan would have five new electric ferries built by local firms. Each ferry has the ability to transport more than 130 passengers per trip. In addition, there would be two new stops along the river, one close to a bus depot and one to enable easier access to the University of Western Australia.

Local sailing clubs were concerned about safety from the addition of ferry services into areas used by smaller boats. Meanwhile, politicians opposed to the addition said that creating extra parking for ferry customers may cause problems.

(c) With reference to the data above and your knowledge of economics, evaluate the extent to which public sector investment may benefit the economy of Western Australia.

2022 JUN · Paper 01

Worked-example retry · Attempt part b only.

The English city of Kingston upon Hull has an independent telecoms network known as Kingston Communications (KCOM). It is the only provider serving the city and its surrounding towns and villages. People living there do not have many broadband options. The network remained independent when most others joined together to become British Telecom (BT) and it has remained as a separate company to this day.

As well as broadband, KCOM also offers home phone and mobile deals which are available at a discounted price when purchased together. It will soon offer high-quality television packages. Its broadband is fast, with fibre optic packages which can reach impressive speeds of up to 250 Mb. However, these are not available everywhere in the region and KCOM's packages are more expensive than those in the rest of the country. This is especially true as they have low download limits.

(Source adapted from: https://www.broadbandchoices.co.uk/guides/broadband/hull-broadband)

(c) With reference to the data above and your knowledge of economics, evaluate whether a monopoly such as KCOM is always bad for the consumer.

Polluted air is said to cause over 1,000 deaths each year in Greater Manchester, UK. To reduce the problem, an 800 km^2 'Clean Air Zone' (CAZ) has been proposed, where drivers of certain vehicles would have to pay between £7.50 and £60.00 each day they drive on roads in the region.

All lorries, buses, taxis and vans that do not meet the emission standards will be affected. It is hoped the tax will encourage vehicle owners to drive vehicles that are more environmentally friendly.

However, small business owners in particular will be affected by the proposals. An ice-cream business, established over 100 years ago, stated costs would increase by £29 000 a year for its vans to use roads in the region. It cannot afford to replace them and like many other firms risks going out of business.

(c) With reference to the data above and your knowledge of economics, evaluate the effectiveness of government regulations in dealing with externalities such as air pollution in Greater Manchester.

Twitter, one of the most popular social media platforms, was bought for $44bn by entrepreneur Elon Musk in 2022.

The aims of Elon Musk include the creation of an 'everything app' – a platform that includes messaging, payments, ridesharing, food delivery and more. To support this, Elon Musk introduced major changes to Twitter, including renaming it 'X'.

The number of X users increased to a new high of 530 million by 2023, following an increase in publicity about the change of name. This meant X did not need to pay high advertising costs to promote the platform.

Advanced technology will be introduced by X to enable users to operate multiple functions on the new platform. This research and development is likely to lead to a significant cost for the firm.

The platform has experienced a decrease of 65% in advertising revenue. Thousands of workers have already lost their jobs, including those in managerial roles.

(c) With reference to the data above and your knowledge of economics, evaluate whether X is likely to benefit from economies of scale.

Who should have the flu injection?

Flu is an unpredictable virus that can cause mild or unpleasant illness in most people. It can cause severe illness and even death among vulnerable groups, including older people, pregnant women and people with other health problems. These groups may, therefore, receive a free vaccination in the UK, to ensure they are protected against the virus. Although most people receive their vaccination from a public sector doctor, the UK Government has to pay private sector pharmacies to also provide this service. The cost to the UK Government of funding these vaccinations is over £100m per year.

(Source: adapted from https://www.nhs.uk/conditions/vaccinations/who-should-have-flu-vaccine/)

(f) Explain **one** possible reason why the UK Government pays private sector pharmacies to provide the flu vaccination.

Who should have the flu injection?

