2021 JUN · Paper 02

Worked-example retry · Attempt part g only.

In 2019, Germany was considering increasing the tax on meat to protect the environment and improve animal welfare. Currently meat in Germany has a reduced tax rate of 7%. Some political groups are arguing that this should increase to the standard 19%. According to United Nations research, methane from animals accounts for 14.5% of greenhouse gas emissions – more than the direct emissions from transport.

(Source adapted from: https://www.independent.co.uk/environment/german-meat-tax-environment-animal-welfare-a9045271.html)

(g) With reference to the data above and your knowledge of economics, assess the use of taxation to protect the environment in a country such as Germany.

2. Question 2 · part g · 9 marks

2019 JUN · Paper 02 (regional R)

Further practice · Attempt part g only.

A new UK report identified the urgent need to reduce pollution from vehicles and provide more open spaces and parks.

Researchers looked at the impact on health when participants walked for two hours on London's busy Oxford Street. This was then compared to those walking in the nearby large open space of Hyde Park.

The results showed that people walking in the park performed better. The air pollution from vehicle fumes largely removed the health benefit from the exercise in Oxford Street. The report suggests that people should avoid walking in busy streets and should instead walk in parks or open spaces.

(Source: adapted from http://edition.cnn.com/2017/12/05/health/exercise-polluted-urban-streets-intl/index.html)

(g) With reference to the data above and your knowledge of economics, assess whether the government should provide more parks and open spaces.

In 2019, the Estonian Government increased the subsidy for public transport by €9 m to €101m. The subsidy for bus services grew from €34.8 m to €43.3 m in 2019.

Minister of Economic Affairs and Infrastructure Kadri Simson said, "Greater support for public transport services will ensure better mobility as well as reduce cars on the road and reduce pollution of the environment. The subsidies also make movement easier for less well-off residents. Due to subsidised bus services, the number of passengers grew by 33% in one month."

The minister described local air services as one of the priorities for the Estonian Government in regional development. Air services to the major Western Estonian islands of Saaremaa and Hiiumaa have been given €5.53 m, more than double the €2.6 m subsidy they received last year.

(Source adapted from: https://news.err.ee/863306/public-transport-subsidy-to-increase-to-101-million-next-year)

(c) With reference to the data above and your knowledge of economics, evaluate the advantages of using subsidies for public transport to protect the environment for a country such as Estonia.

Just 30 years ago, Ghana was in crisis with high levels of poverty and on the edge of economic collapse. The West African nation has made a significant recovery and was predicted to be the world's fastest growing economy in 2019.

The International Monetary Fund (IMF) estimates Ghana's Gross Domestic Product (GDP) growth rate of 8.8% will be double that of emerging economies, and well ahead of world growth rates. Ghana is one of the world's largest cocoa producers. Its growth is now being maintained by a different commodity, the extraction of crude oil.

(Source adapted from: https://www.imf.org/external/datamapper/NGDP_RPCH@WEO/OEMDC/ADVEC/WEOWORLD/GHA)

(e) With reference to the data above and your knowledge of economics, assess the use of GDP as a measure of growth for a country such as Ghana.

Vietnam is struggling with high levels of air pollution. Its two biggest cities, Hanoi and Ho Chi Minh City, are now among the 15 most polluted cities in Southeast Asia. Air pollution is particularly harmful to human health causing diseases including strokes, heart disease and respiratory infections. Up to 60,000 deaths in Vietnam in 2018 were related to air pollution. On average, poor air quality reduces life expectancy by one year and costs the country about 5% of GDP per year.

Among the main causes of this pollution is transportation. Vietnam now has 3.6 million automobiles and 58 million motorbikes, mostly found in big cities. Many of these vehicles are old, with limited emission control technology. They cause daily traffic jams and are responsible for a large amount of air pollution.

The Vietnamese Government is considering whether to increase the environmental tax on petrol and diesel by 33%. The proposed tax will generate $2.4 bn each year, an annual increase of $650.2 m from current tax revenues on fuels.

(Source adapted from: https://thediplomat.com/2020/03/vietnams-big-air-pollution-challenge/)

(c) With reference to the data above and your knowledge of economics, evaluate the effectiveness of increasing taxation on petrol and diesel to protect the environment in a country such as Vietnam. (12)

Wind power became Spain's main energy source in 2021. Renewable energy sources such as wind and solar contributed to almost 47% of the country's energy, compared to 30% in 2011. This has helped to reduce Spain's use of fossil fuels.

"Wind power is going to dominate the Spanish electricity supply for a long time. Spain has it all: we have more wind and more sun than practically any other European country," says Francisco Valverde, an energy consultant.

The Spanish Government is giving €6.9bn in subsidies for renewable energy between 2022 and 2023. These subsidies will help create over 280,000 jobs in the Spanish economy. Over 60% of solar and 90% of wind energy equipment is manufactured in Spain.

(Source: https://english.elpais.com/economy-and-business/2021-12-14/wind-power-becomes-spains-leading-energy-source-for-2021.html)

(c) With reference to the data above and your knowledge of economics, evaluate how effective subsidies are in protecting the environment in a country such as Spain.

It is estimated that about 24 million tourists visit Venice, Italy each year. This high number of tourists means that the city is very overcrowded.

In January 2023, a new tourist tax was introduced on people visiting Venice. Tourists need to pay between €3 and €10 for each day they are in Venice. The higher €10 rate is paid at peak times, reducing to €3 during quieter periods.

(Source: adapted from https://veneziaautentica.com/venice-tourist-tax/)

(g) With reference to the data above and your knowledge of economics, assess the likely effectiveness of the tourist tax in dealing with negative externalities, such as overcrowding.

Costa Rica has 5% of the world's wildlife species but it occupies only 0.03% of the earth's surface. Costa Rica takes pride in having 30 national parks with more than 25% of the territory of Costa Rica marked for conservation.

National parks have economic value to both national and local economies. Costa Rica takes advantage of the growing demand by tourists visiting these national parks by charging an entry fee. National Parks contribute almost $2bn to the Costa Rican economy. 122,465 tourists visited national parks in Costa Rica in the last two weeks of 2021.

Local economies near the national parks benefit from the creation of jobs and the increased expenditure by tourists on hotels, local shops, guides, restaurants and tours.

(c) With reference to the data above and your knowledge of economics, evaluate the possible advantages of the government providing national parks to protect the environment in a country such as Costa Rica.

Sri Lanka Railways (SLR) has made a loss of Rs 331bn over the last 10 years.
The Sri Lankan Government provides a subsidy so that ticket prices can be reduced. This is to encourage passengers to use trains rather than further increase congestion on the roads.

A spokesperson for SLR said that it needs to upgrade existing railway tracks to make services more comfortable for passengers as well as increase the number of trains to reduce overcrowding. This will require a larger subsidy.

(e) With reference to the data above and your knowledge of economics, assess the effectiveness of subsidies in dealing with externalities, such as road congestion.

Bboxx, a firm that makes solar-powered stoves, received a $17m subsidy to reduce the price of its products. This subsidy will be used to encourage the use of solar-powered stoves in Rwanda where many households currently use firewood or coal to cook their meals.

More than 500,000 households in Rwanda will benefit from this subsidy programme. They will no longer have to burn firewood and coal, which create harmful and dangerous pollutants.

The subsidy programme is designed to reduce the percentage of households that use firewood for cooking from 80% in 2017 to 42% by 2024. This will reduce carbon emissions in Rwanda.

(g) With reference to the data above and your knowledge of economics, assess the possible benefits to the environment of providing subsidies for solar-powered stoves in Rwanda.
