Block practice · GDP, the economic cycle and inflation

Work through each question type in order. Each section has a worked-example retry and all further practice. Attempt only the part outlined in red.

Inflation and deflation: meaning, measurement and causes

GDP and economic growth: meaning, uses and limits

GDP per capita

Percentage change, including inflation from a price index

Effects of inflation and deflation, including menu and shoe leather costs

The economic cycle: phases, jobs and prices

Label the economic cycle diagram

OLevels.com SCHOOL

Practice workbook · Inflation and deflation: meaning, measurement and causes

Definitions of inflation and deflation, CPI measurement, and demand-pull versus cost-push causes.

10 question parts: 1 worked-example retry and 9 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

2023 JAN · Paper 02

Worked-example retry · Attempt part b only.

In December 2020, Mexico had its biggest fall in GDP for nearly 100 years. Its GDP fell by 9.3% compared to 2019. Inflation was at 3.3% and had exceeded its target rate of 3% in August and October 2020.

Mexico's central bank kept its interest rate at 4.25% in December 2020. This followed 11 reductions in interest rates and the central bank said it needed time to assess the country's economic situation.

Mexican Interest Rate (%)

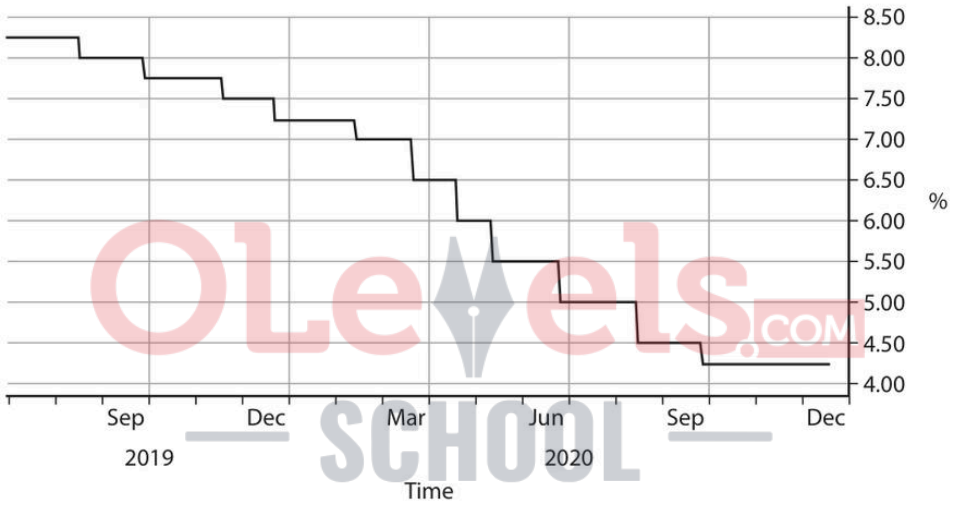

Figure 5

Just 30 years ago, Ghana was in crisis with high levels of poverty and on the edge of economic collapse. The West African nation has made a significant recovery and was predicted to be the world's fastest growing economy in 2019.

The International Monetary Fund (IMF) estimates Ghana's Gross Domestic Product (GDP) growth rate of 8.8% will be double that of emerging economies, and well ahead of world growth rates. Ghana is one of the world's largest cocoa producers. Its growth is now being maintained by a different commodity, the extraction of crude oil.

(Source adapted from: https://www.imf.org/external/datamapper/NGDP_RPCH@WEO/OEMDC/ADVEC/WEOWORLD/GHA)

(e) With reference to the data above and your knowledge of economics, assess the use of GDP as a measure of growth for a country such as Ghana.

A new report from New Zealand Kiwifruit Growers Incorporated showed a serious shortage of seasonal workers. This could slow down the kiwifruit industry's predicted growth. The report showed that the industry will require an additional 7,000 seasonal workers if it is to double in size by 2027. Revenue from the sale of kiwifruits was predicted to increase from NZ$2.1bn in 2017 to NZ$4bn by 2027. At the start of the 2018 season, the industry was short of 1,200 workers with 70% of the crop still to be picked.

(Source adapted from: https://www.nzherald.co.nz/business/news/article.cfm?c_id=3&objectid=12099643)

(g) With reference to the data above and your knowledge of economics, assess the ways a country such as New Zealand could reduce the shortage of seasonal workers.

