In 2024, the Latvian Government increased the national minimum wage from €620 per month to €700 per month.

A study had shown that 16% of the population of Latvia were paid the minimum wage. Although this was the lowest percentage for five years, many people had been struggling to pay bills following a rise in the prices of food, energy and clothing.

(c) With reference to the data above and your knowledge of economics, evaluate whether an increase in the minimum wage would benefit everyone in an economy such as Latvia.

Istanbul's new airport will be huge in size and capacity when construction is finished. It will have the ability to handle around 200 million passengers annually. This is double the number of the world's current busiest airport in Atlanta, USA. The airport will cost $11.7bn to build. It will have four terminals, six runways and cover an area of 29.5 square miles, making it larger than the island of Manhattan in New York.

In January 2023, the minimum wage in the Netherlands was increased by 10.15% to €1 934.40 per month. The decision was partly due to inflation increasing to 17% during 2022.

However, the decision has been criticised because the economy is still weak following the global health crisis.