Flu is an unpredictable virus that can cause mild or unpleasant illness in most people. It can cause severe illness and even death among vulnerable groups, including older people, pregnant women and people with other health problems. These groups may, therefore, receive a free vaccination in the UK, to ensure they are protected against the virus. Although most people receive their vaccination from a public sector doctor, the UK Government has to pay private sector pharmacies to also provide this service. The cost to the UK Government of funding these vaccinations is over £100m per year.

(Source: adapted from https://www.nhs.uk/conditions/vaccinations/who-should-have-flu-vaccine/)

(f) Explain **one** possible reason why the UK Government pays private sector pharmacies to provide the flu vaccination.

Technology has been used to perform some of the jobs previously done for many years by humans, for example, robots in factories and self-checkout machines. This substitution of capital for labour is likely to increase as technology advances. At most call centres, humans currently respond to customer queries but Google has developed an automated assistant. Many telecom firms have switched to using calls made by these automated assistants.

(d) With reference to the data above and your knowledge of economics, analyse how the demand for labour might be affected by the use of machines.

There are many reasons for firework displays. The 'bang', 'pop' and 'whizz' sounds, along with wide-ranging displays of colourful sparks are used to celebrate religious festivals and historical occasions, as well as private and public events. Some events charge an entry fee but people are still able to see and hear the fireworks without entering the venues. Former military personnel have complained this can bring back negative memories relating to war experiences. It can also disturb animals that are frightened by the loud noises.

(e) With reference to the data above and your knowledge of economics, assess whether fireworks have more negative than positive externalities.

Simona owns a hairdressing business in Romania. She charges low prices and makes no charge when customers arrive late for appointments or make very late cancellations. She thinks customer care is more important than making a profit.

However, some customers have complained at having to wait weeks before an appointment is available. As a result, Simona has lost customers. This has caused financial problems in repaying a loan to the bank.

In response, Simona is considering increasing her prices and charging a fee to those who arrive late or cancel without suitable notice.

(e) With reference to the data above and your knowledge of economics, assess the benefits to Simona of making these changes.

In 2021, the Indonesian Government spent 9.4% of its budget on healthcare. By 2027, healthcare spending will more than double on a per capita basis from $114 to $269.

This increase is due to an improvement in Indonesia's economic growth. The growth is partly because more people in other countries want to buy goods and services made in Indonesia.

(e) With reference to the data above and your knowledge of economics, assess the benefits to Indonesia of the government increasing its healthcare spending.

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

In October 2023, the UK Government introduced more regulations to tackle the problem of litter and to protect the environment from a range of single-use plastic items.

No firm in the food industry will now be able to sell single-use plastic cutlery, polystyrene cups, plastic plates and food containers in England.

Research shows people across England use 2.7 billion items of mostly plastic single-use cutlery and 721 million single-use plates every year, but only 10% of these are recycled.

Plastic pollution takes hundreds of years to break down and causes serious damage to oceans, rivers and land. It is a source of greenhouse gas emissions, from its production and manufacture to the way it is disposed of.

(c) With reference to the data above and your knowledge of economics, evaluate the possible advantages of using regulation to protect the environment for a country such as the UK.

During the last six years, the government budget of Slovenia has raised almost €1bn in revenue from the privatisation of public sector assets. Most recently was the sale of 65% of the government shares in NLB Bank. The money raised from the sales was mostly transferred to the government budget and used for various purposes. These included the repayment of public sector debt and the long-term stability of the Slovenian pension system.

(Source adapted from: https://www.total-slovenia-news.com/business/2564-privatisation-in-slovenia-has-raised-almost-1bn-since-2012)

(d) With reference to the data above and your knowledge of economics, analyse the possible benefits of privatisation for the Slovenian Government.

Canada Child Benefit (CCB) payments get a boost

In 2018, the monthly tax-free welfare benefit for children was increased to match the cost of living in Canada.

The amount a family receives is calculated based on income. As a family's income rises the amount of benefits decrease. Some higher income households do not receive the benefit at all. The CCB has distributed more than CAD$23.3bn to around 3.7 million Canadian families, and has helped to remove more than 300,000 children out of poverty.

