Practice workbook · Productivity and how to raise it

Productivity as output per unit of input; raising land productivity (fertiliser, irrigation, drainage, reclamation), labour productivity (education, training, migration, human capital) and capital productivity (technology).

11 question parts: 1 worked-example retry and 10 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

Firms in Canada, the world's second largest country, have been struggling to find the labour needed for specialist positions such as computer engineers and web designers. The 'Global Talent Stream' is a government programme that provides firms with a quick way to hire highly skilled foreign workers. High costs and long time commitments often stop Canadians from training. Although a processing fee is payable for each new employee, firms have welcomed the programme.

(Source: adapted from http://www.canada.ca/en/employment-socialdevelopment/)

(d) With reference to the data above and your knowledge of economics, analyse why Canadian firms may have been struggling to hire the labour they need.

2019 JUN · Paper 01

Further practice · Attempt part e only.

Productivity is a measure of how efficiently goods and services are produced and is the single most important determinant of a country's per capita income. Canada's labour productivity growth has been lower than that of other leading economies for many decades, reducing its international competitiveness. Since 2011 however, Canada's labour productivity has greatly improved and it is now the 3rd most productive of the 16 leading economies.

(Source: adapted from http://www.conferenceboard.ca/hcp/)

(e) With reference to the data above and your knowledge of economics, assess the extent to which an increase in education and training is the best way to increase productivity.

Lanterns is an English café, located just outside a town where there are few job opportunities. It was set up by sisters Jo and Fiona who, instead of aiming to make a profit, wanted to help young people in their local area. All their waiters and waitresses are under 25 and were previously inexperienced and unemployed.

At first, the café was popular but now there are a lot of complaints about the length of time it takes for orders to arrive. Fiona thinks they need to employ experienced waiters and waitresses and change their business aims to maximise their profits.

(g) With reference to the data above and your knowledge of economics, assess whether Lanterns should change their business aims.

The rise of the restaurant robot

There has been an increase in the number of restaurants using robots instead of waiters and even chefs. Waiters who take customer orders have been replaced with computer tablets for ordering. Technology is now available to automatically serve espresso shots and make cappuccinos. This is due to efficiencies, rising labour costs, consumers' desire for convenience and their changing purchasing habits. This could change the dining experience as restaurants increase their use of technology.

(Source adapted from: https://www.forbes.com/sites/andrewrigie/2018/09/24/the-rise-of-the-restaurant-robot/#4f69b2593747)

(c) With reference to the data above and your knowledge of economics, evaluate the possible effect of an increase in the use of technology on productivity in restaurants.

A project to update the infrastructure and develop new routes along Indian railways has been in progress for a number of years. One part of the plan is to expand the rail network between Hyderabad and Karnataka.

The expanded railway network will provide more services for passengers, along with more freight trains. This will mean more raw materials, including cement, iron ore and steel can be transported.

(b) With reference to the data above and your knowledge of economics, analyse the impact of external economies of scale on construction firms in India.

In 2023, the Egyptian Government raised the price it paid for wheat to encourage farmers to increase production.

Wheat farmers face the difficulty of a limited amount of land available for agriculture. However, there are government programmes including land reclamation and guidance for farmers on both the use of fertiliser and irrigation systems.

As well as having a limited amount of land, many farmers are only familiar with traditional methods of farming and do not have the skills or the finance to change to new methods.

(c) With reference to the data above and your knowledge of economics, evaluate the extent to which these government programmes may affect farming productivity in a country such as Egypt.
