Answer 1 of 14 · Question 3 part d · 6 marks

2025 JUN · Paper 01 · extract 2 of 7 · find part d in this mark scheme extract

Question number	Using the diagram below, draw the effect of a minimum wage (W_1) that has been set above the equilibrium wage (W_e). Label the new quantity of labour demanded and the new quantity of labour supplied. **Answer**	Mark
3(c)	**AO2 3 marks** Award 1 mark for drawing the new wage rate, labelled Award 1 mark for the new quantity of labour demanded, labelled Award 1 mark for the new quantity of labour supplied, labelled  	(3)

Type MS · What shifts the demand curve

Answer 1 of 14 · Question 3 part d · 6 marks

2025 JUN · Paper 01 · extract 3 of 7 · find part d in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse how the demand curve for Tennis TV subscriptions might have been affected by Amazon Prime ending its streaming service. **Indicative content**
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • A demand curve shows how much of a good will be purchased at different prices • An increase in the price of substitute goods is one of the factors likely to shift a demand curve to the right • Possible use of a diagram:  • The end of Amazon Prime's streaming service, means the only substitute is the higher priced service from Sky and it may encourage more customers to demand Tennis TV subscriptions instead, therefore increasing demand • The quantity of Tennis TV subscriptions demanded is likely to have increased (from Q_e to Q_1) as a result of the higher priced substitute because customers of tennis subscriptions are likely to want to maximise their benefit by receiving more for their money • Tennis TV may therefore have increased the price of its subscriptions (from P_e to P_1) as a result of the increase in demand

Type MS · What shifts the demand curve

Answer 1 of 14 · Question 3 part d · 6 marks

2025 JUN · Paper 01 · extract 4 of 7 · find part d in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Type MS · What shifts the demand curve

Answer 1 of 14 · Question 3 part d · 6 marks

2025 JUN · Paper 01 · extract 5 of 7 · find part d in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the effectiveness of subsidies in dealing with externalities, such as road congestion. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Congestion is an example of a negative externality because it is created by high volumes of traffic and has an external cost, such as pollution, for the people of Sri Lanka • One method of government intervention to reduce negative externalities is to offer subsidies to producers of services, such as SLR providing rail travel • These subsidies will encourage the provision of cheaper and more comfortable rail travel, thus attracting passengers onto the trains and away from the busy roads • The Sri Lankan Government offers these subsidies in an attempt to reduce congestion and therefore reduce the negative externalities to the public in Sri Lanka **AO4** • However, there is no guarantee that the cheaper rail travel will attract people onto the trains, as the existing railway tracks need upgrading and the trains can be overcrowded • This means that rail travel may be uncomfortable, limiting the demand from passengers even with cheaper ticket prices • As SLR has made a loss of Rs 331bn over the last 10 years, the Sri Lankan Government may need to provide a larger subsidy to cover this loss, as well as paying for the upgrade of the rail service • Other policies may be more effective, such as taxation of vehicles on the road • There may be an opportunity cost of providing the subsidies, such as reduced revenue to cover education and/or health care

uestion number	Indicative content
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Without the changes in technology, more parking spaces are demanded than supplied and demand is increasing • The introduction of Automated Parking Systems (APS) increases the supply of spaces and so should shift the supply curve to the right • Changes in technology allow the gap between demand and supply to be reduced. • The change in supply will also affect the equilibrium price, making parking cheaper and more available • Thus reducing the shortage of car parking spaces • Possible use of diagram  **AO4** • The increase in the number of vehicles may be faster than the increase in the supply of car parking spaces meaning there is still a shortage • There is already such a large excess in demand that the introduction of APS will not make much difference • It is likely to take time from the initial decision to having the APS in place, meaning the supply curve may not shift straight away • Some motorists do not like change or worry the technology will fail and may be averse to the idea of automated parking, therefore not use the APS