Gross domestic product (GDP) growth in France is forecast to remain low over the next two years. Consumer spending is expected to improve as inflation reduces. However, a weak outlook for the German economy, France's main trade partner, and low growth in China are expected to limit any increases in growth.

As a result, unemployment levels are expected to remain high. The interest rate in France (as set by the European Central Bank) was 4.5% in December 2023, but may change in the future.

France	December 2023
GDP growth rate	1%
Inflation	5.8%
Unemployment	7.2%

Figure 4

(e) With reference to the data above and your knowledge of economics, assess how effective monetary policy might be in decreasing unemployment for a country such as France.

The Tata Steel steelworks in IJmuiden, Netherlands, will have to meet tougher rules on pollution and will have extra checks to make sure it improves the air quality around the plant. These include reducing Tata Steel's current pollution permits and will require it to change some production processes.

The government made the decision following the publication of a report which concluded that dust in the IJmuiden region contained high levels of dangerous metals such as lead. An earlier report stated that air quality in the area was poor to inadequate.

Tata Steel in the Netherlands has a total workforce of 11,000 and indirectly provides work for thousands in the local economy.

(Source: https://www.dutchnews.nl/news/2021/12/tata-steel-faces-tougher-permit-rules-and-more-pollution-checks/)

(c) With reference to the data above and your knowledge of economics, evaluate the effectiveness of using pollution permits to protect the environment of a country such as the Netherlands.

Germany's economy shrank more than expected in the fourth quarter of 2022. This raised doubts over the ability of Europe's biggest economy to avoid a recession and recover quickly from its energy crisis due to high gas and oil prices.

Record inflation rates of 10.4% caused reductions in German consumer spending and business investment in buildings and machinery. This led to a 0.4% decrease in gross domestic product (GDP) from the previous quarter.

The effects will be felt by consumers, workers, firms and the German Government.

(e) With reference to the data above and your knowledge of economics, assess how a recession may affect inflation in a country such as Germany.

The Chinese economy only grew by 3% in 2022. However, in 2023 exports increased by 14.8% compared to the previous year, suggesting that China would achieve its growth target of 5%.

By March 2023, China was experiencing an economic recovery with the services and construction sectors reaching a 12-year high.

However, China's export recovery is expected to be temporary. This is because of possible weaker global demand due to interest rate rises in many economies.

(g) With reference to the data above and your knowledge of economics, assess how a recovery may affect unemployment for a country such as China.

The local government in Alberta, Canada, is doubling its infrastructure budget for 2020–2021 to Canadian $1.9 bn to try to prevent job losses. Alberta had lost 117,000 jobs in March 2020, bringing the unemployment rate to 8.7%.

The additional funding will go towards repairing roads, bridges and upgrading technology in schools and universities.

(Source: https://edmontonjournal.com/news/politics/covid-19-jason-kenney-announces-infrastructure-spending-to-counter-job-losses/)

(g) With reference to the data above and your knowledge of economics, assess the effectiveness of infrastructure spending to reduce unemployment in a country such as Canada.

2024 JUN · Paper 02

Further practice · Attempt part f only.

In 2022, President Biden introduced legislation to increase investment in green technology in the US. Subsidies of $369bn are given through grants, loans and tax credits to public and private firms.

These subsidies are to be used to increase battery, solar panel and wind turbine production in the US creating new factories and millions of new green jobs in the country.

There is widespread opinion amongst EU and UK politicians and business leaders that US subsidies will have a negative impact on their economies.

(g) With reference to the data above and your knowledge of economics, assess the possible benefits for the US of giving subsidies for green technology.

Further practice · Attempt part f only.

Bboxx, a firm that makes solar-powered stoves, received a $17m subsidy to reduce the price of its products. This subsidy will be used to encourage the use of solar-powered stoves in Rwanda where many households currently use firewood or coal to cook their meals.

More than 500,000 households in Rwanda will benefit from this subsidy programme. They will no longer have to burn firewood and coal, which create harmful and dangerous pollutants.

The subsidy programme is designed to reduce the percentage of households that use firewood for cooking from 80% in 2017 to 42% by 2024. This will reduce carbon emissions in Rwanda.

(g) With reference to the data above and your knowledge of economics, assess the possible benefits to the environment of providing subsidies for solar-powered stoves in Rwanda.