(g) With reference to the data above and your knowledge of economics, assess the advantages of using benefit payments to redistribute income in a country such as Canada.

The Shetland Islands are part of Scotland. Shetland College is the only Further Education college located in the Shetland Islands. It was privatised in August 2021. The managers at the college claim privatisation will improve educational and training opportunities on the Shetland Islands.

Critics claim it could negatively impact staff contracts and working conditions. It may reduce the number of courses available to students and allow managers at the college to award themselves much higher levels of pay.

(Source: https://www.thenational.scot/news/19483135.campaigners-unions-issue-warning-shetland-college-privatisation/)

(e) With reference to the data above and your knowledge of economics, assess the possible benefits of privatising the college.

In 2022, Kazakhstan's foreign direct investment (FDI) increased by 17.8% to reach $22.1bn. With its huge amount of natural resources such as oil and gas and agricultural lands, Kazakhstan is the richest country in central Asia.

Sector	Growth in FDI
Manufacturing	36.9%
Retail	32.6%
Transport	20.1%
Mining	11.7%

The top four countries investing in Kazakhstan in 2022 were the Netherlands, the US, Switzerland and Belgium.

According to the Deputy Minister of Foreign Affairs, the growth in FDI reflects foreign investors' confidence in Kazakhstan due to its ongoing government reforms and low costs of production.

(c) With reference to the data above and your knowledge of economics, evaluate the advantages of an increase in foreign direct investment (FDI) for a country such as Kazakhstan.

The largest airport in Nigeria is located in Lagos. The Nigerian Government has made several attempts to privatise the country's four main airports over recent years. This has been unsuccessful due to resistance from trade unions that have members at the airport.

However, recently there has been increased interest from a number of private investors. This is due to the growing population, increasing demand for flights to and from Lagos and a stronger industrial base in the country. This means privatisation of Lagos Airport is now more likely to happen.

Whilst under the control of the government, subsidies have been used to pay some of the costs to operate the airport, as well as to improve safety and airport facilities.

(c) With reference to the data above and your knowledge of economics, evaluate whether consumers are likely to benefit from the privatisation of Lagos Airport.

A new UK report identified the urgent need to reduce pollution from vehicles and provide more open spaces and parks.

Researchers looked at the impact on health when participants walked for two hours on London's busy Oxford Street. This was then compared to those walking in the nearby large open space of Hyde Park.

The results showed that people walking in the park performed better. The air pollution from vehicle fumes largely removed the health benefit from the exercise in Oxford Street. The report suggests that people should avoid walking in busy streets and should instead walk in parks or open spaces.

(Source: adapted from http://edition.cnn.com/2017/12/05/health/exercise-polluted-urban-streets-intl/index.html)

(g) With reference to the data above and your knowledge of economics, assess whether the government should provide more parks and open spaces.

In 2019, the Estonian Government increased the subsidy for public transport by €9 m to €101m. The subsidy for bus services grew from €34.8 m to €43.3 m in 2019.

Minister of Economic Affairs and Infrastructure Kadri Simson said, "Greater support for public transport services will ensure better mobility as well as reduce cars on the road and reduce pollution of the environment. The subsidies also make movement easier for less well-off residents. Due to subsidised bus services, the number of passengers grew by 33% in one month."

The minister described local air services as one of the priorities for the Estonian Government in regional development. Air services to the major Western Estonian islands of Saaremaa and Hiiumaa have been given €5.53 m, more than double the €2.6 m subsidy they received last year.

(Source adapted from: https://news.err.ee/863306/public-transport-subsidy-to-increase-to-101-million-next-year)

Just 30 years ago, Ghana was in crisis with high levels of poverty and on the edge of economic collapse. The West African nation has made a significant recovery and was predicted to be the world's fastest growing economy in 2019.