Question number	Answer	Mark
1(h)	**AO2 3 marks** Award 1 mark for identifying a barrier to entry Award 1 mark for developing the response Award 1 mark for the response being in context • One barrier to entry is economies of scale **(1)** because established larger firms such as Sony and Warner may have lower average costs **(1)** whereas new smaller firms may struggle to keep average costs down **(1)** Accept any other appropriate response.	**(3)**

Question number	Indicative content
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • The four factors of production are land, labour, capital and enterprise • Beans are harvested from coffee plants which means that land is needed to produce coffee • The coffee beans are picked by hand because labour is needed to determine when the fruit is ready to harvest • The process of sorting the beans and transforming them from their natural state to consumable beans, ground or instant products is done by machinery, which is capital. This maybe because is it more productive/cost effective than using labour. • Enterprise combines the other factors of production to make sure the bean gets to the consumer as a consumable product • Thus, all four factors of production may be used to produce coffee as without any one of them the process would not be completed as efficiently

Question Number	With reference to the data above and your knowledge of economics, analyse how market forces can remove excess supply. Indicative content
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Excess supply is where supply is greater than demand and there are unsold products in the market • Market forces refer to supply and demand, as well as how they determine the allocation of scarce resources and price • Where there is excess supply at 10 000 Kip, price will fall as a result of supply being greater than demand • Therefore, at 10 000 Kip, eight LOCA drivers wanted to offer journeys but only four passengers wanted to buy • If drivers lowered their price to 8 000 Kip the excess supply would be removed • Demand rises as the price falls, until the equilibrium price of 8 000 Kip and the equilibrium quantity of six journeys is reached

Type MS · What shifts the demand curve

Answer 6 of 14 · Question 3 part a · 1 mark

2021 JUN · Paper 01 · extract 3 of 5 · find part a in this mark scheme extract

Question Number	With reference to the data above and your knowledge of economics, assess the benefits to Norway of the government funding all education. Indicative content
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Private benefits + external benefits = social benefits • Education is an external benefit because it has a positive spillover effect • This means that the students who gain education at universities in Norway can benefit third parties in the future • This is because the students can obtain more highly skilled jobs as a result of the education, which can be beneficial to the wider society • As a result, the standard of living in a country, such as Norway, may be better and productivity may be higher • Unemployment may therefore be reduced, as shown by the low rate in Norway, meaning there would be fewer costs to the government, and so it may be cheaper to pay for the education instead of welfare benefits **AO4** • There could be an opportunity cost. The money spent on education could be used for other needs such as healthcare • It will take time for the benefits of education to be enjoyed by others in the country • The students may not stay in Norway, meaning the benefits are enjoyed elsewhere and the cost is not offset by future social benefits • It is sometimes difficult to quantify and to give a monetary value to external benefits • It depends on other factors whether students become employed in successful jobs which can benefit society

Type MS · What shifts the demand curve

Answer 6 of 14 · Question 3 part a · 1 mark

2021 JUN · Paper 01 · extract 4 of 5 · find part a in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4–6	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7–9	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Type MS · What shifts the demand curve

Answer 6 of 14 · Question 3 part a · 1 mark

2021 JUN · Paper 01 · extract 5 of 5 · find part a in this mark scheme extract

Question Number	Calculate, to two decimal places, **the percentage change in the population** in Austria between 2000 and 2018. You are advised to show your working. Answer	Mark

Type MS · What shifts the demand curve

Answer 7 of 14 · Question 3 part d · 6 marks

2021 NOV · Paper 01 · extract 1 of 7 · find part d in this mark scheme extract

3(a)	**AO1 1 mark** The only correct answer is: **C** Lack of information A is not correct because this will fill skills shortages B is not correct because this will lead to greater efficiency D is not correct because this improves productivity	**(1)**

Question number	Answer	Mark
3(b)	**AO1 1 mark** The only correct answer is: **D** Sales assistant A is not correct because this role is in the primary sector B is not correct because this role is in the secondary sector C is not correct because this role produces primary products	**(1)**

Type MS · What shifts the demand curve

Answer 7 of 14 · Question 3 part d · 6 marks

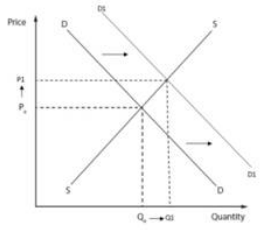

2021 NOV · Paper 01 · extract 2 of 7 · find part d in this mark scheme extract

Question number	Answer	Mark
3(c)	**AO2 3 marks** Award 1 mark for drawing new wage rate, labelled Award 1 mark for new quantity demanded, labelled Award 1 mark for new quantity supplied, labelled  	(3)

Type MS · What shifts the demand curve

Answer 7 of 14 · Question 3 part d · 6 marks

2021 NOV · Paper 01 · extract 3 of 7 · find part d in this mark scheme extract

Question number	Indicative content
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • A demand curve shows how much of a good will be purchased at different prices • Advertising is one of the factors likely to shift a demand curve to the right (increase in quantity demanded) • Possible use of a diagram:  • Worldwide advertising during a popular event, such as an international cricket match, may encourage consumers to purchase Pepsi due to greater awareness and brand loyalty, therefore increasing the quantity demanded • The quantity of Pepsi demanded is likely to have increased as a result of the advertising (from Q_e to Q_1) because consumers of soft drinks may be influenced by the adverts and make an association between Pepsi and the cricket

Type MS · What shifts the demand curve

Answer 7 of 14 · Question 3 part d · 6 marks

Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Type MS · What shifts the demand curve

Answer 7 of 14 · Question 3 part d · 6 marks

2021 NOV · Paper 01 · extract 5 of 7 · find part d in this mark scheme extract

Question number	Indicative content
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • The supply of labour is the amount of time a worker is willing and able to work at a given wage rate, over a given period of time • By increasing the retirement age people will have to work longer before they can receive a state pension • In Singapore, 62-, 63- and 64-year-olds will need to continue to work after the change to the age of retirement comes into effect • This means that there will be an increase in the supply of labour • As there are more people living to 80+, this will mean the increase in the retirement age will be effective in increasing the supply of labour **AO4** • However, a higher retirement age may not be the most effective method of increasing the labour supply in the manufacturing sector, which is significant in Singapore • This is because this sector may require younger employees to carry out the roles required within the industry • Other factors such as lowering the school-leaving age, migration or female participation may be more effective • Increasing skills and qualifications of employees may also be more effective, especially if the financial services industry continues to grow in Singapore • This is because the nature of the industry means being skilled in financial services may lead to employees who are able to supply a greater amount of labour than older employees

Answer 8 of 14 · Question 1 part d · 1 mark

2022 JUN · Paper 01 (regional R) · extract 1 of 5 · find part d in this mark scheme extract

1(a)	**AO1 1 mark** The only correct answer is: **A** Division of labour B is not correct because this is creating products from new ideas C is not correct because this is using more labour during production than capital D is not correct because this relates to the rate of production due to given resources	**(1)**

Question number	Answer	Mark
1(b)	**AO2 1 mark** The only correct answer is: **D** Total revenue A is not correct because this is $10 B is not correct because only variable costs are shown, not fixed costs C is not correct because this would be total revenue – total costs	**(1)**

Question number	Answer	Mark
1(c)	**AO1 2 marks** Award 1 mark for reference to an increase in demand and 1 mark for reference to decreased income Goods for which demand will increase **(1)** as incomes decrease **(1)** **OR** Goods for which demand will decrease **(1)** as incomes increase **(1)** Accept any other appropriate response	**(2)**

Type MS · What shifts the demand curve

Answer 8 of 14 · Question 1 part d · 1 mark

2022 JUN · Paper 01 (regional R) · extract 2 of 5 · find part d in this mark scheme extract

Question number	Answer	Mark
1(d)	**AO1 1 mark** Award 1 mark for correct reason • Negative advertising • Fall in income • Negative fashion/taste change • Fall in price of substitute goods • Rise in price of complementary goods • Decrease in the population Accept any other appropriate response	**(1)**