The International Monetary Fund (IMF) estimates Ghana's Gross Domestic Product (GDP) growth rate of 8.8% will be double that of emerging economies, and well ahead of world growth rates. Ghana is one of the world's largest cocoa producers. Its growth is now being maintained by a different commodity, the extraction of crude oil.

(Source adapted from: https://www.imf.org/external/datamapper/NGDP_RPCH@WEO/OEMDC/ADVEC/WEOWORLD/GHA)

Vietnam is struggling with high levels of air pollution. Its two biggest cities, Hanoi and Ho Chi Minh City, are now among the 15 most polluted cities in Southeast Asia. Air pollution is particularly harmful to human health causing diseases including strokes, heart disease and respiratory infections. Up to 60,000 deaths in Vietnam in 2018 were related to air pollution. On average, poor air quality reduces life expectancy by one year and costs the country about 5% of GDP per year.

Among the main causes of this pollution is transportation. Vietnam now has 3.6 million automobiles and 58 million motorbikes, mostly found in big cities. Many of these vehicles are old, with limited emission control technology. They cause daily traffic jams and are responsible for a large amount of air pollution.

The Vietnamese Government is considering whether to increase the environmental tax on petrol and diesel by 33%. The proposed tax will generate $2.4 bn each year, an annual increase of $650.2 m from current tax revenues on fuels.

(Source adapted from: https://thediplomat.com/2020/03/vietnams-big-air-pollution-challenge/)

(c) With reference to the data above and your knowledge of economics, evaluate the effectiveness of increasing taxation on petrol and diesel to protect the environment in a country such as Vietnam. (12)

Wind power became Spain's main energy source in 2021. Renewable energy sources such as wind and solar contributed to almost 47% of the country's energy, compared to 30% in 2011. This has helped to reduce Spain's use of fossil fuels.

"Wind power is going to dominate the Spanish electricity supply for a long time. Spain has it all: we have more wind and more sun than practically any other European country," says Francisco Valverde, an energy consultant.

The Spanish Government is giving €6.9bn in subsidies for renewable energy between 2022 and 2023. These subsidies will help create over 280,000 jobs in the Spanish economy. Over 60% of solar and 90% of wind energy equipment is manufactured in Spain.

(Source: https://english.elpais.com/economy-and-business/2021-12-14/wind-power-becomes-spains-leading-energy-source-for-2021.html)

Costa Rica has 5% of the world's wildlife species but it occupies only 0.03% of the earth's surface. Costa Rica takes pride in having 30 national parks with more than 25% of the territory of Costa Rica marked for conservation.

National parks have economic value to both national and local economies. Costa Rica takes advantage of the growing demand by tourists visiting these national parks by charging an entry fee. National Parks contribute almost $2bn to the Costa Rican economy. 122,465 tourists visited national parks in Costa Rica in the last two weeks of 2021.

Local economies near the national parks benefit from the creation of jobs and the increased expenditure by tourists on hotels, local shops, guides, restaurants and tours.

(c) With reference to the data above and your knowledge of economics, evaluate the possible advantages of the government providing national parks to protect the environment in a country such as Costa Rica.

Sri Lanka Railways (SLR) has made a loss of Rs 331bn over the last 10 years.
The Sri Lankan Government provides a subsidy so that ticket prices can be reduced. This is to encourage passengers to use trains rather than further increase congestion on the roads.

A spokesperson for SLR said that it needs to upgrade existing railway tracks to make services more comfortable for passengers as well as increase the number of trains to reduce overcrowding. This will require a larger subsidy.

(e) With reference to the data above and your knowledge of economics, assess the effectiveness of subsidies in dealing with externalities, such as road congestion.

Bboxx, a firm that makes solar-powered stoves, received a $17m subsidy to reduce the price of its products. This subsidy will be used to encourage the use of solar-powered stoves in Rwanda where many households currently use firewood or coal to cook their meals.

More than 500,000 households in Rwanda will benefit from this subsidy programme. They will no longer have to burn firewood and coal, which create harmful and dangerous pollutants.