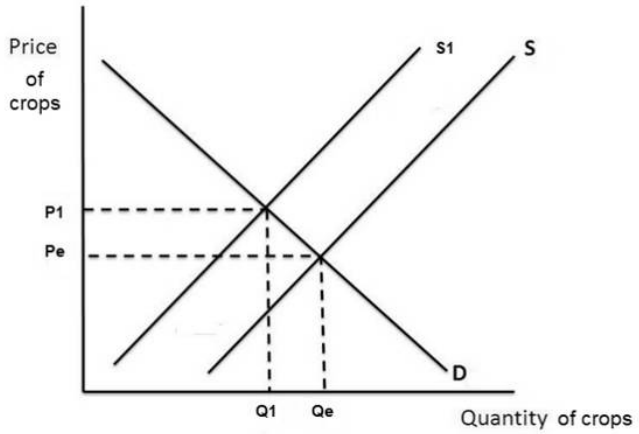

Question number	Answer	Mark
1(e)	**AO1 1 mark** Award 1 mark for a correct definition Converting resources into goods or services Accept any other appropriate response	**(1)**

	Answer	Mark
1(f)	**AO2 2 marks** Award 1 mark for showing correct calculation -2.1%/1.6% **(1)** Award 1 mark for correct PED = -1.31 **(1)** Award 2 marks if PED is correctly calculated as -1.31, even if no calculations are shown Do not award marks for a formula	**(2)**

Type MS · What shifts the demand curve

Answer 8 of 14 · Question 1 part d · 1 mark

2022 JUN · Paper 01 (regional R) · extract 3 of 5 · find part d in this mark scheme extract

Question number	Answer	Mark
1(g)	**AO2 3 marks** Award 1 mark for leftward shift of supply, labelled Award 1 mark for higher equilibrium price, labelled Award 1 mark for lower equilibrium quantity, labelled  	(3)

Question number	Answer	Mark
1(h)	**AO2 3 marks** Award 1 mark for identifying a reason Award 1 mark for developing the response Award 1 mark for the response being in context • As China has become more developed, demand for services has increased **(1)** because people demand more of things like education and health care as the economy grows **(1)** therefore employment is likely to transfer from the primary sector towards the tertiary sector **(1)** Accept any other appropriate response	(3)

Type MS · What shifts the demand curve

Answer 8 of 14 · Question 1 part d · 1 mark

2022 JUN · Paper 01 (regional R) · extract 4 of 5 · find part d in this mark scheme extract

Question number	Indicative content
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • It is an economic assumption that businesses aim to maximise profits • It may take time to find suitable ways of reducing the overall amount of plastic used by 100,000 tonnes, which is likely to result in higher costs • By reducing the amount of non-recyclable plastic packaging it uses, Unilever is likely to incur higher costs as it uses the more expensive recyclable plastic • Unilever may need to source alternative suppliers to replace the remaining 600,000 tonnes of plastic packaging • This means that Unilever will not maximise profits

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Question number	Explain **one** advantage of positive reviews for the owners of food stalls in Taba. **Answer**	Mark
2(g)	**AO2 3 marks** Award 1 mark for identifying a relevant advantage Award 1 mark for developing the advantage Award 1 mark for the advantage being in context • Stalls offering quality food will gain more customers **(1)** because customers will be attracted by the positive reviews **(1)** instead of buying from competitors **(1)** • Demand will increase for food from these stalls **(1)** leading to an increase in revenue **(1)** which will increase profit for the food stall owners **(1)** Accept any other appropriate response	**(3)**

Type MS · What shifts the demand curve

Answer 9 of 14 · Question 2 part e · 1 mark

2023 JUN · Paper 01 · extract 4 of 6 · find part e in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess whether a monopoly such as PKP is likely to benefit consumers. **Indicative content**
2(h)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • A monopoly is a market structure with one dominant seller in the market • PKP is the main rail carrier for passenger and freight services in Poland, making it a monopoly • Due to its dominance of the rail network in Poland, PKP may be able to take advantage of economies of scale • This means that the firm may have low (long-run) average costs as a result of purchasing or technical economies of scale • Therefore, it is possible that PKP could decide to pass the lower costs on to its passengers in the form of lower prices • PKP may also be more efficient because it is not duplicating resources, such as the railway tracks, used by competitors • This may have helped PKP to meet the transport needs of the state; one of its aims • PKP may also be able to innovate due to its lower (long-run) average costs, meaning it may be able to provide a high-quality service on its trains **AO4** • However, as it has few competitors, rail passengers and those transporting freight have little choice but to use PKP's service • This means PKP can be a price maker for its train services, which is not in the interest of its consumers • There is restricted choice in the market, such as which routes a passenger can take. This is because there is only one main supplier • PKP may be inefficient because it does not need to keep its costs low in order to compete with limited competition • It may be that PKP does not have any incentive to spend money on product innovation and some areas may not have access to train travel

1(g)	**AO2 3 marks** Award 1 mark for a rightward shift of the supply curve, labelled Award 1 mark for a lower equilibrium price, labelled Award 1 mark for a higher equilibrium quantity, labelled 	**(3)**

Question number	Explain **one** possible advantage of privatisation for consumers in Brazil. **Answer**	**Mark**
1(h)	**AO2 3 marks** Award 1 mark for identifying an advantage Award 1 mark for developing the response Award 1 mark for the response being in context • Consumers may benefit from lower prices **(1)** because a private firm is likely to want to be efficient **(1)** so it will aim to produce food at its lowest possible cost **(1)** • Better quality may be available to consumers **(1)** because private firms will aim to make a profit **(1)** meaning they need to retain customers by providing quality food products **(1)** Accept any other appropriate response	**(3)**

Type MS · What shifts the demand curve

Answer 11 of 14 · Question 1 part b · 1 mark

2023 NOV · Paper 01 · extract 4 of 5 · find part b in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse how market failure is likely to occur at the TSFG venue. **Indicative content**
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • Market failure exists where resources are not allocated efficiently • Examples of market failure include externalities, missing markets, lack of information, factor immobility and lack of competition • There is a lack of competition selling food and drinks at the TSFG, meaning customers have limited choice of where to buy refreshments inside the grounds • This means higher prices can be charged because customers cannot get refreshments anywhere else • As people spend several hours at the venue, they are likely to need something to eat and/or drink during their visit • Therefore, the high prices and reduced choice leads to an inefficient allocation of resources

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	• Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3–4	• Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5–6	• Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Type MS · What shifts the demand curve

Answer 11 of 14 · Question 1 part b · 1 mark

2023 NOV · Paper 01 · extract 5 of 5 · find part b in this mark scheme extract

Question number	A firm employing 135 workers has a total output of 33,750 units each month. What is the monthly labour productivity of the firm? **Answer**	Mark

Type MS · What shifts the demand curve

Answer 12 of 14 · Question 3 part a · 1 mark

2024 NOV · Paper 01 · extract 1 of 6 · find part a in this mark scheme extract

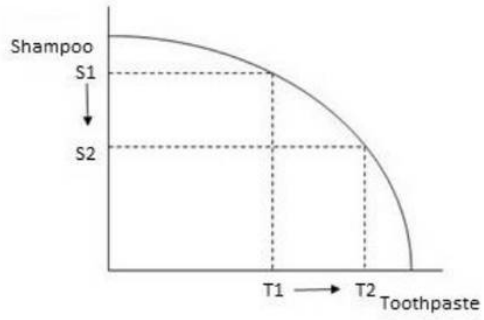

3(a)	**AO1 1 mark** The only correct answer is: **D** Decreased incomes A is not correct because this would increase demand B is not correct because this would increase supply C is not correct because this would reduce supply	**(1)**