The subsidy programme is designed to reduce the percentage of households that use firewood for cooking from 80% in 2017 to 42% by 2024. This will reduce carbon emissions in Rwanda.

(g) With reference to the data above and your knowledge of economics, assess the possible benefits to the environment of providing subsidies for solar-powered stoves in Rwanda.

Sea cucumbers are marine animals that have an important role in keeping the coral reef ecosystem healthy. US firm, Orient Seafood Production (OSP), has been fined $1.5m for over-harvesting sea cucumbers. Harvesting sea cucumbers is legal in the US. There is a limit on the quantity allowed to be harvested due to their positive impact on the coral reefs.

OSP was accused of under-reporting harvests by 113,400 kg during a two-year period. Before he paid the fine, the firm's owner had made high profits from sales to China, where there is an increasing demand.

(Source adapted from: https://www.independent.co.uk/news/world/americas/sea-cucumbers-prison-over-harvesting-orient-seafood-production-hoon-namkoong-washington-a8562046.html)

(h) With reference to the data above and your knowledge of economics, assess the effectiveness of government fines when dealing with externalities such as over-harvesting sea cucumbers.

High pollution levels in the busy Indonesian city of Jakarta are mainly due to the large volume of traffic. There are over 17 million vehicles registered in the area, each emitting fumes into the environment. The number of vehicles is increasing.

In 2007, government regulations were introduced to reduce the volume of traffic in the city. For example, every Sunday morning, over 8 km of Jakarta's roads are traffic-free as vehicles are banned. In 2016, it was reported that air quality had improved by 65% compared to the levels before the regulations were introduced.

(h) With reference to the data above and your knowledge of economics, assess the effectiveness of government regulations when dealing with externalities such as air pollution in Jakarta.

Polluted air is said to cause over 1,000 deaths each year in Greater Manchester, UK. To reduce the problem, an 800 km^2 'Clean Air Zone' (CAZ) has been proposed, where drivers of certain vehicles would have to pay between £7.50 and £60.00 each day they drive on roads in the region.

All lorries, buses, taxis and vans that do not meet the emission standards will be affected. It is hoped the tax will encourage vehicle owners to drive vehicles that are more environmentally friendly.

However, small business owners in particular will be affected by the proposals. An ice-cream business, established over 100 years ago, stated costs would increase by £29 000 a year for its vans to use roads in the region. It cannot afford to replace them and like many other firms risks going out of business.

(c) With reference to the data above and your knowledge of economics, evaluate the effectiveness of government regulations in dealing with externalities such as air pollution in Greater Manchester.

The Tata Steel steelworks in IJmuiden, Netherlands, will have to meet tougher rules on pollution and will have extra checks to make sure it improves the air quality around the plant. These include reducing Tata Steel's current pollution permits and will require it to change some production processes.

The government made the decision following the publication of a report which concluded that dust in the IJmuiden region contained high levels of dangerous metals such as lead. An earlier report stated that air quality in the area was poor to inadequate.

Tata Steel in the Netherlands has a total workforce of 11,000 and indirectly provides work for thousands in the local economy.

(Source: https://www.dutchnews.nl/news/2021/12/tata-steel-faces-tougher-permit-rules-and-more-pollution-checks/)

In October 2023, the UK Government introduced more regulations to tackle the problem of litter and to protect the environment from a range of single-use plastic items.

No firm in the food industry will now be able to sell single-use plastic cutlery, polystyrene cups, plastic plates and food containers in England.

Research shows people across England use 2.7 billion items of mostly plastic single-use cutlery and 721 million single-use plates every year, but only 10% of these are recycled.

Plastic pollution takes hundreds of years to break down and causes serious damage to oceans, rivers and land. It is a source of greenhouse gas emissions, from its production and manufacture to the way it is disposed of.

(c) With reference to the data above and your knowledge of economics, evaluate the possible advantages of using regulation to protect the environment for a country such as the UK.