Question number	Which **one** of the following best describes the type of goods with an income elasticity of demand (YED) of -1.3? **Answer**	**Mark**
3(b)	**AO1 1 mark** The only correct answer is: **A** Inferior B is not correct because unitary goods have a numerical value equal to 1 or -1 C is not correct because this would have a high positive numerical value D is not correct because this would have a positive numerical value	**(1)**

Question number	In the box below, draw a production possibility curve (PPC) for a firm that can produce shampoo and/or toothpaste. On your PPC, draw and label what would happen if production of toothpaste was increased. **Answer**	Mark
3(c)	**AO2 3 marks** Award 1 mark for drawing a production possibility curve (PPC) with correctly labelled axes Award 1 mark for showing a decrease in shampoo on the PPC Award 1 mark for showing an increase in toothpaste on the PPC  	(3)

Type MS · What shifts the demand curve

Answer 12 of 14 · Question 3 part a · 1 mark

2024 NOV · Paper 01 · extract 3 of 6 · find part a in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse the likely impact of an increase in the national minimum wage on the supply of labour in Barbados. **Indicative content**
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • The minimum wage in Barbados increased by $2.25 (36%) per hour • This means that a higher income is received by people who may have struggled with basic needs if the national minimum wage was left at $6.25/hour • A 36% increase could be quite a substantial increase in the wages earned for some people in Barbados • Therefore, more workers would be encouraged to work because they can enjoy a higher standard of living • Thus, there is likely to be an increase in the quantity of labour supplied

Type MS · What shifts the demand curve

Answer 12 of 14 · Question 3 part a · 1 mark

2024 NOV · Paper 01 · extract 4 of 6 · find part a in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the importance of the quality of labour on productivity in a country. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Quality of labour may increase as a result of education because workers would be able to develop skills with which they could become more efficient in the tasks needed to produce goods and services in the workplace • Therefore, workers are likely to be able to produce more goods and services in a shorter period of time, leading to lower costs of production for firms • This increase in productivity means that a firm may be able to enjoy higher profits due to lower costs, as well as a possible increase in revenue, if more products are available to sell • An increase in immigration may lead to an increase in the quantity and quality of labour supplied • This may result in increased competition between workers to provide the most efficient labour to firms in order to reduce their costs of production • This may mean that some workers may aim to increase their education to become more productive **AO4** • However, it takes time for education to become effective as periods of study need to be completed before being used in the workplace • This means that education may only impact productivity at a later date, making it difficult to measure its impact • Skilled workers may emigrate, taking their ability to increase efficiency for a firm with them • Immigration which increases the supply of skilled labour may lead to a reduction in wages, potentially demotivating workers and discouraging productivity • Therefore, productivity may not always increase due to quality of labour, at least not in the short-run • It may depend on the country and the levels of productivity within it or on technological advances in capital or land use

Type MS · What shifts the demand curve

3(a)	**AO1 1 mark** The only correct answer is: **C** Price of substitute goods A is not correct because this would affect the costs of production B is not correct because this would not shift the demand curve D is not correct because this would affect the supply curve	**(1)**

Question number	Which **one** of the following is an example of an external cost? **Answer**	**Mark**
3(b)	**AO1 1 mark** The only correct answer is: **A** Litter B is not correct because this is a private cost C is not correct because this is not an external cost D is not correct because this is an external benefit	**(1)**

Question number	On the blank pie chart below, draw and label the appropriate sizes of the primary (P), secondary (S) and tertiary (T) sectors for a developing country such as Nepal. **Answer**	**Mark**
3(c)	**AO2 3 marks** Award 1 mark for the primary sector (P) being the biggest **(1)** Award 1 mark for the primary sector (P) being greater than or equal to 50% **(1)** Award 1 mark for the remaining portion being divided between the tertiary (T) and the secondary (S) sector **(1)**  OR  	**(3)**

Type MS · What shifts the demand curve

Answer 13 of 14 · Question 3 part a · 1 mark

2025 JUN · Paper 01 (regional R) · extract 2 of 5 · find part a in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse how market forces should remove excess demand. **Indicative content**
3(d)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • When excess demand occurs, there are not enough tickets available in the market • As not enough tickets are supplied at 1 500 krona, price will rise as a result of demand being greater than supply • Therefore, at 1 500 krona, 8,000 tickets would be demanded but only a maximum of 6,000 tickets would be available at an event • If the price increased to 2 000 krona, the excess demand would be removed • Demand falls as the price increases, until the equilibrium price of 2 000 krona and the equilibrium of 6,000 tickets is reached

Type MS · What shifts the demand curve

Answer 13 of 14 · Question 3 part a · 1 mark

2025 JUN · Paper 01 (regional R) · extract 3 of 5 · find part a in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, assess the benefits to Indonesia of the government increasing its healthcare spending. **Indicative content**
3(e)	**AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)** **AO2 and AO3** • Healthcare is an external benefit because it has a positive spillover effect • This means that the people who receive healthcare in Indonesia can provide a benefit to third parties • This is because when people are healthy, they would be more likely to be able to perform their jobs and carry out activities in the economy, which can be beneficial to the wider society • Therefore, firms are also more likely to be able to produce the standard/quality of goods and services demanded by people in Indonesia • Economic growth has therefore increased, as shown by the better-than-expected rise, thus benefitting the people of Indonesia **AO4** • However, there could be an opportunity cost. The money spent on healthcare could be used for other needs such as education • It will take time for the benefits of healthcare to be enjoyed by others in the country because people may not be able to return to work immediately, nor be guaranteed to be productive • People may not stay in Indonesia, meaning the benefits are enjoyed elsewhere and the cost is not offset by future social benefits • It is sometimes difficult to quantify and to give a monetary value to external benefits • It depends on other factors whether people maintain/gain employment in jobs which can benefit society

Question number	Using the diagram below, draw the likely effect on the market for radios following a fall in their popularity. Label the new curve, the new equilibrium price and the new equilibrium quantity. **Answer**	**Mark**
1(g)	**AO2 3 marks** Award 1 mark for a leftward shift of the demand curve, labelled Award 1 mark for a lower equilibrium price, labelled Award 1 mark for a lower equilibrium quantity, labelled  	**(3)**

Question number	Explain **one** reason why consumers may benefit as a result of mergers in the pharmaceutical industry. **Answer**	**Mark**
1(h)	**AO2 3 marks** Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context • Economies of scale may occur as a result of a merger **(1)** because the new and larger pharmaceutical firms may be able to buy ingredients in bulk at a lower cost **(1)** meaning consumers may benefit from lower prices being passed on by the firms **(1)** Accept any other appropriate response	**(3)**

Type MS · What shifts the demand curve

Answer 14 of 14 · Question 1 part e · 1 mark

2025 NOV · Paper 01 · extract 4 of 5 · find part e in this mark scheme extract

Question number	With reference to the data above and your knowledge of economics, analyse the possible disadvantages faced by consumers from collusion between firms that provide accommodation for rent. **Indicative content**
1(i)	**AO2 (3 marks)/AO3 (3 marks)** **AO2 and AO3** • The anti-competitive practice of collusion means firms are able to act like a monopoly • This means it is more difficult for new firms to enter the market and reduces choice for consumers/tenants • Collusion to fix prices could lead to firms receiving higher profits at the expense of the tenant, who may have to pay more in rent • Therefore, this could make it more difficult for tenants to find cheaper accommodation or to have a choice of the firm they rent from • As many tenants are struggling to afford the rent they pay and over 1 million properties are affected, the impact on consumers is likely to be considerable
